HPE Hybrid Cloud Solutions Sample Questions (Q49-Q54):

NEW QUESTION # 49

An HPE ProLiant DL380 Gen10 Plus server had a power supply issue, and it failed to alert the customer and create a case With HPE support.

What additional step is required to activate this feature?

- A. Apply the iLO 5 Advanced License
- B. Enable the Remote Console within iLO 5
- **C. Connect the server to an HPE Remote Support Host Server**
- D. Add the server to the existing iLO 5 Federation

Answer: C

Explanation:

This is because HPE Remote Support is a service that provides proactive and reactive support for HPE servers, storage, and networking products. It enables automatic fault detection and diagnosis, remote troubleshooting, and case creation and management. To use this service, the server must be connected to an HPE Remote Support Host Server, which is a server that runs the HPE Remote Support software and communicates with the HPE Support Center

NEW QUESTION # 50

Your customer is looking for a reference architecture from HPE.

Which tool can translate their requirements a validated configuration?

- A. One Config Simple (OCS)
- B. HPE storage STaTS TOOI
- C. one config Advanced (OCA)
- **D. solution sales Enablement TOOI (SSET)**

Answer: D

Explanation:

Solution Sales Enablement Tool (SSET) is a tool that helps you design and validate HPE solutions based on reference architectures. The SSET can translate customer requirements into a validated configuration that meets their needs and budget. The SSET can also generate a bill of materials, a quote, and a proposal for the solution.

NEW QUESTION # 51

Match the RAID level to the number of drive failures an array can handle without losing data. (Each option may be used once, more than once, or not at all.)

Answer:

Explanation:

NEW QUESTION # 52

Your customer IS interested in the new MSA storage array and asks for a demo of the features and monitoring capabilities. Which tool should you use?

- A. HPE StoreServ Management console (SSMC)
- B. HPE Data services Cloud console (DSCC)
- C. HPE InfoSight
- **D. HPE Storage Management Utility (SMU)**

Answer: D

Explanation:

According to HPE, SMU is a web-based interface that enables you to configure, monitor, and manage storage devices. It also provides performance monitoring and reporting for HPE MSA storage arrays. With SMU, you can demonstrate the features and monitoring capabilities of the new MSA storage array to your customer.

NEW QUESTION # 53

Which of the following is a key feature of HPE Nimble Storage?

- A. Software-defined networking
- B. Containerization
- C. Serverless computing
- **D. Data deduplication**

Answer: D

Explanation:

Data deduplication is a technique used to reduce storage requirements by identifying and eliminating duplicate data. HPE Nimble Storage features data deduplication as a key feature, which can result in significant cost savings and improved storage efficiency.

NEW QUESTION # 54

.....

We even guarantee our customers that they will pass HP HPE0-V25 Exam easily with our provided study material and if they failed
