The EC-Council Certified Network Defender (CND) certification exam is designed to assess the candidate's ability to identify and mitigate network vulnerabilities, design and implement network security policies, and respond to network security incidents. 312-38 Exam consists of 100 multiple-choice questions, and the candidate is given four hours to complete the exam. 312-38 exam is available in multiple languages, including English, Spanish, French, German, and Chinese.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which of the following phases is the first step towards creating a business continuity plan?

- A. Business Impact Assessment
- B. Business Continuity Plan Development
- **C. Scope and Plan Initiation**
- D. Plan Approval and Implementation

Answer: C

NEW QUESTION # 33

Which of the following is a non-profit organization that oversees the allocation of IP addresses, management of the DNS infrastructure, protocol parameter assignment, and root server system management?

- A. IEEE
- B. ITU
- **C. ICANN**
- D. ANSI

Answer: C

NEW QUESTION # 34

Harry has sued the company claiming they made his personal information public on a social networking site in the United States. The company denies the allegations and consulted a/an _____ for legal advice to defend them against this allegation.

- **A. Attorney**
- B. PR Specialist
- C. Evidence Manager
- D. Incident Handler

Answer: A

NEW QUESTION # 35

Which of the following examines Recovery Point Objectives (RPOs) and Recovery Time Objectives (RTOs) for a disaster recovery strategy?

- A. Risk Management
- **B. Business Impact Analysis**
- C. Business Continuity Plan

- D. Risk Assessment

Answer: B

Explanation:

Business Impact Analysis (BIA) is the process that determines the potential impacts of business function disruptions and gathers information needed to develop recovery strategies. A critical part of BIA is examining Recovery Point Objectives (RPOs) and Recovery Time Objectives (RTOs) for a disaster recovery strategy. RPOs define the maximum age of files that must be recovered from backup storage for normal operations to resume after a disaster, while RTOs specify the maximum amount of time that a resource can remain unavailable after a disaster.

NEW QUESTION # 36

Which of the following is the primary international body for fostering cooperative standards for telecommunications equipment and systems?

- A. IEEE
- **B. CCITT**
- C. ICANN
- D. NIST

Answer: B

Explanation:

CCITT is the primary international body for fostering cooperative standards for telecommunications equipment and systems. It is now known as the ITU-T (for Telecommunication Standardization Sector of the International Telecommunications Union). The ITU-T mission is to ensure the efficient and timely production of standards covering all fields of telecommunications on a worldwide basis, as well as defining tariff and accounting principles for international telecommunication services.

Answer option A is incorrect. Internet Corporation for Assigned Names and Numbers (ICANN) is a non-profit organization that oversees the allocation of IP addresses, management of the DNS infrastructure, protocol parameter assignment, and root server system management.

Answer option B is incorrect. The Institute of Electrical and Electronic Engineers (IEEE) is a society of technical professionals. It promotes the development and application of electro-technology and allied sciences. IEEE develops communications and network standards, among other activities. The organization publishes number of journals, has many local chapters, and societies in specialized areas.

Answer option C is incorrect. The National Institute of Standards and Technology (NIST), known between 1901 and 1988 as the National Bureau of Standards (NBS), is a measurement standards laboratory which is a non-regulatory agency of the United States Department of Commerce. The institute's official mission is as follows:

To promote U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve quality of life.

NIST had an operating budget for fiscal year 2007 (October 1, 2006–September 30, 2007) of about \$843.3 million. NIST's 2009 budget was \$992 million, but it also received \$610 million as part of the American Recovery and Reinvestment Act. NIST employs about 2,900 scientists, engineers, technicians, and support and administrative personnel. About 1,800 NIST associates (guest researchers and engineers from American companies and foreign nations) complement the staff. In addition, NIST partners with 1,400 manufacturing specialists and staff at nearly 350 affiliated centers around the country.
