

VMware Cloud Foundation 9.0 Administrator Accurate Questions & 2V0-17.25 Training Material & VMware Cloud Foundation 9.0 Administrator Study Torrent

BONUS!!! Download part of DumpsKing 2V0-17.25 dumps for free: <https://drive.google.com/open?id=1hKBIFsQC0JVs8EwwFPTQdUNBps3SF>

Our 2V0-17.25 training materials have been honored as the panacea for the candidates for the exam since all of the contents in the 2V0-17.25 guide quiz are the essences of the exam. There are detailed explanations for some difficult questions in our 2V0-17.25 exam practice. Consequently, with the help of our 2V0-17.25 Study Materials, you can be confident that you will pass the exam and get the related certification as easy as rolling off a log. So what are you waiting for? Just take immediate actions!

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 2	Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.
Topic 3	IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.

Topic 4	VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.

2V0-17.25 Latest Exam Questions - Pass Guaranteed 2026 First-grade 2V0-17.25: Reliable VMware Cloud Foundation 9.0 Administrator Test Braindumps

If you want to buy our 2V0-17.25 training engine, you must ensure that you have credit card. We do not support deposit card and debit card to pay for the 2V0-17.25 exam questions. Also, the system will deduct the relevant money. If you find that you need to pay extra money for the 2V0-17.25 Study Materials, please check whether you choose extra products or there is intellectual property tax. All in all, you will receive our 2V0-17.25 learning guide via email in a few minutes.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

An administrator has a requirement to share the contents of a Content Library across multiple vCenter instances. What steps should the administrator perform to meet this requirement?

- A. Create a Subscribed content library on each vCenter instance and enable publishing
- B. Create a Subscribed content library on a single vCenter instance and perform a synchronization
- C. Create a Local content library on a single vCenter instance and enable publishing
- D. Create a Local content library on each vCenter instance and perform a synchronization

Answer: C

Explanation:

To share the contents of a Content Library across multiple vCenter instances, you need to create a Local content library on one vCenter instance and enable publishing. This allows the library to be accessible by other vCenter instances, where they can subscribe to it, ensuring the content is shared.

NEW QUESTION # 23

An administrator is tasked with ensuring the security of network traffic during the migration of virtual machines (VMs) to prevent any potential interception or tampering of data.

What specific feature or configuration should the administrator enable to safeguard the integrity and confidentiality of the network traffic involved in VM migration?

- A. vSphere Distributed Resource Scheduler
- B. Virtual Machine Encryption
- C. vSphere High Availability (HA)
- D. Encrypted vSphere vMotion

Answer: D

Explanation:

Enabling Encrypted vSphere vMotion encrypts the vMotion network traffic, ensuring the confidentiality and integrity of data as it travels between hosts.

NEW QUESTION # 24

An administrator must deploy a new VCF instance in a dark site (no Internet). How should binaries be downloaded before starting installation?

- A. Use the VCF Download Tool.
- B. Use SDDC Manager.
- C. Use Broadcom Downloads.
- D. Use the VCF Installer.

Answer: A

Explanation:

For environments without Internet access, use the VCF Download Tool on a connected machine to download required bundles and transfer them to the air-gapped VCF environment.

NEW QUESTION # 25

Which networking or security features within NSX might help enhance a vSphere environment?

- A. Micro-segmentation
- B. Distributed Firewall
- C. Logical switching and routing
- D. Memory compression

Answer: A,B,C

Explanation:

NSX provides micro-segmentation, a distributed firewall, and logical routing/switching capabilities to enhance security and networking. Memory compression (C) is a host-level feature unrelated to NSX.

NEW QUESTION # 26

What prerequisite must an administrator complete in VCF before configuring Provider Networking in VCF Automation?

- A. Create a T0 Gateway in NSX Manager.
- B. Create a vDS in vCenter.
- C. Create a T0 Gateway in the Organization.
- D. Create a vDS in Provider Management.

Answer: A

Explanation:

The VCF Automation Provider Networking Guide states:

"Before you can configure Provider Networking, an active Tier-0 (T0) Gateway must be created in NSX Manager and associated with the Provider region." This gateway provides external routing and forms the foundation for VPC and tenant networking. Creating a T0 at the Organization level (A) is not correct-organizations consume Provider networking but do not create T0s. vDS in Provider Management (C) or vCenter (D) is unrelated to NSX-based provider networking.

Thus, the required prerequisite is: Create a T0 Gateway in NSX Manager.

NEW QUESTION # 27

.....

It is the right time to advance your professional career. You can do this easily after passing the VMware Cloud Foundation 9.0 Administrator 2V0-17.25 certification exam. To pass the VMware 2V0-17.25 exam the VMware 2V0-17.25 Exam Practice test questions are the right choice. The updated and real VMware Dumps are ready for download. Just download and start preparation.
