Die Fragenkataloge zur IAPP AIGP Zertifizierungsprüfung von ExamFragen sind die besten. Wenn Sie ein IAPP -Fachmann sind, sind sie Ihnen ganz notwendig. Sie sind ganz zuverlässig. Wir bieten speziell den AIGP -Kandidaten die Schulungsunterlagen, die Prüfungsfragen und Antworten zur AIGP Zertifizierung enthalten. Viele AIGP -Fachleute streben danach, die IAPP AIGP Prüfung zu bestehen. Die Erfolgsquote von ExamFragen ist unglaublich hoch. Unser ExamFragen setzt sich dafür ein, Ihnen zu helfen, den Erfolg zu erlangen.

Wenn Sie ExamFragen wählen, können Sie 100% die Prüfung bestehen. Nach den Veränderungen der Prüfungsthemen der IAPP AIGP aktualisieren wir auch ständig unsere Schulungsunterlagen und bieten neue Prüfungsinhalte. ExamFragen bietet Ihnen rund um die Uhr kostenlosen Online-Service. Falls Sie in der IAPP AIGP Zertifizierungsprüfung durchfallen, zahlen wir Ihnen die gesamte Summe zurück.

AIGP Pass Dumps & PassGuide AIGP Prüfung & AIGP Guide

Die IAPP AIGP Zertifizierungsprüfung sind jedem IT-Fachmann sehr wichtig. Solange Sie das AIGP Zertifikat bekommen, werden Sie im Beruf sicher nicht aussondert. Sie werden befördert und ein höheres Gehalt beziehen. Mit diesem Zertifikat können Sie alle bekommen, was Sie wünschen. Die Fragenpool zur IAPP AIGPZertifizierungsprüfung von ExamFragen sind die Ressourcen zum Erfolg. Mit diesen Schulungsmaterialien werden Sie den Schritt zum Erfolg beschleunigen. Sie werden sicher mehr selbstbewusster.

IAPP AIGP Prüfungsplan:

Thema	Einzelheiten
Thema 1	Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

Thema 2	• Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Thema 3	• Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
Thema 4	• Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

IAPP Certified Artificial Intelligence Governance Professional AIGP Prüfungsfragen mit Lösungen (Q133-Q138):

133. Frage

CASE STUDY

Please use the following answer the next question:

ABC Corp, is a leading insurance provider offering a range of coverage options to individuals. ABC has decided to utilize artificial intelligence to streamline and improve its customer acquisition and underwriting process, including the accuracy and efficiency of pricing policies.

ABC has engaged a cloud provider to utilize and fine-tune its pre-trained, general purpose large language model ("LLM"). In particular, ABC intends to use its historical customer data-including applications, policies, and claims-and proprietary pricing and risk strategies to provide an initial qualification assessment of potential customers, which would then be routed to a human underwriter for final review.

ABC and the cloud provider have completed training and testing the LLM, performed a readiness assessment, and made the decision to deploy the LLM into production. ABC has designated an internal compliance team to monitor the model during the first month, specifically to evaluate the accuracy, fairness, and reliability of its output. After the first month in production, ABC realizes that the LLM declines a higher percentage of women's loan applications due primarily to women historically receiving lower salaries than men.

Each of the following steps would support fairness testing by the compliance team during the first month in production EXCEPT?

- **A. Providing the loan applicants with information about the model capabilities and limitations.**
- B. Validating a similar level of decision-making across different demographic groups.
- C. Identifying if additional training data should be collected for specific demographic groups.
- D. Using tools to help understand factors that may account for differences in decision-making.

Antwort: A

Begründung:

Providing the loan applicants with information about the model capabilities and limitations would not directly support fairness testing by the compliance team. Fairness testing focuses on evaluating the model's decisions for biases and ensuring equitable treatment across different demographic groups, rather than informing applicants about the model.

Reference: The AIGP Body of Knowledge outlines that fairness testing involves technical assessments such as validating decision-making consistency across demographics and using tools to understand decision factors.

While transparency to applicants is important for ethical AI use, it does not contribute directly to the technical process of fairness

testing.

134. Frage

A regulator has ruled that the AI model used by some features of your product should not be used in their jurisdiction. What is the most robust way of reacting to this situation?

- A. Shut down the service in the jurisdiction to pressure the regulator to change their position.
- B. Re-train your AI model and deploy it immediately to show you can react quickly to regulator's requirements.
- **C. Implement a feature flag to enable or disable the features based on a user's country of origin.**
- D. Create a second, separate version of the application and deploy it to users in the jurisdiction.

Antwort: C

135. Frage

What is the 1956 Dartmouth summer research project on AI best known as?

- A. A research project on the impacts of technology on society.
- **B. A meeting focused on the founding of the AI field.**
- C. A research project to create a test for machine intelligence.
- D. A meeting focused on the impacts of the launch of the first mass-produced computer.

Antwort: B

Begründung:

The 1956 Dartmouth summer research project on AI is best known as a meeting focused on the founding of the AI field. This conference is historically significant because it marked the formal beginning of artificial intelligence as an academic discipline. The term "artificial intelligence" was coined during this event, and it laid the foundation for future research and development in AI. Reference: The AIGP Body of Knowledge highlights the importance of the Dartmouth Conference as a pivotal moment in the history of AI, which established AI as a distinct field of study and research.

136. Frage

A company developing and deploying its own AI model would perform all of the following steps to monitor and evaluate the model's performance EXCEPT?

- A. Implementing a formal incident response plan to address incidents that may occur during system operation.
- **B. Publicly disclosing data with forecasts of secondary and downstream harms to stakeholders.**
- C. Setting up automated tools to regularly track the model's accuracy, precision and recall rates in real-time.
- D. Establishing a regular schedule for human evaluation of the model's performance, including qualitative assessments.

Antwort: B

Begründung:

While transparency is encouraged, publicly disclosing forecasts of secondary harms is not a required or standard practice for internal performance evaluation. Risk assessments and reporting typically remain internal or shared with regulators.

From the AI Governance in Practice Report 2025:

"Organizations must assess secondary risks... but disclosure is subject to context, regulatory requirements, and risk management discretion." (p. 30)

137. Frage

Scenario:

A mid-sized tech firm is building its AI governance program and is exploring ISO/IEC standards that could support consistency in terminology and risk assessment processes across teams.

ISO/IEC 22989 and ISO/IEC 42001 can be valuable resources for AI Governance professionals in all of the following ways

EXCEPT:

- A. Recommending key activities to assess and manage risk: test, evaluate, verify and validate (TEVV)

- B. Addressing specific issues related to managing procurement processes with third parties that provide or develop AI systems for their organization
- C. Being applicable to organizations of any size and industry seeking to use AI responsibly and effectively in their design processes, information systems and controls
- D. Establishing terminology and describing concepts so that governance team members can communicate with diverse parties and stakeholders from around the world

Antwort: B

Begründung:

The correct answer is C. ISO/IEC 22989 and 42001 focus on terminology, risk, and management systems, but do not specifically address procurement-related concerns with third-party vendors.

From the AIGP Body of Knowledge - Standards Section:

"ISO/IEC 22989 defines terminology and foundational concepts. ISO/IEC 42001 provides a management system standard for AI. They are not procurement-focused documents." Also confirmed in the AI Governance in Practice Report 2025:

"These standards help establish common language and risk governance procedures. Procurement governance typically falls under separate frameworks or sector-specific guidance." Thus, procurement governance (Option C) is not a central use case for these standards.

138. Frage

.....

Mit der IAPP AIGP Zertifizierungsprüfung werden Sie sicher bessere Berufsaussichten haben. Die IAPP AIGP Zertifizierungsprüfung kann nicht nur Ihre Fertigkeiten, sondern auch Ihre Zertifikate und Fachkenntnisse beweisen. Die den Schulungsunterlagen zur IAPP AIGP Zertifizierungsprüfung von ExamFragen sind eine von der Praxis bewährte Software. Mit ihr können Sie eine bessere Theorie bekommen. Vor dem Kauf können Sie eine kostenlose Probeversion bekommen. So kennen Sie die Qualität unserer Prüfungsmaterialien. ExamFragen ist Ihnen die beste Wahl.
