ITIL 4 Managing Professional Transition Exam covers four modules: Create, Deliver and Support, Drive Stakeholder Value, High Velocity IT, and Direct, Plan and Improve. These modules cover a range of topics, including service management concepts, service value systems, service value chains, service performance, and continuous improvement. Passing the exam demonstrates that IT professionals have the skills and knowledge to effectively manage IT services in line with the ITIL 4 framework, and can help them advance their careers in the field of IT service management.

ITIL 4 Managing Professional Transition Exam is a challenging and comprehensive test that covers a broad range of topics related to IT service management. It tests the candidates' understanding of the ITIL 4 framework, including the four dimensions of service management, the service value system, and the service value chain. ITIL-4-Transition Exam also evaluates the candidates' ability to apply ITIL 4 concepts in real-world scenarios and their knowledge of the best practices for IT service management.

ITIL 4 Managing Professional Transition certification is an essential certification for IT professionals who want to upgrade their knowledge and skills in managing and supporting IT services. ITIL 4 Managing Professional Transition certification provides individuals with the latest ITIL 4 framework knowledge, including the best practices for managing and supporting IT services in a modern digital world. The ITIL 4 framework is designed to help organizations deliver high-quality IT services that meet the needs of their customers and stakeholders.

ITIL 4 Managing Professional Transition Sample Questions (Q76-Q81):

NEW QUESTION # 76

A good way to apply the ITIL guiding principle "keep it simple and practical" is to:

- A. Re-use nothing from the current state
- B. Understand that fast does not mean incomplete
- C. Communicate so that the audience will hear
- **D. Adopt a practice which is easy to follow**

Answer: D

Explanation:

Comprehensive Explanation:

The guiding principle Keep it simple and practical advises:

- * Use the minimum number of steps required.
- * Eliminate unnecessary complexity.
- * Choose simple, easy-to-follow solutions whenever possible.

Option C aligns directly with this: adopting a simple, easy-to-use practice reflects the core idea of keeping things simple and practical.

NEW QUESTION # 77

An organization supports the users of its services using a tiered structure. There are many specialists in the second- and third-line resolution teams who have worked for the organization for a long time. The organization is in the process of deploying many changes to services. This is likely to result in a large number of complex incidents. In addition, there are long backlogs of work for the second and third-line resolution teams to complete.

Which is the BEST approach or technique to resolve this situation?

- A. Machine learning
- B. An information model
- C. Service integration and management
- **D. Swarming**

Answer: D

NEW QUESTION # 78

Which high velocity IT objective considers an organization's ability to continue providing business services when disruptive events affect its digital products?

- A. Valuable investments
- B. Fast development
- C. Assured conformance
- **D. Resilient operations**

Answer: D

Explanation:

Explanation

Resilient operations is the high velocity IT objective that considers an organization's ability to continue providing business services when disruptive events affect its digital products. Resilient operations ensure the availability, reliability, and performance of the digital products and services, as well as the ability to recover quickly from failures and incidents. Resilient operations also involve proactive practices such as technical debt management, chaos engineering, and site reliability engineering, which aim to improve the quality and resilience of the digital solutions. NEW QUESTION # 79

An organization's lead times and the flow of tasks across value streams are being impacted because tasks often sit waiting in queues. Which technique can be used to overcome this challenge?

- A. Increasing batch sizes
- **B. Limiting work-in-progress**
- C. Clarifying definition of done'
- D. Introducing a push system

Answer: B

Explanation:

Explanation

Limiting work-in-progress (WIP) is a technique that involves setting a maximum number of tasks that can be in progress at any given stage of the workflow. This helps to reduce the amount of time that tasks spend waiting in queues, which improves the flow of work and reduces the lead time. Limiting WIP also encourages the team to focus on completing the tasks that are already started, rather than starting new ones, which improves the quality and value of the work. Limiting WIP is a key practice of Kanban, which is one of the methods covered in the ITIL 4 Managing Professional Transition module. References:

NEW QUESTION # 80

Which term is used to describe removing something that could have an effect on a service?

- A. A problem
- B. An incident
- **C. A change**
- D. An IT asset

Answer: C

Explanation:

Comprehensive Explanation:

ITIL defines Change as:

"The addition, modification, or removal of anything that could have a direct or indirect effect on services." Therefore, removing something that affects a service is classified as a change.

Thus, Option C is correct.

NEW QUESTION # 81

.....
