

# Google Certified Professional Data Engineer Exam Training Material - Professional-Data-Engineer Updated Torrent & Google Certified Professional Data Engineer Exam Reliable Practice

BONUS!!! Download part of ActualTestsQuiz Professional-Data-Engineer dumps for free: <https://drive.google.com/open?id=1z-BU6oSkHqpAleAOYA-7Rm9wYZ-vnvi>

If you are finding a study material to prepare your exam, our material will end your search. Our Professional-Data-Engineer exam torrent has a high quality that you can't expect. I think our Google Certified Professional Data Engineer Exam prep torrent will help you save much time, and you will have more free time to do what you like to do. I can guarantee that you will have no regrets about using our Professional-Data-Engineer Test Braindumps. When the time for action arrives, stop thinking and go in, try our Professional-Data-Engineer exam torrent, you will find our products will be a very good choice for you to pass your exam and get your certificate in a short time.

## Understanding functional and technical aspects of Google Professional Data Engineer Exam Ensuring solution quality

The following will be discussed here:

- Mapping to current and future business requirements
- Ensuring scalability and efficiency
- Verification and monitoring
- Ensuring privacy (e.g., Data Loss Prevention API)
- Data security (encryption, key management)
- Legal compliance (e.g., Health Insurance Portability and Accountability Act (HIPAA), Children's Online Privacy Protection Act (COPPA), FedRAMP, General Data Protection Regulation (GDPR))
- Designing for data and application portability (e.g., multi-cloud, data residency requirements)
- Pipeline monitoring (e.g., Stackdriver)
- Ensuring flexibility and portability
- Identity and access management (e.g., Cloud IAM)

## High-quality Professional-Data-Engineer Latest Test Dumps & Effective Free Professional-Data-Engineer Dumps & Practical Professional-Data-Engineer Online Tests

The operation of our Professional-Data-Engineer exam torrent is very flexible and smooth. Once you enter the interface and begin your practice on our windows software. You will easily find there are many useful small buttons to assist your learning. The correct answer of the Professional-Data-Engineer exam torrent is below every question, which helps you check your answers. We have checked all our answers. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the Professional-Data-Engineer Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.

Google Professional-Data-Engineer Certification is a popular certification for professionals in the field of data engineering. Google Certified Professional Data Engineer Exam certification is offered by Google Cloud and is designed to test the knowledge of professionals in designing and building data processing systems, as well as their ability to analyze and use machine learning models. Google Certified Professional Data Engineer Exam certification is gaining popularity among professionals who want to validate their skills and knowledge in this field.

### Google Certified Professional Data Engineer Exam Sample Questions (Q190-Q195):

#### NEW QUESTION # 190

Which role must be assigned to a service account used by the virtual machines in a Dataproc cluster so they can execute jobs?

- A. Dataproc Viewer
- B. Dataproc Runner
- C. Dataproc Worker
- D. Dataproc Editor

**Answer: C**

Explanation:

Service accounts used with Cloud Dataproc must have Dataproc/Dataproc Worker role (or have all the permissions granted by Dataproc Worker role).

Reference: [https://cloud.google.com/dataproc/docs/concepts/service-accounts#important\\_notes](https://cloud.google.com/dataproc/docs/concepts/service-accounts#important_notes)

#### NEW QUESTION # 191

Suppose you have a table that includes a nested column called "city" inside a column called "person", but when you try to submit the following query in BigQuery, it gives you an error.

```
SELECT person FROM `project1.example.table1` WHERE city = "London"
```

How would you correct the error?

- A. Change "person" to "person.city".
- B. Add ", UNNEST(person)" before the WHERE clause.
- C. Change "person" to "city.person".
- D. Add ", UNNEST(city)" before the WHERE clause.

**Answer: B**

Explanation:

Explanation

To access the person.city column, you need to "UNNEST(person)" and JOIN it to table1 using a comma.

Reference:

[https://cloud.google.com/bigquery/docs/reference/standard-sql/migrating-from-legacy-sql#nested\\_repeated\\_resu](https://cloud.google.com/bigquery/docs/reference/standard-sql/migrating-from-legacy-sql#nested_repeated_resu)

### NEW QUESTION # 192

Google Cloud Bigtable indexes a single value in each row. This value is called the \_\_\_\_\_.

- A. master key
- B. primary key
- C. row key
- D. unique key

**Answer: C**

Explanation:

Cloud Bigtable is a sparsely populated table that can scale to billions of rows and thousands of columns, allowing you to store terabytes or even petabytes of data. A single value in each row is indexed; this value is known as the row key.

Reference: <https://cloud.google.com/bigtable/docs/overview>

### NEW QUESTION # 193

You are designing storage for two relational tables that are part of a 10-TB database on Google Cloud. You want to support transactions that scale horizontally. You also want to optimize data for range queries on nonkey columns. What should you do?

- A. Use Cloud SQL for storage. Use Cloud Dataflow to transform data to support query patterns.
- B. Use Cloud Spanner for storage. Add secondary indexes to support query patterns.
- C. Use Cloud Spanner for storage. Use Cloud Dataflow to transform data to support query patterns.
- D. Use Cloud SQL for storage. Add secondary indexes to support query patterns.

**Answer: C**

### NEW QUESTION # 194

You work for an airline and you need to store weather data in a BigQuery table. Weather data will be used as input to a machine learning model. The model only uses the last 30 days of weather data. You want to avoid storing unnecessary data and minimize costs. What should you do?

- A. Create a BigQuery table where each record has an ingestion timestamp. Run a scheduled query to delete all the rows with an ingestion timestamp older than 30 days.
- B. Create a BigQuery table partitioned by ingestion time. Set up partition expiration to 30 days.
- C. Create a BigQuery table with a datetime column for the day the weather data refers to. Run a scheduled query to delete rows with a datetime value older than 30 days.
- D. Create a BigQuery table partitioned by datetime value of the weather date. Set up partition expiration to 30 days.

**Answer: B**

Explanation:

Partitioning a table by ingestion time means that the data is divided into partitions based on the time when the data was loaded into the table. This allows you to delete or archive old data by setting a partition expiration policy. You can specify the number of days to keep the data in each partition, and BigQuery automatically deletes the data when it expires. This way, you can avoid storing unnecessary data and minimize costs.
