

# 100% Pass 2026 Microsoft Useful PL-600: Latest Microsoft Power Platform Solution Architect Braindumps Pdf

BONUS!!! Download part of PassTestking PL-600 dumps for free: <https://drive.google.com/open?id=11fZPg-qJGCpIm5YNyEzACNg-29RFeG-L>

If you want to pass the exam just one time, then choose us. We can do that for you. PL-600 training materials are high-quality, they contain both questions and answers, and it's convenient for you to check your answers after practicing. In addition, PL-600 exam dumps are edited by professional experts, and they are familiar with dynamics of the exam center, therefore you can pass the exam during your first attempt. We offer you free demo to have a try for PL-600 Training Materials, so that you can have a deeper understanding of the exam dumps.

Microsoft PL-600 Exam, also known as the Microsoft Power Platform Solution Architect exam, is designed for professionals who want to demonstrate their knowledge and skills in designing and implementing solutions that leverage the Microsoft Power Platform. PL-600 exam measures the candidate's ability to design, configure, and implement solutions that solve business problems using Power Apps, Power Automate, Power BI, and Power Virtual Agents. Candidates who pass PL-600 exam will earn the Microsoft Certified: Power Platform Solution Architect Expert certification.

## Ending Notes

The Microsoft PL-600 exam is here to help professionals confirm their expertise in the field of Microsoft Power Platform. So, successfully writing this test and having the appropriate certification will help you move up your career ladder, and show your supervisor what you can do.

However, we should not forget about the preparatory path that precedes obtaining certification. Each candidate must understand that the requirements are high and that the knowledge area to be tested is vast. It is possible to pass this exam on the first try only if you prepare diligently. Assess your strengths and weaknesses, and start training today using the most current materials. All in your hands!

## PL-600 Premium Exam | Practice PL-600 Exam

We will refund your money if you fail to pass the exam if you buy PL-600 exam dumps from us, and no other questions will be asked. We are famous for high pass rate, with the pass rate is 98.75%, we can ensure you that you pass the exam and get the corresponding certificate successfully. In addition, PL-600 Exam Dumps of us will offer you free update for 365 days, and our system will send the latest version of PL-600 exam braindumps to your email automatically. We also have online service stuff, and if you have any questions just contact us.

## Microsoft Power Platform Solution Architect Sample Questions (Q157-Q162):

## NEW QUESTION # 157

A multinational organization uses a single Microsoft Power Platform environment. The instance hosts multiple customizations for different users in different regions.

Users in some regions complain about slow load time of the customizations.

You need to architect a solution based on the main requirement.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area	Goal	Suggested solution
	Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
	Regions have separate customers but use the same functionality and need global reporting.	Multiple instances in different regions with data replication Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
	Regions have separate functionality and customers but need global reporting on data.	Single instance; use Microsoft Azure Traffic Manager Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance

**Answer:**

Explanation:

Goal	Suggested solution
Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate customers but use the same functionality and need global reporting.	Multiple instances in different regions with data replication Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate functionality and customers but need global reporting on data.	Single instance; use Microsoft Azure Traffic Manager Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance

## NEW QUESTION # 158

You need to recommend technology for accessing historical job placement data.

What should you recommend?

- A. Power BI
- B. Power Automate flows
- C. Power Virtual Agents chatbots
- D. Virtual tables

**Answer: D**

Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

**Scenario:**

First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

The solution must provide a worker appointment booking system that can access worker historical job placement data.

First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

Topic 1, First Up Consulting

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies. The company operates offices in multiple countries/regions.

First Up has both full-time and part-time employees. The company has a team of worker support agents that respond to inquiries from current and prospective workers. Some of the worker support agents are multilingual.

The company does not have a standardized tool used for reporting purposes. The organization engages you to implement a new Power Platform solution. Workers are managed by a dedicated team that includes one primary recruiter and a contract assistant. Many client companies live in areas that do not allow for mobile data connections.

Current environment

Existing systems and processes

First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.

An appointment record is created for each visit with a worker. The record includes worker contact information, preferred language, the date and time of the appointment, and other relevant data. This information is reviewed by the worker's primary recruiter.

First Up has no current capabilities for forecasting future worker needs based on the data held.

Client company visits

Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device. Audit team members currently record information about workers on paper forms. Team members enter information from paper forms into the system when they return to the office.

First Up audits client companies at least once each year but may schedule additional visits based on feedback from workers that they place at a client company.

Requirements

General

There is no standardized communication tool across the company, and this causes communication issues between different teams. First Up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases. Workers must be able to communicate in near real-time with worker support agents.

Client company visits

Audit team records must be locked after they have been reviewed by a First Up manager. No further edits to the record can be carried out. This must be implemented using standard available system functionality.

Audit teams must be able to enter records of their visits to the companies where they have or may place workers. Audit teams must be able to update any necessary records with the latest information.

The solution must support tracking of security clearance information for a worker including the date, status, and certifying agency.

When a worker makes an appointment, the appointments must appear in the timeline for the worker's contact record.

Job history information

The solution must provide a worker appointment booking system that can access worker historical job placement data.

The solution must allow employees to associate a primary recruiter with each worker. The solution must also allow multiple secondary recruiters to be associated with each worker.

Every worker assessment performed must be validated and countersigned by the primary recruiter for a worker.

Job posting data from previous work engagements must be accessible by the Power Platform solution to ensure that new job postings are accurate.

First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Worker access

The solution must support workers that speak different languages. The solution must provide automatic translation capabilities.

The solution must support near real-time communications between workers and recruiters.

Workers must be able to view their records online. Workers must be able to enter any additional information that is required by or may be helpful to recruiters.

The solution must provide workers a way to search for general information about available positions.

Workers must be able to request copies of their records by using a chatbot. Workers must be able to provide information to a recruiter as needed.

#### Data platform

Audit teams must have the ability to view worker information on their mobile devices.

Audit teams must be able to record data during visits to locations where workers are placed.

The solution must support the ability for a corporate governance auditing team to periodically audit the organization's records, policies, and procedures.

#### Reporting and analytics

The reporting and analytics team must be able to create reports that include data from all facilities and all workers.

Management reports must present an overview of the entire organization. Other reports may be limited to specific offices.

You must create dashboards that show the status across all groups of workers. The dashboards must be embedded into the Power Platform apps. Updates to data must be displayed in near real time.

#### Security

Authentication for all user types must be managed by a single platform. IT teams must use PowerShell to apply security permissions for users.

Worker records must only be viewed by the recruiting office that the worker visits.

Worker still records must be archived after ten years and are then removed from the main system. Worker information must not be deleted from the system while skill and job placement history records for the worker exist in the system.

User security roles must be customized to ensure that users are able to interact only with the specific data in which they need access.

Workers must be able to sign into a portal by using their own email address. Workers must be required to use a secure method of authentication to be able to view their data.

Alerts regarding the number of recruited and placed at client companies must be updated as background processes.

#### Issues

The organization reports the following issues:

Recruiters report that they cannot see historical job placement data for workers.

API usage reports show that the number of API calls made exceeds limits. This causes delays saving data.

Users cannot view Power BI reports within the Power Platform apps.

Some security clearance information for workers not visible from within the Power Platform solution.

Audit teams report that they cannot view or edit worker data when the device on which they access the solution does not have network connectivity.

The testing team reports that one of the canvas apps is not working as expected. An error message displays as specific pages load.

## NEW QUESTION # 159

A company plans to create a Power Apps portal to manage support cases for customers. The company has an account hierarchy for customers. The hierarchy supports accounts, cases, and contacts where both contacts and cases belong to their relevant account.

The company has the following requirements:

\* Portal users must only see the notes for the cases that they manage.

\* Portal users must only see cases that are submitted by their colleagues.

You need to design the security model for the portal.

Which entity permission scope should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Scope

Portal users must only see the notes for the cases that they manage.

Self
Parent
Contact
Account

Portal users must only see cases that are submitted by their colleagues.

Self
Global
Contact
Account

Answer:

Explanation:

## Requirement Microsoft Scope

Portal users must only see the notes for the cases that they manage.

Self
Parent
Contact
Account

Portal users must only see cases that are submitted by their colleagues.

Self
Global
Contact
Account

Explanation:

# Microsoft Requirement

## Scope

Portal users must only see the notes for the cases that they manage.

Self
Parent
Contact
Account

Portal users must only see cases that are submitted by their colleagues.

Self
Global
Contact
Account

### Box 1: Contact

With Contact scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's contact record via a defined relationship.

### Box 2: Account

With Account Scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's parent account record via a defined relationship.

This scope means that the entity list will only show the records of the selected entity that are associated to the user's parent account. For example, if an entity permission allows Read access to Lead entity with the Account scope, the user having this permission can view all the leads of only the parent account of the user.

### Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/configure/assign-entity-permissions>

### NEW QUESTION # 160

A company uses Microsoft Power Platform. The company has a model-driven app that has an embedded canvas app in the Contact table. The embedded canvas app displays information for contacts from an external data source.

The following issues are reported during testing:

- \* Users assigned to the Contact Manager security role cannot see the embedded canvas app.
- \* Some users assigned to the Basic User security role cannot see the embedded canvas app.

You need to recommend a resolution for each issue.

Which resolutions should you recommend? To answer, select the appropriate options in the answer area.

#### Answer Area

##### Issue

Users assigned to the Contact Manager security role cannot view the embedded canvas app.

##### Resolution

Add the Contact Read privilege to the Contact Manager security role.  
Publish the Contact form.  
Republish the canvas app from Power Apps studio.  
**Add the Contact Read privilege to the Contact Manager security role.**  
Add the Canvas App Read privilege to the Contact Manager security role.

Some users assigned to the Basic User security role cannot view the embedded canvas app.

Add the Canvas App Read privilege to the Basic User security role.  
Republish the Contact form.  
Share the canvas app with the users.  
Republish the canvas app from Power Apps studio.  
**Add the Canvas App Read privilege to the Basic User security role.**

### Answer:

Explanation:

The screenshot shows a Microsoft interface for generating content. On the left, under 'Answer Area', there are two 'Issue' sections. The first issue is 'Users assigned to the Contact Manager security role cannot view the embedded canvas app.' The second issue is 'Some users assigned to the Basic User security role cannot view the embedded canvas app.' To the right, under 'Resolution', there are two dropdown menus. The top dropdown for the first issue contains the following options: 'Add the Contact Read privilege to the Contact Manager security role.', 'Publish the Contact form.', 'Republish the canvas app from Power Apps studio.', 'Add the Contact Read privilege to the Contact Manager security role.', and 'Add the Canvas App Read privilege to the Contact Manager security role.' The bottom dropdown for the second issue contains: 'Add the Canvas App Read privilege to the Basic User security role.', 'Republish the Contact form.', 'Share the canvas app with the users.', 'Republish the canvas app from Power Apps studio.', and 'Add the Canvas App Read privilege to the Basic User security role.' The last option in each dropdown is highlighted in blue.

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

The screenshot shows a Microsoft interface for generating content. On the left, under 'Answer Area', there are two 'Issue' sections. The first issue is 'Users assigned to the Contact Manager security role cannot view the embedded canvas app.' The second issue is 'Some users assigned to the Basic User security role cannot view the embedded canvas app.' To the right, under 'Resolution', there are two dropdown menus. The bottom dropdown for the second issue contains: 'Add the Canvas App Read privilege to the Basic User security role.' and 'Add the Contact Read privilege to the Contact Manager security role.' The last option in each dropdown is highlighted in blue.

## NEW QUESTION # 161

You are working with a customer to plan a go-live deployment to their production environment. The solution includes several apps and environment variables. The superuser team manages the production environment that is secured by using a specific environment Azure AD security group.

The following issues have been identified:

- \* The super user team cannot access make.powerapps.com to open and set the environment variables.
- \* Users are added to the environment Azure AD security group and are not able to access the model-driven app.
- \* Users are added to the environment Azure AD security group and are not able to access the canvas app.

You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft interface for generating content. On the left, under 'Answer Area', there are three 'Issue' sections. The first issue is 'The superuser team cannot set the environment variables.' The second issue is 'Users cannot access the model-driven app.' The third issue is 'Users cannot access the canvas app.' To the right, under 'Resolution', there are three dropdown menus. The top dropdown for the first issue contains: 'Assign the System Customizer role.', 'Assign the System Customizer role.', 'Assign the Basic User role.', 'Assign the Service Reader role.', and 'Assign the Office Collaborator role.' The middle dropdown for the second issue contains: 'Assign the Basic User role.', 'Assign the Basic User role.', 'Assign the Service Reader role.', 'Assign the Office Collaborator role.', and 'Add the Azure AD Security Group.' The bottom dropdown for the third issue contains: 'Add users to an Azure AD Security Group.', 'Assign the System Customizer role.', 'Assign the Service Reader role.', 'Add users to the superuser team.', and 'Add users to an Azure AD Security Group.' The last option in each dropdown is highlighted in blue.

Answer:

Explanation:

Issue	Resolution
The superuser team cannot set the environment variables.	<ul style="list-style-type: none"><li>Assign the System Customizer role.</li><li>Assign the Basic User role.</li><li>Assign the Service Reader role.</li><li>Assign the Office Collaborator role.</li></ul>
Users cannot access the model-driven app.	<ul style="list-style-type: none"><li>Assign the Basic User role.</li><li>Assign the Service Reader role.</li><li>Assign the Office Collaborator role.</li><li>Add the Azure AD Security Group.</li></ul>
Users cannot access the canvas app.	<ul style="list-style-type: none"><li>Add users to an Azure AD Security Group.</li><li>Assign the System Customizer role.</li><li>Assign the Service Reader role.</li><li>Add users to the superuser team.</li></ul>

### Explanation:

Issue	Resolution
The superuser team cannot set the environment variables.	Assign the System Customizer role.
Users cannot access the model-driven app.	Assign the Basic User role.
Users cannot access the canvas app.	Add users to an Azure AD Security Group.

## NEW QUESTION # 162

As everybody knows, competitions appear ubiquitously in current society. In order to live a better live, people improve themselves by furthering their study, as well as increase their professional PL-600 skills. With so many methods can boost individual competitiveness, people may be confused, which can really bring them a glamorous work or brighter future? We are here to tell you that a PL-600 Certification definitely has everything to gain and nothing to lose for everyone.
