

# Newest FCSS\_EFW\_AD-7.6 Test Question–Find Shortcut to Pass FCSS\_EFW\_AD-7.6 Exam

DOWNLOAD the newest Actual4test FCSS\_EFW\_AD-7.6 PDF dumps from Cloud Storage for free:  
[https://drive.google.com/open?id=1\\_GevgCWgALkeYazS6BDY3RSHGk3pD2Ee](https://drive.google.com/open?id=1_GevgCWgALkeYazS6BDY3RSHGk3pD2Ee)

Our FCSS - Enterprise Firewall 7.6 Administrator FCSS\_EFW\_AD-7.6 questions PDF is a complete bundle of problems presenting the versatility and correlativity of questions observed in past exam papers. These questions are bundled into FCSS - Enterprise Firewall 7.6 Administrator PDF questions following the official study guide. Fortinet FCSS\_EFW\_AD-7.6 PDF Questions are a portable, printable document that simultaneously plays on multiple devices. Our Fortinet FCSS\_EFW\_AD-7.6 PDF questions consists of problems in all aspects, whether theoretical, practical, or analytical.

The person who has been able to succeed is because that he believed he can do it. Actual4test is able to help each IT person, because it has the capability. Actual4test Fortinet FCSS\_EFW\_AD-7.6 exam training materials can help you to pass the exam. Any restrictions start from your own heart, if you want to pass the Fortinet FCSS\_EFW\_AD-7.6 examination, you will choose the Actual4test.

## FCSS\_EFW\_AD-7.6 Latest Test Simulator, Exam FCSS\_EFW\_AD-7.6 Sample

Don't waste your time with unhelpful study methods. There are plenty of options available, but not all of them are suitable to help you pass the FCSS - Enterprise Firewall 7.6 Administrator (FCSS\_EFW\_AD-7.6) exam. Some resources out there may even do more harm than good by leading you astray. Our FCSS\_EFW\_AD-7.6 Exam Dumps are available with a free demo and up to 1 year of free updates.

### Fortinet FCSS\_EFW\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Routing: This section of the exam measures the skills of a Network Infrastructure Engineer and covers the implementation of dynamic routing protocols for enterprise network traffic management. It includes configuring both OSPF and BGP routing protocols to ensure efficient and reliable data transmission across complex organizational networks.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• System Configuration: This section of the exam measures the skills of a Network Security Architect and covers the implementation and integration of core Fortinet infrastructure components. It includes deploying the Security Fabric, enabling hardware acceleration, configuring high availability operational modes, and designing enterprise networks utilizing VLANs and VDOM technologies to meet specific organizational requirements.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Central Management:</b> This section of the exam measures the skills of a Security Operations Manager and covers the implementation of centralized management systems for coordinated control and oversight of distributed Fortinet security infrastructures across enterprise environments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>VPN:</b> This section of the exam measures the skills of a VPN Solutions Engineer and covers the implementation of various virtual private network technologies. It includes configuring IPsec VPN using IKE version 2 protocols and implementing Automatic Discovery VPN solutions to establish on-demand secure tunnels between multiple sites within an enterprise network infrastructure.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Security Profiles:</b> This section of the exam measures the skills of a Threat Prevention Specialist and covers the configuration and management of comprehensive security profiling systems. It includes implementing SSL</li> <li>• <b>SSH inspection, combining web filtering and application control mechanisms, integrating intrusion prevention systems, and utilizing the Internet Service Database to create layered security protections for organizational networks.</b></li> </ul>

## Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q59-Q64):

### NEW QUESTION # 59

While configuring the BGP protocol, an administrator applies the set network-import-check disable command under config network. What will FortiGate do as a result of this command?

- **A. FortiGate will advertise all the prefixes in the BGP network table to its BGP neighbor, even if it is not in the routing table.**
- B. FortiGate will not advertise the prefixes, if it is not in the routing table.
- C. FortiGate will not advertise any imported routes received from one BGP neighbor to another.
- D. FortiGate will advertise only the corresponding prefixes in the BGP network table to its BGP neighbor, even if it is not in the routing table.

**Answer: A**

Explanation:

The command set network-import-check disable under config network in FortiGate BGP configuration allows FortiGate to advertise a prefix even if it is not present in the routing table.

This means FortiGate will advertise all the prefixes in the BGP network table to its BGP neighbor, even if those prefixes are not currently in the routing table. The default behavior without this command is to advertise only those prefixes that are in the routing table.

### NEW QUESTION # 60

What does the command set forward-domain <domain\_ID> in a transparent VDOM interface do?

- A. It configures the interface to prioritize traffic based on the domain ID, enhancing quality of service for specified VLANs.
- B. It restricts the interface to managing traffic only from the specified VLAN, effectively segregating network traffic.
- **C. It isolates traffic within a specific VLAN by assigning a broadcast domain to an interface based on the VLAN ID.**
- D. It assigns a unique domain ID to the interface, allowing it to operate across multiple VLANs within the same VDOM.

**Answer: C**

### NEW QUESTION # 61

Refer to the exhibit, which shows a revision history window in the FortiManager device layer.

ID	Date & Time	Name	Created By	Installation	Comments
✓ 10	2024-08-21 14:30:54	script_manager	script_manager	Retrieved	
9	2024-08-21 14:02:55	AutoUpdate	AutoUpdate	Auto Updated	Autoretrieve merged config
8	2024-06-24 04:52:47	DCFV	admin	Installed	

The IT team is trying to identify the administrator responsible for the most recent update in the FortiGate device database. Which conclusion can you draw about this scenario?

- A. Find the user in the FortiManager system logs and use the type=script command to find the administrator user in the user field.
- B. To identify the user who created the event, check it on the Configuration and Installation widget on FortiGate within the FortiManager device layer.
- C. The user script\_manager is an API user from the Fortinet Developer Network (FDN) retrieving a configuration.
- D. This retrieved process was automatically triggered by a Remote FortiGate Directly (via CLI) script.

**Answer: A**

Explanation:

The Configuration Revision History window in FortiManager shows that the most recent configuration change (ID 10) was created by script\_manager with the action Retrieved.

Since script\_manager is a system-level script execution user, the IT team needs to find who actually triggered this script. This can be done by:

# Checking the FortiManager system logs for script execution events.

# Using the type=script filter to locate the administrator associated with the script execution.

#### NEW QUESTION # 62

Why do the firewall policy and reinstall preview show different address names during installation?

- A. Address mismatch
- B. Object corruption
- C. Policy conflict
- D. Per-device mapping

**Answer: D**

Explanation:

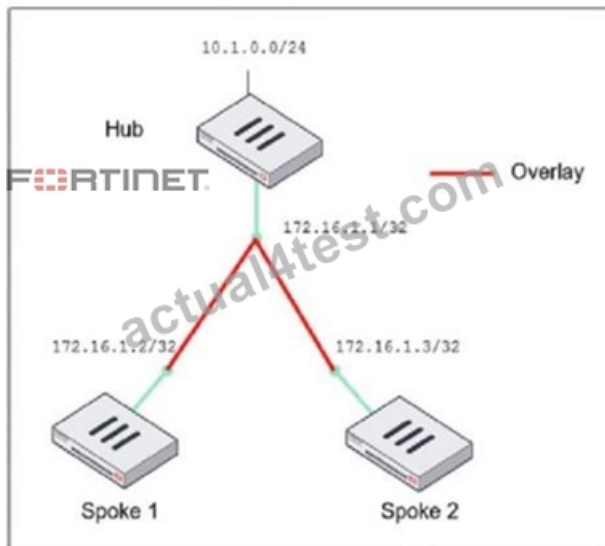

FortiManager uses a feature called per-device mapping (also referred to as dynamic mapping) to manage environments where different FortiGate devices require different values for the same object name. For example, an address object named "LAN" might represent 172.16.0.0/24 on one device and 192.168.0.0/24 on another.

When an administrator views the policy package in the FortiManager GUI, they see the common object name used across the ADOM. However, the reinstall preview generates the actual CLI commands that will be pushed to the specific FortiGate unit. This preview reflects the specific mapped value or name defined for that individual device, which is why the names or values may appear different from the generic policy view.

#### NEW QUESTION # 63

Refer to the exhibit, which shows the ADVPN network topology and partial BGP configuration.

## ADVPN network topology

## Partial BGP configuration

```
Hub # config router bgp
set as 65100
set router-id 172.16.1.1
config neighbor-group
  edit "advpn"
  set remote-as 65100
  ""
end
config neighbor-range
  edit 1
  end
config network
  ..
end
```

Which two parameters must an administrator configure in the config neighbor range for spokes shown in the exhibit? (Choose two.)

- A. set max-neighbor-num 2
- B. set neighbor-group advpn
- C. set route-reflector-client enable
- D. set prefix 172.16.1.0 255.255.255.0

**Answer: B,D**

Explanation:

In the given ADVPN (Auto-Discovery VPN) topology, BGP is being used to dynamically establish routes between spokes. The neighbor-range configuration is crucial for simplifying BGP peer setup by automatically assigning neighbors based on their IP range.

set neighbor-group advpn

\* The neighbor-group parameter is used to apply pre-defined settings (such as AS number) to dynamically discovered BGP neighbors.

\* The advpn neighbor-group is already defined in the configuration, and assigning it to the neighbor-range ensures consistent BGP settings for all spoke neighbors.

set prefix 172.16.1.0 255.255.255.0

\* This command allows dynamic BGP peer discovery by defining a range of potential neighbor IPs (172.16.1.1 - 172.16.1.255).

\* Since each spoke has a unique /32 IP within this subnet, this ensures that any spoke within the 172.16.1.0/24 range can automatically establish a BGP session with the hub.

## NEW QUESTION # 64

.....

Actual4test offers accurate and reliable study materials to help you prepare for the Fortinet FCSS\_EFW\_AD-7.6 Exam. They have prepared the best Fortinet FCSS\_EFW\_AD-7.6 Exam Questions that provide authentic and reliable material. With Actual4test, many candidates have succeeded in passing the Fortinet FCSS\_EFW\_AD-7.6 Exam.
