

Latest FCSS_SDW_AR-7.4 Exam Dump Must Be a Great Beginning to Prepare for Your FCSS_SDW_AR-7.4 Exam

2026 Latest DumpsQuestion FCSS_SDW_AR-7.4 PDF Dumps and FCSS_SDW_AR-7.4 Exam Engine Free Share:
https://drive.google.com/open?id=1UDgcjs9qVHTSxD_vS1-jLoOpLlz3Vbum

In case there are any changes happened to the FCSS_SDW_AR-7.4 exam, the experts keep close eyes on trends of it and compile new updates constantly so that our FCSS_SDW_AR-7.4 exam questions always contain the latest information. It means we will provide the new updates of our FCSS_SDW_AR-7.4 Study Materials freely for you later since you can enjoy free updates for one year after purchase. And you can free download the demos to check it by yourself.

Fortinet FCSS_SDW_AR-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Configure Performances SLAs: Designed for network administrators, this part focuses on setting up performance Service Level Agreements (SLAs) within SD-WAN environments. Candidates must show proficiency in defining criteria to monitor and maintain network performance and reliability.
Topic 2	<ul style="list-style-type: none"> Rules and Routing: Targeted at network engineers, this section assesses the ability to configure SD-WAN rules and routing policies. Candidates will be tested on managing traffic flow and prioritization across the SD-WAN infrastructure.
Topic 3	<ul style="list-style-type: none"> SD-WAN Troubleshooting: This part assesses the troubleshooting skills of network support specialists. Candidates should be able to diagnose and resolve issues related to SD-WAN rules, session behaviors, routing inconsistencies, and ADVPN connectivity problems to maintain seamless network operations.

Marvelous Detailed FCSS_SDW_AR-7.4 Answers - Win Your Fortinet Certificate with Top Score

Take advantage of this golden opportunity, and download our FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) updated exam questions to grab the most prestigious credential in one go. DumpsQuestion has formulated the FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam dumps in these three user-friendly formats: FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) Web-Based Practice Test, Desktop Practice Exam Software, and FCSS_SDW_AR-7.4 questions PDF file. You will find the specifications of these formats below to understand them properly.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q40-Q45):

NEW QUESTION # 40

Refer to the exhibit.

Priority Rule

Name:

Status: Enabled Disabled

Source

User group:

Destination

Address:

Internet service:

Outgoing Interfaces

An administrator configures SD-WAN rules for a DIA setup using the FortiGate GUI. The page to configure the source and destination part of the rule looks as shown in the exhibit. The GUI page shows no option to configure an application as the destination of the SD-WAN rule. Why?

- A. You must enable the feature on the CLI.
- **B. You must enable the feature first using the GUI menu System > Feature Visibility.**
- C. FortiGate allows the configuration of applications as the destination of SD-WAN rules only on the CLI.
- D. You cannot use applications as the destination when FortiGate is used for a DIA setup.

Answer: B

NEW QUESTION # 41

Refer to the exhibit. You configure SD-WAN on a standalone FortiGate device. You want to create an SD-WAN rule that steers Facebook and LinkedIn traffic through the less costly internet link. The FortiGate GUI page appears as shown in the exhibit. What should you do to set Facebook and LinkedIn as destinations?

Settings Info

Name: Social_app

Status: Enabled Disabled

Source

Address: 4 LAN-net

User group:

Destination

Address:

Internet service:

Outgoing Interfaces

Interface selection strategy: Manual
Manually assign outgoing members.

- A. Install a license to allow applications as destinations of SD-WAN rules.
- **B. You cannot configure applications as destinations of an SD-WAN rule on a standalone FortiGate device.**

- C. Enable the applications as destinations of the SD-WAN rule feature visibility.
- **D. In the Internet service field, select Facebook and LinkedIn.**

Answer: D

Explanation:

In an SD-WAN rule, you can steer application traffic by using Internet Service Database (ISDB) entries. Facebook and LinkedIn are predefined ISDB objects in FortiGate, so the correct way is to select them in the Internet service field under Destination. This ensures that all traffic to these applications is matched and routed through the chosen (less costly) link.

NEW QUESTION # 42

Refer to the exhibits.

SD-WAN service details

```
branch1_fgt # diagnose sys sdwan service4

Service(1): Address Mode(IPV4) flags=0x4200 use-shortcut-sla use-shortcut

	Interface	port2

An administrator is testing application steering in SD-WAN. Before generating test traffic, the administrator collected the information shown in the first exhibit. After generating GoToMeeting test traffic, the administrator examined the corresponding traffic log on FortiAnalyzer, which is shown in the second exhibit.

The administrator noticed that the traffic matched the implicit SD-WAN rule, but they expected the traffic to match rule ID 1.

Which two reasons explain why some log messages show that the traffic matched the implicit SD-WAN rule?

(Choose two.)

- A. FortiGate could not refresh the routing information on the session after the application was detected.

- B. Full SSL inspection is not enabled on the matching firewall policy.
- C. No configured SD-WAN rule matches the traffic related to the collaboration application GoToMeeting
- D. The session 3-tuple did not match any of the existing entries in the ISDB application cache.

Answer: C,D

NEW QUESTION # 43

When you use the command `diagnose sys session list`, how do you identify the sessions that correspond to traffic steered according to SD-WAN rules?

- A. You identify sessions steered according to SD-WAN rules with the data `sdwan_service_id`.
- B. You identify sessions steered according to SD-WAN rules with the data `vwl_mbr_seq`.
- C. You identify sessions steered according to SD-WAN rules with the flag `vwl`.
- D. You cannot identify SD-WAN sessions. You must use the `sdwar.session` filter.

Answer: A

NEW QUESTION # 44

Refer to the exhibits.

Network Properties	
Service	Critical-DIA
Identity	
Device ID	FGVM01TM22000077
Device Name	branch1_fgt
Type	
Sub Type	sdwan
Type	event
Alerts	
Level	notice

SD-WAN member status

```
branch1_fgt # diagnose sys sdwan member
Member(1): transport-group: 0, interface: port1, flags=0x0,
gateway: 192.2.0.2, source 192.2.0.1, priority: 1 1024, weight: 0
Member(2): transport-group: 0, interface: port2, flags=0x0,
gateway: 192.2.0.10, source 192.2.0.9, priority: 10 1024, weight: 0
```

SD-WAN rule configuration

```
config service
  edit 1
    set name "Critical-DIA"
    set mode priority
    set src "LAN-net"
    set internet-service enable
    set internet-service-app-ctrl 41469 16920
    set internet-service-app-ctrl-category 28
    set health-check "Corp_HC"
    set priority-members 1 2
  next
end
```

The exhibits show an SD-WAN event log, the member status, and the SD-WAN rule configuration. Which two conclusions can you draw from the information shown? (Choose two.)

- A. Port2 has a lower latency than port1.
- B. The administrator configured the SD-WAN rule ID 1 with the default strategy mode.
- C. The administrator configured the service ID 1 with the highest priority member for port2.
- D. FortiGate updated the outgoing interface list on the rule so it prefers port2.

Answer: A,D

Explanation:

The SD-WAN rule (config service edit 1) is configured with set mode priority. This means the rule selects the best interface based on a defined performance metric, as opposed to a simple static priority or SLA. The event log (image_41cfb5.png) shows Metric latency and Message Service prioritized by performance metric will be redirected in sequence order. This indicates that the rule is using latency to determine the preferred member.

Given that the log message is about a change, and the most logical reason for a change in a priority mode is that a different member is now the best performer, it implies that the latency on port2 has become lower than that on port1.

The log message Service prioritized by performance metric will be redirected in sequence order confirms that FortiGate is changing the member being used for this service. Because the mode is priority, FortiGate dynamically selects the member that currently meets the best performance criteria, which in this case is latency. The log implies a new member has been selected as the most optimal, and with the default configuration, the members are sorted based on their performance, so the outgoing interface list is effectively updated to prefer the new best-performing member (port2).

NEW QUESTION # 45

.....

The FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) certification examination is an essential component of professional development, and passing this Fortinet FCSS_SDW_AR-7.4 test can increase career options and a rise in salary. Nonetheless, getting ready for the Prepare for your FCSS_SDW_AR-7.4 Exam may be difficult, and many working professionals have trouble locating the FCSS_SDW_AR-7.4 practice questions they need to succeed in this endeavor.
