問題 #38

A System Administrator of an advertising publishing company that uses Advertising Sales Management (ASM) is going through the migration from source org to target org.
During the migration, the System Administrator runs into an error related to permissions and licenses on the target org.
Which two reasons could have caused the error?
Choose 2 answers

- A. The source org does not have the required platform license definitions and add-on licenses.
- **B. The target org does not have the required platform license definitions and add-on licenses.**
- C. The target org does not have the necessary integration procedures and Data Raptors.
- **D. The System Administrator user profile on the target org does not have the required permission set licenses or add-on licenses.**

答案： B,D

解題說明：

Comprehensive and Detailed Explanation From Exact Extract:

Permission and license errors in migration typically arise because the target org lacks the required platform license definitions or add-on licenses, or because the admin user profile does not have the necessary permission set licenses assigned. The source org licenses don't impact target org migration errors, and missing integration procedures/Data Raptors usually cause functional issues but not license errors.

- **B. MediaCloudPlus Runtime**
- C. DocGenInd CME Runtime User
- D. DocGenInd CME Digital Experience User
