

2V0-11.25 Valid Test Materials, 2V0-11.25 Exam Paper Pdf

P.S. Free & New 2V0-11.25 dumps are available on Google Drive shared by Prep4sureExam: <https://drive.google.com/open?id=16AUEBQDdX0jIf04v2hBnVNfG-0RubEOw>

After using our 2V0-11.25 learning materials, you will find that things that have been difficult before have become simple. Of course, that's because you are better. Opportunities are for those who are prepared. And our 2V0-11.25 exam questions are the right tool to help you get prepared. With the most up-to-date knowledge and information of the 2V0-11.25 Practice Braindumps, you can be capable to deal with all of the conditions in your job. Believe it, good people will be better!

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 2	<ul style="list-style-type: none">• VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.

Topic 3	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 4	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network storage design.
Topic 5	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

2V0-11.25 Exam Paper Pdf | 2V0-11.25 Practice Exam Pdf

Any questions related with our 2V0-11.25 study prep will be responded as soon as possible, and we take good care of each exam candidates' purchase order, sending the updates for you and solve your questions on our 2V0-11.25 exam materials 24/7 with patience and enthusiasm. So do not capitulate to difficulties, because we will resolve your problems of the 2V0-11.25 Training Materials. You will get the most useful help form our service on the 2V0-11.25 training guide.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q69-Q74):

NEW QUESTION # 69

When commissioning new hosts in VMware Cloud Foundation, which three parameters must be provided?
(Choose three.)

- A. Hardware Type
- B. SSO Domain Name
- C. ESXi Version
- D. Network Pool Name
- E. Username
- F. Storage Type

Answer: B,E,F

Explanation:

Storage Type: The storage type needs to be specified during the commissioning of new hosts in VMware Cloud Foundation, as it is important for the configuration of storage resources for the hosts.

SSO Domain Name: The Single Sign-On (SSO) domain is an essential parameter to associate the hosts with the existing authentication domain.

Username: The administrator needs to provide a username with appropriate permissions to configure the hosts during the commissioning process.

NEW QUESTION # 70

What is the primary benefit of using HCX Replication Assisted vMotion (RAV) for VM migration?

- A. It performs a test migration to ensure compatibility.
- B. It requires no configuration changes to the VM(s) within the destination environment.
- C. It provides the fastest migration method by powering off the VM(s) before initiating the migration.
- **D. It ensures zero downtime to the VM(s).**

Answer: D

Explanation:

According to the VMware HCX User Guide and the VMware Cloud Foundation 5.2 Documentation, HCX Replication Assisted vMotion (RAV) is designed to provide a seamless migration of VMs across environments with no downtime to the workload.

Exact Extract from the VMware HCX User Guide:

"HCX Replication Assisted vMotion (RAV) provides zero-downtime migration for virtual machines, combining the benefits of vMotion with replication technologies. This allows VMs to continue running without disruption during the migration process, ensuring uninterrupted service for business-critical workloads." (VMware HCX User Guide - VM Mobility Methods) Why Not the Other Options?

A: RAV does not eliminate all configuration changes; network and other settings may still need updates depending on environments.

B: RAV does not perform a test migration; test migration is a feature of other migration methods.

D: RAV is not a cold migration method; it avoids powering off the VMs and maintains their availability throughout.

Summary:

The primary benefit of using HCX Replication Assisted vMotion (RAV) for VM migration is that it ensures zero downtime to the VM(s) (C), as stated in the official VMware documentation.

NEW QUESTION # 71

An administrator needs to create a custom role in vCenter Server that is part of VMware Cloud Foundation environment to grant specific privileges to a group of users.

Which two actions should be taken to create this custom role? (Choose two.)

- A. Assign permissions to the custom role before adding privileges.
- B. Clone an existing role in SDDC Manager to create the custom role.
- **C. Choose the privileges required for the custom role.**
- D. Apply the custom role to the root of the vCenter Server inventory.
- **E. Navigate to the Roles section in the vSphere Client.**

Answer: C,E

Explanation:

When creating a custom role, it is essential to choose the appropriate privileges that the role will require.

These privileges define what actions the users in the role can perform.

To create and manage roles, you need to navigate to the "Roles" section in the vSphere Client. This is where roles are defined and assigned within the vCenter Server.

NEW QUESTION # 72

An organization has 3 data center sites and is implementing a solution to achieve a Recovery Point Objective (RPO) of 0 to ensure continuous availability of storage in the event of a single site failure. The sites are connected via a high bandwidth/low latency link.

Which two VMware Cloud Foundation (VCF) components can be used to support this capability? (Choose two.)

- A. NSX
- B. Aria Operations
- C. vSphere Replication
- **D. vSAN**
- **E. vSphere**

Answer: D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To achieve an RPO of 0 (zero data loss) with continuous availability of storage across multiple sites, VMware Cloud Foundation leverages two key components:

vSphere (A): vSphere provides the core platform for compute virtualization, including features such as VMware vSphere HA (High

Availability) and VMware vSphere Fault Tolerance, both of which are integral to delivering continuous VM availability and supporting cross-site failover.

vSAN (E): vSAN can be configured in a stretched cluster deployment across the three sites. With a stretched vSAN cluster, data is synchronously replicated between sites, ensuring that all writes are committed to more than one location. This synchronous replication provides true continuous availability and a Recovery Point Objective (RPO) of 0 in the event of a single site failure, provided that the network meets high bandwidth and low latency requirements.

Other components such as Aria Operations and NSX do not provide storage-level availability or synchronous data protection. vSphere Replication only supports asynchronous replication and cannot guarantee RPO of 0.

NEW QUESTION # 73

An administrator needs to ensure that their VMware Cloud Foundation-based private cloud solution can support multi-tenancy for different departments within their organization.

What two configurations and components are necessary to achieve this? (Choose two.)

- A. Use NSX to create isolated network segments for each tenant.
- B. Configure vSAN storage policies for each department.
- C. Deploy Aria Automation to enable self-service provisioning for tenants.
- D. Use vSphere Resource Pools to allocate resources to different departments.

Answer: A,D

Explanation:

vSphere Resource Pools allow for the allocation of CPU, memory, and storage resources to different departments (tenants) within the VMware Cloud Foundation environment. This ensures that each department has its own dedicated resources, preventing resource contention between them.

NSX can be used to create isolated network segments (logical networks) for each tenant, ensuring network security and segmentation between departments. Each department can have its own isolated network environment.

NEW QUESTION # 74

.....

Are you planning to attempt the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam of the 2V0-11.25 certification? The first hurdle you face while preparing for the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam is not finding the trusted brand of accurate and updated 2V0-11.25 exam questions. If you don't want to face this issue then you are at the trusted Prep4sureExam is offering actual and Latest 2V0-11.25 Exam Questions that ensure your success in the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) certification exam on your maiden attempt.
