Our 300-720 exam torrent boosts 3 versions and they include PDF version, PC version, and APP online version. The 3 versions boost their each strength and using method. For example, the PC version of 300-720 exam torrent boosts installation software application, simulates the real exam, supports MS operating system and boosts 2 modes for practice and you can practice offline at any time. You can learn the APP online version of Securing Email with Cisco Email Security Appliance guide torrent in the computers, cellphones and laptops and you can choose the most convenient method to learn. The 300-720 study questions and the forms of the answers and the question are the same so you needn't worry that if you use different version the Securing Email with Cisco Email Security Appliance guide torrent and the forms of the answers and the question are different.

## Cisco Securing Email with Cisco Email Security Appliance Sample Questions (Q133-Q138):

### NEW QUESTION # 133

```
Tue Aug 13 16:55:40 2019 Info: Start MID 379133 ICID 391963
Tue Aug 13 16:55:40 2019 Info: MID 379133 ICID 391963 From: <matt@lee.com>
Tue Aug 13 16:55:40 2019 Info: MID 379133 ICID 391963 RID 0 To: <bob_doe@cisco.com>
Tue Aug 13 16:55:45 2019 Info: MID 379133 Message-ID <cop.26f2lu27uxysu20mathuynh-f645d.mshome.net>
Tue Aug 13 16:55:45 2019 Info: MID 379133 Subject 'This is a highly confidential email.'
Tue Aug 13 16:55:48 2019 Info: MID 379133 ready 12142757 bytes from <matt@lee.com>
Tue Aug 13 16:55:49 2019 Info: MID 379133 matched all recipients for pre-recipient policy marketing team in the inbound table
Tue Aug 13 16:55:49 2019 Info: MID 379133 was too big (12142757/524208) for scanning by Outbreak Filters
Tue Aug 13 16:55:49 2019 Info: MID 379133 was too big (12142757/2097152) for scanning by CASE
Tue Aug 13 16:55:50 2019 Info: MID 379133 interim AV verdict using Sophos CLEAN
Tue Aug 13 16:55:50 2019 Info: MID 379133 antivirus negative
Tue Aug 13 16:55:50 2019 Info: MID 379133 using engine: GRAYMAIL negative
Tue Aug 13 16:55:52 2019 Info: MID 379133 attachment 'ds_validation_NEG.zip'
Tue Aug 13 16:55:52 2019 Warning: MID 379133, Message Scanning Problem: Size Limit Exceeded
Tue Aug 13 16:55:52 2019 Info: MID 379133 queued for delivery
```

### Scan Behavior

Attachment Type Mappings			
Add Mapping...			
Fingerprint/MIME	Type	Edit	Delete
Fingerprint	Image	Edit...	✖
Fingerprint	Media	Edit...	✖
MIME Type	audio/*	Edit...	✖
MIME Type	video/*	Edit...	✖
Export List...			

Global Settings	
Action for attachments with MIME types/fingerprints in table above:	Skip
Maximum depth of attachment recursion to scan:	5
Maximum attachment size to scan:	5M
Attachment Metadata scan:	Enabled
Attachment scanning timeout:	30 seconds
Assume attachment matches pattern if not scanned for any reason:	No
Assume zip file to be unscannable if files in the archive cannot be read?	No
Action when message cannot be deconstructed to remove specified attachments:	Deliver
Bypass all filters in case of a content or message filter error:	Yes
Encoding to use when none is specified:	US-ASCII
Convert opaque-signed messages to clear-signed (S/MIME unpacking):	Disabled
Actions for Unscannable Messages due to decoding errors found during URL Filtering	Disabled
Actions:	
Action when a message is unscannable due to extraction failures:	Deliver As Is
Action when a message is unscannable due to RFC violations:	Disabled
Edit Global Settings...	

Refer to the exhibit. Which configuration on the scan behavior must be updated to allow the attachment to be scanned on the Cisco ESA?

- A. Add an additional mapping for attachment type for zip files.

- B. Increase the maximum attachment size to scan to a larger value.
- C. Enable assume match pattern if the email was not scanned for any reason.
- D. Increase the maximum recursion depth from 5 to a larger value.

**Answer: B**

Explanation:

The maximum attachment size to scan is a configuration on the scan behavior that determines the maximum size of an attachment that Cisco ESA will scan for viruses and malware. If an attachment exceeds this size, Cisco ESA will apply the configured action for unscannable messages, such as deliver, drop, or quarantine.

To allow the attachment to be scanned on the Cisco ESA, this configuration must be updated to a larger value than the attachment size, which is 10 MB according to the message header.

The other options are not valid configurations to allow the attachment to be scanned on the Cisco ESA, because they do not affect the maximum attachment size to scan.

#### NEW QUESTION # 134

An email containing a URL passes through the Cisco ESA that has content filtering disabled for all mail policies. The sender is sampleuser@test1.com, the recipients are testuser1@test2.com, testuser2@test2.com, testuser3@test2.com, and mailer1@test2.com. The subject of the email is Test Document395898847. An administrator wants to add a policy to ensure that the Cisco ESA evaluates the web reputation score before permitting this email.

Which two criteria must be used by the administrator to achieve this? (Choose two.)

- A. Date and time of email
- B. Sender matches test1.com
- C. Subject contains Test Document"
- D. Email does not match mailer1@test2.com
- E. Email body contains a URL

**Answer: B,E**

Explanation:

Web reputation score is a feature that allows Cisco ESA to evaluate the reputation of URLs in messages based on real-time data from Talos intelligence and apply appropriate actions, such as block, quarantine, or deliver.

To ensure that Cisco ESA evaluates the web reputation score before permitting this email, the administrator should use two criteria to create a content filter or message filter that matches this email and applies an action of "check web reputation":

Sender matches test1.com, which means that the sender's domain name is test1.com.

Email body contains a URL, which means that the message body has one or more URLs in it.

The other options are not valid criteria to ensure that Cisco ESA evaluates the web reputation score before permitting this email, because they do not match this email or they are not relevant to web reputation score.

#### NEW QUESTION # 135

An engineer is tasked with creating a content filter to catch attachments, including credit card numbers, and hold them for review until further action is taken. Which component on a Cisco Secure Email Gateway must be configured to meet this requirement?

- A. Policy Quarantine
- B. Outbreak Filter
- C. Content Filter
- D. Spam Quarantine

**Answer: C**

Explanation:

Content filter is a component on a Cisco Secure Email Gateway that must be configured to catch attachments, including credit card numbers, and hold them for review until further action is taken. Content filter allows you to define rules based on message content and apply actions such as quarantine, encrypt, or modify. Reference = [User Guide for AsyncOS 12.0 for Cisco Email Security Appliances - GD (General Deployment) - Content Filters [Cisco Secure Email Gateway] - Cisco]

### NEW QUESTION # 136

When virtual gateways are configured, which two distinct attributes are allocated to each virtual gateway address? (Choose two.)

- A. DHCP server address
- B. external spam quarantine
- C. domain
- D. IP address
- E. DNS server address

**Answer: C,D**

Explanation:

Virtual gateways are a feature that allows Cisco ESA to host multiple email domains on a single physical interface, using different IP addresses and hostnames for each domain.

When virtual gateways are configured, two distinct attributes are allocated to each virtual gateway address:

\* Domain, which is the email domain name that is associated with the virtual gateway address, such as mycompany.com or mydomain.com.

\* IP address, which is the IPv4 or IPv6 address that is assigned to the virtual gateway address, such as 199.209.31.X or 2001:db8::X.

The other options are not attributes that are allocated to each virtual gateway address on Cisco ESA.

References: User Guide for AsyncOS 15.0 for Cisco Secure Email Gateway, page 5-14 and page 5-15.

### NEW QUESTION # 137

Which suboption must be selected when LDAP is configured for Spam Quarantine End-User Authentication?

- A. Designate as the active query
- B. Server Priority
- C. Update Frequency
- D. Entity ID

**Answer: A**

Explanation:

According to the User Guide I, the steps to configure End-User Access to the Spam Quarantine via LDAP are as follows:

On the ESA, choose System Administration > LDAP > LDAP Server Profile page.

Click Add LDAP Server Profile.

Enter a name for the profile and click Submit.

Click Add Query.

Enter a name for the query and click Submit.

Configure the query settings, such as server address, port number, base DN, scope, filter, and attributes.

Check the Spam Quarantine End-User Authentication Query check box. This is the suboption that enables LDAP authentication for end users who access the spam quarantine.

Check the Designate as the active query check box. This is the suboption that specifies which query to use for end-user authentication. Only one query can be active at a time.

Click Submit and commit changes.

On the ESA, choose Monitor > Spam Quarantine > End-User Quarantine Access.

Check the Enable End-User Quarantine Access check box.

Choose LDAP from the End-User Authentication drop-down list.

Select the LDAP profile and query that you created earlier from the drop-down lists.

Click Submit and commit changes.

### NEW QUESTION # 138
