

EMC D-PVM-OE-01 Bootcamp | D-PVM-OE-01 PDF Dumps Free Download

BONUS!!! Download part of Exam-Killer D-PVM-OE-01 dumps for free: https://drive.google.com/open?id=1AVu_XgbAQ1sBUpW04Usvc_ESiD2dt6r9

Continuous improvement is a good thing. If you keep making progress and transcending yourself, you will harvest happiness and growth. The goal of our D-PVM-OE-01 latest exam guide is prompting you to challenge your limitations. People always complain that they do nothing perfectly. The fact is that they never insist on one thing and give up quickly. Our D-PVM-OE-01 Study Dumps will assist you to overcome your shortcomings and become a persistent person. Once you have made up your minds to change, come to purchase our D-PVM-OE-01 training practice.

EMC D-PVM-OE-01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">PowerMax Family Business Continuity Administration: This section of the exam measures the skills of Disaster Recovery Engineers and focuses on replication technologies used for business continuity. Candidates must perform SnapVX and Clone operations using Unisphere for PowerMax and understand Symmetrix Remote Data Facility (SRDF) replication. They must also execute SRDF operations using Unisphere and SYMCLI.
Topic 2	<ul style="list-style-type: none">PowerMax Family Storage Provisioning: This section of the exam measures the skills of Storage Administrators and covers the architecture, configurations, and management of the PowerMax family. Candidates must understand system models, port and device management, and provisioning methods using Unisphere for PowerMax. They are expected to perform service level-based provisioning and allocate storage through auto-provisioning groups. One key skill assessed is configuring storage using Unisphere for PowerMax.
Topic 3	<ul style="list-style-type: none">PowerMaxOS 10 Data Mobility: This section of the exam measures the skills of Data Migration Specialists and covers data mobility and migration features in PowerMaxOS 10. Candidates must understand the benefits of non-disruptive migration and be able to perform migrations using Unisphere for PowerMax. One key skill assessed is executing non-disruptive data migrations.

Topic 4	<ul style="list-style-type: none"> PowerMax Family Local and Remote Replication Concepts: This section of the exam measures the skills of Backup and Recovery Specialists and covers the features and functionalities of TimeFinder SnapVX. Candidates must differentiate between SnapVX snapshots and clones while understanding their role in data protection. One key skill assessed is comparing the use cases of snapshots and clones.
Topic 5	<ul style="list-style-type: none"> Solutions Enabler 10 Implementation: This section of the exam measures the skills of Infrastructure Engineers and focuses on the fundamentals of Solutions Enabler. Candidates must understand its installation, upgrade processes, gatekeeper management, and daemon functions across different platforms. One crucial skill tested is managing Solutions Enabler daemons.
Topic 6	<ul style="list-style-type: none"> PowerMax Family Monitoring and Workload Planning: This section of the exam measures the skills of Performance Analysts and focuses on monitoring storage environments and workload planning using Unisphere for PowerMax. Candidates must understand how to track performance metrics, detect issues, and optimize workloads to enhance storage efficiency. One key skill tested is monitoring storage health through Unisphere.
Topic 7	<ul style="list-style-type: none"> PowerMax Family Management in a Virtual Environment: This section of the exam measures the skills of Virtualization Engineers and evaluates the integration of PowerMax storage in virtualized environments. Candidates must understand VMware vSphere, the functionalities of Virtual Storage Integrator (VSI), and how to monitor virtualized workloads using Unisphere for PowerMax. One critical skill assessed is tracking virtual machine storage performance.

D-PVM-OE-01 Reliable Practice Questions & Actual D-PVM-OE-01 Test Answers

Windows computers support the desktop practice test software. Exam-Killer has a complete support team to fix issues of EMC D-PVM-OE-01 practice test software users. Exam-Killer practice tests (desktop and web-based) produce score report at the end of each attempt. So, that users get awareness of their Dell Technologies PowerMax Operate (D-PVM-OE-01) preparation status and remove their mistakes.

EMC Dell Technologies PowerMax Operate Sample Questions (Q59-Q64):

NEW QUESTION # 59

A Storage Group is serving host read/write I/O. The Storage Administrator started an MDM migration and ran a symdm sync -stop command, putting the migration in a CutoverNoSync migration state. Where does the customer data in the Storage Group reside?

- A. Only on the source array
- B. Only the target array
- C. On both the source and the target array

Answer: C

Explanation:

Step by Step Comprehensive Detailed Explanation:

In an MDM (Migration for Dell EMC) migration, data is moved from a source array to a target array. When the symdm sync -stop command is issued, it puts the migration into the CutoverNoSync state. This state signifies that:

* Synchronization Stopped: Active data synchronization between the source and target arrays has been stopped.

* Data on Both Arrays: However, the customer data still resides on both the source and target arrays. This is because the CutoverNoSync state is a transitional state that allows for a controlled cutover to the target array.

The next step would typically involve a cutover operation, where host access is switched to the target array, and the source array is removed from the migration configuration.

Why other options are incorrect:

* A. Only the target array: While the goal is to eventually have the data only on the target, in the CutoverNoSync state, data still exists on both arrays.

* B. Only on the source array: Data has already been partially or fully copied to the target array during the migration process.

References and documents of Dell's public documentation for PowerMax Operate v.2:

* Dell Solutions Enabler 10.0.0 CLI User Guide: This guide provides detailed information about the symdm command and its various options, including the sync -stop command and the CutoverNoSync state. You can find this document on the Dell Support website by searching for "Solutions Enabler CLI User Guide."

* Dell PowerMax Family: Essentials and Best Practices Guide: This guide may offer general information about data migration and the different states involved in the process.

NEW QUESTION # 60

An administrator wants to check the status of the Solutions Enabler Base daemon in a management host.

What is the name of the Base daemon?

- A. storrvd
- **B. storapid**
- C. storstpd
- D. storrmld

Answer: B

NEW QUESTION # 61

Four snapshots of a single source volume have been created. The snapshots were created with the same name at 8:00 AM, 10:00 AM, 12:00 PM; and 2:00 PM.

What is the generation number of the snapshot created at 2:00 PM?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Step by Step Comprehensive Detailed Explanation:

In TimeFinder SnapVX, snapshots of a source volume are assigned generation numbers. These numbers indicate the order in which the snapshots were created. The first snapshot taken has a generation number of 0, the second has 1, and so on.

In this case, four snapshots were created at different times:

- * 8:00 AM (Generation 0)
- * 10:00 AM (Generation 1)
- * 12:00 PM (Generation 2)
- * 2:00 PM (Generation 3)

Therefore, the snapshot created at 2:00 PM has a generation number of 3.

References and documents of Dell's public documentation for PowerMax Operate v.2:

* Dell Solutions Enabler 10.0.0 TimeFinder SnapVX CLI User Guide: This guide provides detailed information about SnapVX features and functionalities, including how generation numbers are assigned to snapshots. You can find this document on the Dell Support website by searching for "Solutions Enabler TimeFinder SnapVX CLI User Guide."

NEW QUESTION # 62

A PowerMax systems administrator has created three storage groups with the diamond, gold, and silver service levels. How does the system ensure the service level response times are met during heavy workloads?

- A. Service levels are identical on All Flash systems
- B. By allocating more device cache slots to Diamond
- C. By throttling the back-end IOs
- **D. By throttling the host front-end IOs**

Answer: D

NEW QUESTION # 63

An administrator is using Unisphere for PowerMax Workload Planner to assess the performance and compliance of a PowerMax Storage Group (SG).

How does the Planner calculate if the Storage Group workload is fully compliant?

- A. Weighted SG average response time for the past 8 hours and past one week
- B. Weighted SG average response time for the past 4 hours and past one week
- C. Weighted SG average response time for the past 4 hours and past two weeks
- D. Weighted SG average response times for the past 30 minutes

Answer: C

NEW QUESTION # 64

Buying any product should choose a trustworthy company. Our Exam-Killer can give you the promise of the highest pass rate of D-PVM-OE-01 exam; we can give you a promise to try our D-PVM-OE-01 software for free, and the promise of free updates within a year after purchase. To resolve your doubts, we assure you that if you regrettably fail the D-PVM-OE-01 Exam, we will full refund all the cost you buy our study materials. Exam-Killer is your best partners in your preparation for D-PVM-OE-01 exam.
