Therefore, if you really have some interests in our COF-C03 Study Materials, then trust our professionalism, we promise a full refund if you fail exam.

Snowflake SnowPro® Core Certification (COF-C03) Sample Questions (Q235-Q240):

NEW QUESTION # 235

What is the default File Format used in the COPY command if one is not specified?

- A. JSON
- **B. CSV**
- C. XML
- D. Parquet

Answer: B

Explanation:

The default file format for the COPY command in Snowflake, when not specified, is CSV (Comma-Separated Values). This format is widely used for data exchange because it is simple, easy to read, and supported by many data analysis tools.

NEW QUESTION # 236

When an object is created in Snowflake. who owns the object?

- A. The current active primary role
- B. The user's default role
- C. The public role
- D. The owner of the parent schema

Answer: A

Explanation:

In Snowflake, when an object is created, it is owned by the role that is currently active. This active role is the one that is being used to execute the creation command. Ownership implies full control over the object, including the ability to grant and revoke access privileges. This is specified in Snowflake's documentation under the topic of Access Control, which states that "the role in use at the time of object creation becomes the owner of the object." References:

Snowflake Documentation: Object Ownership

NEW QUESTION # 237

A user created a new worksheet within the Snowsight UI and wants to share this with teammates How can this worksheet be shared?

- A. Create a private Data Exchange so that any teammate can use the worksheet
- B. Create a database and grant all permissions to teammates
- C. Share the worksheet with teammates within Snowsight
- D. Create a zero-copy clone of the worksheet and grant permissions to teammates

Answer: C

Explanation:

Worksheets in Snowsight can be shared directly with other Snowflake users within the same account. This feature allows for collaboration and sharing of SQL queries or Python code, as well as other data manipulation tasks¹.

NEW QUESTION # 238

What tasks can an account administrator perform in the Data Exchange? (Select TWO).

- A. Approve and deny listing approval requests.
- B. Delete data categories.
- C. Add and remove members.
- D. Transfer ownership of a provider profile.
- E. Transfer listing ownership.

Answer: A,C

Explanation:

An account administrator in the Data Exchange can perform tasks such as adding and removing members and approving or denying listing approval requests. These tasks are part of managing the Data Exchange and ensuring that only authorized listings and members are part of it².

NEW QUESTION # 239

What does the Activity area of Snowsight allow users to do? (Select TWO).

- A. Access Snowflake Marketplace to find and integrate datasets.
- B. Explore each step of an executed query.
- C. Schedule automated data backups.
- D. Monitor queries executed by users in an account.
- E. Create and manage user roles and permissions.

Answer: B,D

Explanation:

The Activity area of Snowsight, Snowflake's web interface, allows users to perform several important tasks related to query management and performance analysis. Among the options provided, the correct ones are:

B . Explore each step of an executed query: Snowsight provides detailed insights into query execution, including the ability to explore the execution plan of a query. This helps users understand how a query was processed, identify performance bottlenecks, and optimize query performance.

C . Monitor queries executed by users in an account: The Activity area enables users to monitor the queries that have been executed by users within the Snowflake account. This includes viewing the history of queries, their execution times, resources consumed, and other relevant metrics.

These features are crucial for effective query performance tuning and ensuring efficient use of Snowflake's resources.
