- B. A different certificate is assigned to each individual user account, and certificates are not shared.
- C. Change control processes are in place to ensure certificates are changed every 90 days.
- D. Certificates are logged so they can be retrieved when the employee leaves the company.

Answer: B

* Option A:#Incorrect. MFA must apply to all applicable users, not just admins.
* Option B:#Correct. This meets PCI DSS: unique credentials per user and non-shared certificates.
* Option C:#Incorrect. Retaining certificates post-employment is a risk, not a compliance action.
