GH-900 Accurate Prep Material - GH-900 Reliable Exam Materials

Our Microsoft GH-900 exam dumps will assist you in preparing for the actual Microsoft GH-900 exam. Our Microsoft GH-900 practice test software allows you to customize the difficulty level by decreasing the time duration of Microsoft GH-900 Practice Exam, Which will help you to test yourself and make you capable of obtaining the Microsoft GH-900 certification with high scores.

Microsoft GitHub Foundations Sample Questions (Q53-Q58):

NEW QUESTION # 53

What layouts are available for GitHub Projects?

(Each answer presents a complete solution. Choose three.)

- A. Roadmap
- B. Table
- C. Backlog
- D. Board
- E. Kanban

Answer: B,D,E

Explanation:

GitHub Projects supports various layouts to help teams organize and visualize their work. The available layouts include:

B . Kanban: This is a visual task management tool where tasks are represented as cards and moved across columns that represent different stages of work.

C . Board: This layout is similar to Kanban but can be more flexible, allowing users to set up boards in various ways to suit their

workflow needs.

D. Table: The Table layout allows you to view your tasks in a spreadsheet-like format, making it easy to manage and edit large amounts of data at once.

Roadmap and Backlog are not standard layouts provided by GitHub Projects. While these terms might be relevant in other project management contexts, GitHub Projects specifically offers Kanban, Board, and Table layouts.

NEW QUESTION # 54

Which of the following permissions can be enabled or disabled at the enterprise level? (Choose two.)

- A. repository secrets
- B. repository deletion and transfer
- C. repository visibility change
- D. repository naming convention

Answer: B,C

Explanation:

[C] Restricting repository visibility changes in your organization

To protect your organization's data, you can configure permissions for changing repository visibility in your organization.

[D] Setting permissions for deleting or transferring repositories

You can allow organization members with admin permissions to a repository to delete or transfer the repository, or limit the ability to delete or transfer repositories to organization owners only.

NEW QUESTION # 55

As a user, which of the following default labels is used to indicate that a maintainer needs assistance on an issue or pull request?

- A. Help wanted
- B. Question
- C. Enhancement
- D. Documentation

Answer: A

Explanation:

In GitHub, labels are used to categorize issues and pull requests, and certain default labels are provided to help manage tasks:

Help Wanted Label:

Option C is correct. The "Help wanted" label is used to indicate that the maintainer of the repository needs assistance on a particular issue or pull request. This label helps in attracting contributors who might be interested in helping with specific tasks.

Other Options:

Option A ("Enhancement") is incorrect because it indicates a request for a new feature or improvement rather than a call for help.

Option B ("Question") is incorrect because it is used to flag issues or pull requests that seek clarification or additional information, not necessarily requiring assistance.

Option D ("Documentation") is incorrect because it labels issues or PRs related to documentation, not for seeking help.

NEW QUESTION # 56

What type of operations has Git been optimized for?

- A. remote collaboration and real-time editing
- B. cloud-based operations and synchronization
- C. web development and browser-based coding
- D. local file manipulation and offline work

Answer: D

Explanation:

In a distributed version control system like Git, developers download source code -- along with a full version history -- to their machine. Once the full repository is downloaded, they can make changes locally--which makes local commits, diffs, and merges fast.

Incorrect:

[Not B] Git is a version control system, and it's not intended for real-time collaboration. Rather it's for when multiple people all work offline in parallel on the same file(s).

NEW QUESTION # 57

Which of the following are included as pre-defined repository roles?

(Each answer presents a complete solution. Choose three.)

- A. View
- B. Maintain
- C. Security
- D. Triage
- E. Delete
- F. Write

Answer: B,D,F

Explanation:

GitHub provides several pre-defined repository roles that determine the level of access and permissions a user has within a repository. The roles that are included by default are:

Triage: Allows users to manage issues and pull requests without write access to the code.

Maintain: Provides more extensive access, including managing settings, but without full administrative control.

Write: Grants permission to push changes and manage issues and pull requests.

Roles like "Security" and "Delete" are not standard pre-defined roles, and "View" is generally referred to as "Read" in GitHub's permission structure.

NEW QUESTION # 58

.....

If you do not quickly begin to improve your own strength, the next one facing the unemployment crisis is you. The time is very tight, and choosing our GH-900 study materials can save you a lot of time. And our GH-900 Exam Questions can really save you time and efforts.
