Maybe you are under tremendous pressure now, but you need to know that people's best job is often done under adverse circumstances. Ideological pressure, even physical pain, can be a mental stimulant. Turn pressure into power, which may be your chance to complete the transformation. But our 220-1201 Exam Questions can help you become more competitive easier than you can imagine. With a pass rate of 98% to 100%, our 220-1201 study materials can help you achieve your dream easily. And we have money back guarantee on our 220-1201 practice guide.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q163-Q168):

NEW QUESTION # 163

An IT specialist sets up a wireless router in a SOHO environment. Afterward, several devices cannot access the internet and are assigned IP addresses starting with 169.254. Which of the following is the best action to resolve this issue?

- A. Use static IP addresses.
- B. Shorten the lease time.
- C. Reboot the wireless router.
- D. Increase the DHCP pool size.

Answer: C

Explanation:

Addresses in the 169.254.x.x range indicate the clients were unable to contact a DHCP server and fell back to APIPA. Since the router provides DHCP in a SOHO setup, restarting it will restore the DHCP service so devices can obtain valid IP addresses again.

NEW QUESTION # 164

An IT specialist compares Bluetooth and NFC technologies for mobile device connectivity. Which of the following statements accurately describes a key difference between the two?

- A. NFC works best within a few centimeters, but Bluetooth can connect devices that are up to 32ft (10m) apart.
- B. NFC consumes more power than Bluetooth, making it less suitable for devices in which battery conservation is crucial.
- C. NFC requires pairing with the receiving host, whereas Bluetooth just needs the available connection.
- D. NFC is faster than Bluetooth when transferring large files between devices.

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

NFC (Near-Field Communication) operates at very short ranges - usually less than 4cm, and is ideal for quick, secure transactions like contactless payments. Bluetooth supports longer ranges (up to 10 meters or 32 feet) and is suited for ongoing connections like wireless headsets or file transfers.

* Option A: Bluetooth is faster for large file transfers.

* Option B: NFC uses less power, not more.

* Option C: NFC does not require pairing - Bluetooth does.

CompTIA A+ Core 1 Exam Objective Reference:

* Objective 1.5: Given a scenario, connect and configure accessories and ports of mobile devices.

NEW QUESTION # 165

Which of the following cable types is the most suitable for delivering 10Gb speeds for distances over 328ft (100m) but under 1,312ft (400m)?

- A. Single-mode fiber
- B. Multimode fiber
- C. Cat 6
- D. Cat 6a

Answer: B

Explanation:

Comprehensive and Detailed Step-by-Step

When delivering 10Gbps speeds over long distances, fiber optic cables are the best choice. Here's the breakdown:

A. Multimode Fiber (Correct Answer):

Multimode fiber is designed for relatively short to medium distances (up to 1,312 feet or 400 meters) while supporting high-speed data transfer (10Gbps and above).

It uses LED light sources and is cost-effective for environments like data centers or within buildings.

For the specified distance of over 328ft but under 1,312ft, multimode fiber is the most suitable option.

Incorrect Options:

B . Single-mode Fiber: While single-mode fiber supports much greater distances (up to several miles or kilometers) and higher speeds, it is more expensive and unnecessary for the specified range. Single-mode fiber is generally used for long-haul networking or telecommunications.

C . Cat 6a: Cat 6a is capable of 10Gbps speeds but only up to 328ft (100 meters). It cannot reliably handle the specified distance of over 328ft.

D . Cat 6: Cat 6 is also limited to 10Gbps speeds at distances up to 328ft (100 meters). Beyond this range, it is unsuitable.

Key Takeaway:

For delivering 10Gbps speeds over distances longer than 328ft (100m) but under 1,312ft (400m), Multimode Fiber is the best choice due to its ability to support high-speed data over medium distances at a reasonable cost.

NEW QUESTION # 166

Which of the following would prevent a virtual machine from communicating with any endpoints on a network or the internet?

- A. Private cloud
- B. Type 1 hypervisor
- C. VDI
- D. Sandbox

Answer: D

Explanation:

A sandbox is an isolated virtual environment used to test or run applications securely without risk to the host or network. It prevents the VM from communicating with external systems, making it ideal for testing malware or suspicious software.

NEW QUESTION # 167

Which of the following DNS records should a technician configure to allow domains that are not owned by the company to send messages on the company's behalf?

- A. CNAME
- B. DMARC
- C. DKIM
- D. MX
- E. SPF

Answer: E

Explanation:

An SPF (Sender Policy Framework) record specifies which mail servers or domains are authorized to send emails on behalf of a domain. Configuring the SPF record to include third- party domains allows them to send messages legitimately for the company, helping prevent spoofing and unauthorized email use.

NEW QUESTION # 168

.....

Two CompTIA 220-1201 practice tests of VCE4Dumps (desktop and web-based) create an actual test scenario and give you a 220-1201 real exam feeling. These 220-1201 Practice Tests also help you gauge your CompTIA Certification Exams preparation and identify areas where improvements are necessary.
