## Administrator

You don't have to install excessive plugins or software to attempt this Salesforce Advanced-Administrator practice test. This version of Advanced-Administrator practice exam is supported by these operating systems: Windows, Mac, iOS, Linux, and Android. It is a customizable Salesforce Advanced-Administrator Practice Exam. It means takers can change its duration and Advanced-Administrator practice test question numbers. The actual Salesforce Advanced-Administrator exam environment that the practice exam creates is beneficial to counter Salesforce Certified Advanced Administrator (Advanced-Administrator) exam anxiety.

### Salesforce Certified Advanced Administrator Sample Questions (Q129-Q134):

#### NEW QUESTION # 129

Cloud Kicks wants its sales reps to always use the same full zip code format with a hyphen where applicable. What should the administrator implement to help ensure consistent formatting?

- A. Edit the standard field length to five characters.
- B. Add a quick create function for the sales reps to use.
- C. Add a help text instructing the sales rep on how to enter this field.
- D. **Create a REGEX function to use in a validation rule on the field.**

#### Answer: D

Explanation:

Explanation

REGEX is a function that allows administrators to check whether a text value matches a regular expression pattern. Regular expressions are a way to define complex patterns of characters using symbols and operators.

REGEX can be used to enforce consistent formatting for a field value by specifying the required length, characters, and separators.

#### NEW QUESTION # 130

A custom object called Item has a many-to-many relationship with the Account and Quota objects. At Cloud Kicks, account owners are changed frequently while ownership of Quota records remains unchanged. When an account owner is updated, the new account owner can only see Item records if they are also the owner of the Quota record.

What step should the administrator take to give access to all Item records?

Change the data format of the Quota relationship field from master-detail to lookup.

- A. Re-assign the Quota master-detail to the primary and the
- B. Account master-detail to secondary.
- C. Create a Quota criteria-based sharing rule using ISCHANGED for the Account Owner field.
- D. **Give the account owner Read access to both the Account and the Quota objects**

#### Answer: D

Explanation:

Giving the account owner Read access to both the Account and the Quota objects will give access to all Item records. Since Item is a junction object between Account and Quota, users need to have at least Read access to both parent objects to see Item records.

If users have access to only one parent object, they will not be able to see Item records related to the other parent object.

#### NEW QUESTION # 131

What needs to be done before converting lookup to Master detail relationship

- A. **Make sure that all lookup fields have values**
- B. Use Data Loader to convert all lookup to Master detail
- C. OWD of master must be public Read/Write
- D. First delete lookup field and create new Master Detail

#### Answer: A

### NEW QUESTION # 132

Management at Ursa Major Solar wants to understand how many accounts have opportunities in the overall pipeline. What should the administrator use to create a report showing all open opportunities and the total number of accounts represented?

- A. A custom report type showing opportunities with accounts
- B. The row count on a summary report grouped by account name
- **C. The Show Unique Count option on the account name column**
- D. A Cross Filter selecting opportunities with accounts

#### Answer: C

Explanation:

The Show Unique Count option on the account name column will create a report showing all open opportunities and the total number of accounts represented. This option will count each account only once, even if it has multiple opportunities. The report can be grouped by account name or any other field to show more details. References: [https://help.salesforce.com/s/articleView?id=sf.reports\\_builder\\_unique\\_count.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.reports_builder_unique_count.htm&type=5)

### NEW QUESTION # 133

As part of their yearly audit, the compliance team at Cloud Kicks would like to track when a user's profile has been changed and who changed the data.

What should the administrator review to meet this requirement?

- A. Field History Tracking
- B. Analytic Snapshot
- **C. Setup Audit Trail**
- D. Historical Trending

#### Answer: C

Explanation:

Explanation

The Setup Audit Trail is a tool that allows you to view and download a log of changes made in your org's Setup area. The log shows up to 20 fields of information for each change, such as who made it, when it was made, what type of change it was, and what values were changed. You can use the Setup Audit Trail to track configuration changes directly in production and identify any unauthorized or problematic changes. One of the changes that the Setup Audit Trail tracks is when a user's profile is changed and who changed it. This means that you can use the Setup Audit Trail to see when a user's profile has been changed and who changed the data.
