

Reliable FCP_GCS_AD-7.6 Exam Sims, FCP_GCS_AD-7.6 Latest Test Format

P.S. Free & New FCP_GCS_AD-7.6 dumps are available on Google Drive shared by DumpsTests:
https://drive.google.com/open?id=1glUiShgi_cQ3zyWme0tJG7-qK_aUDSQq

Our FCP_GCS_AD-7.6 study materials have plenty of advantages. For example, in order to meet the needs of different groups of people, we provide customers with three different versions of FCP_GCS_AD-7.6 study materials, which contain the same questions and answers. You can choose the one that best suits you according to your study habits. Secondly, the passing rate of our FCP_GCS_AD-7.6 Study Materials is very high. Generally speaking, 98 % - 99 % of the users can successfully pass the exam, obtaining the corresponding certificate.

In the complicated and changeable information age, have you ever been tried hard to find the right training materials of FCP_GCS_AD-7.6 exam certification? We feel delighted for you to find DumpsTests, and more delighted to find the reliable FCP_GCS_AD-7.6 Exam Certification training materials. It will help you get your coveted FCP_GCS_AD-7.6 exam certification.

Updated Reliable FCP_GCS_AD-7.6 Exam Sims & Trustable FCP_GCS_AD-7.6 Latest Test Format & Hot Fortinet FCP - Google Cloud Security 7.6 Administrator

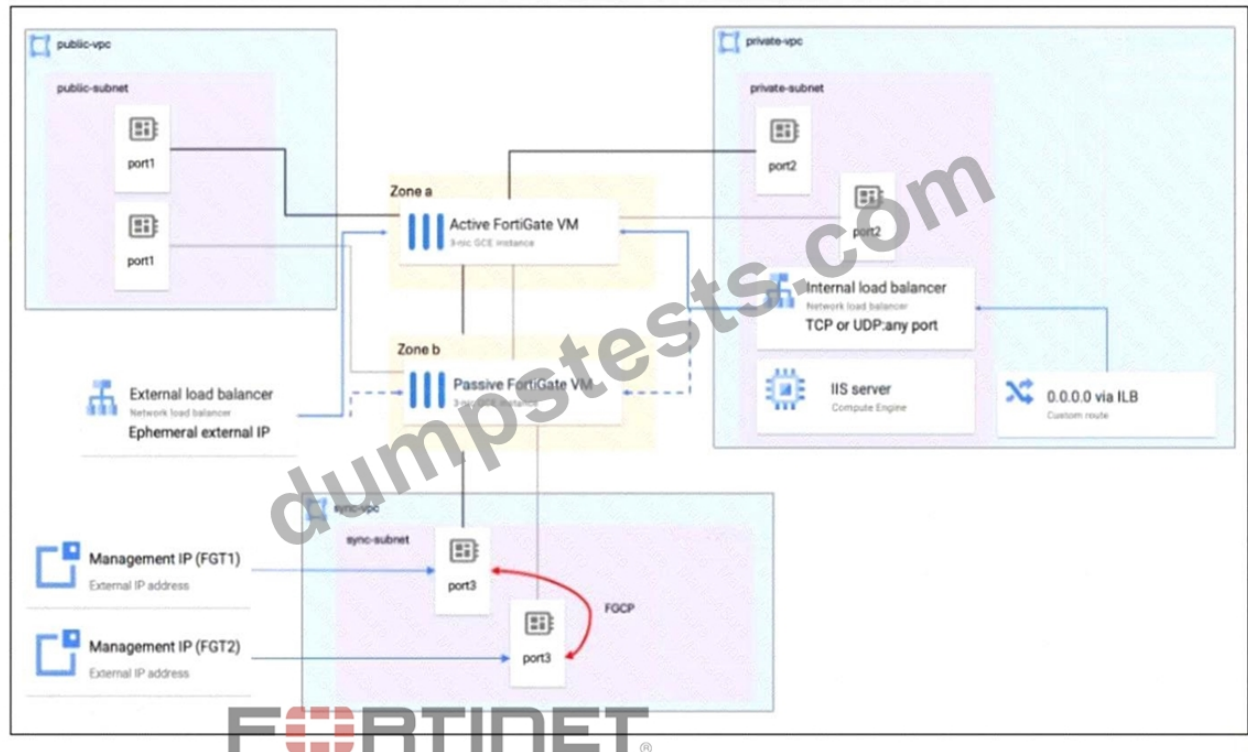

High efficiency service has won reputation for us among multitude of customers, so choosing our FCP_GCS_AD-7.6 real study dumps we guarantee that you won't be regret of your decision. Helping our candidates to pass the FCP_GCS_AD-7.6 exam and achieve their dream has always been our common ideal. We believe that your satisfactory on our FCP_GCS_AD-7.6 Exam Questions is the drive force for our company. Meanwhile, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful FCP_GCS_AD-7.6 real study dumps.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

Refer to the exhibit.

Active-passive HA environment

Which three things happen during a failover in which the passive FortiGate VM becomes the master cluster member in an active-passive high-availability (HA) environment? (Choose three.)

- A. The Management IP address moves from port3 of the current active member to port3 of the new active cluster member.
- B. The health check status will indicate that the old active cluster member is unhealthy.
- C. The health check for the passthrough load balancers forces internal traffic to route to port2 of the new active cluster member.
- D. The custom route is updated using API calls to forward all traffic to port2 of the new active cluster member device.
- E. The health check ensures that incoming traffic to the ephemeral external IP address of the load balancer is forwarded to the new active cluster member.

Answer: B,D,E

Explanation:

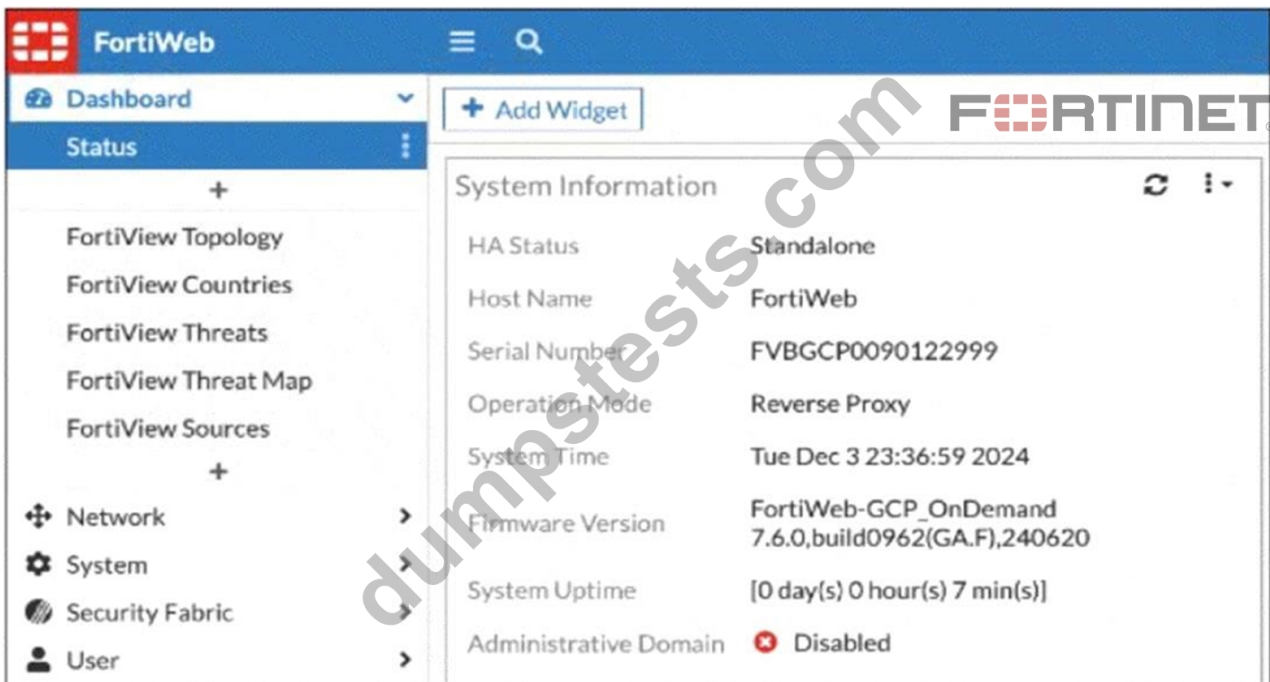

The load balancer health check detects the failure of the old active member and forwards traffic to the new active member.

The health check reflects the status change, marking the previous active as unhealthy.

API calls update custom routes to redirect traffic to the new active cluster member's internal interface (port2).

NEW QUESTION # 13

Refer to the exhibit.

Which two statements about FortiWeb instances deployed in Google Cloud are true?

- A. By default, you can access FortiWeb using HTTPS on port 443.
- B. You can change the operation mode of FortiWeb.
- C. You can deploy FortiWeb using pay-as-you-go or bring-your-own-license.
- D. You can configure the FortiWeb instance with only one network interface.

Answer: B,C

Explanation:

FortiWeb's operation mode can be changed, such as between reverse proxy and transparent modes, to suit different deployment scenarios.

FortiWeb in Google Cloud supports flexible licensing models, including pay-as-you-go and bring-your-own- license (BYOL).

NEW QUESTION # 14

Refer to the exhibit.

Diagnose output

```

passive # diagnose debug application gcpd -1
passive # diagnose debug enable

...

passive # HA event
eip cluster-ip-vpm(34.68.13.24) is attached in remote instance: us-central1-c/fgt-vpm, should be moved to local
[pid 9000]: failover eip: cluster-ip-vpm(34.68.13.24)
[pid 9000]: get nics info for instance fgt-vpm
[pid 9000]: get instance nic: nic0, 172.16.0.2, vpc-vpm, accessConfig(external-nat), eip(34.68.13.24), tier(PREMIUM)
[pid 9000]: get instance nic: nic1, 172.16.1.2, vpc2-vpm
[pid 9000]: get instance nic: nic2, 172.16.2.2, vpc3-vpm, accessConfig(external-nat), eip(34.66.4.139), tier(PREMIUM)
[pid 9000]: nic0 of instance fgt-vpm is using eip 34.68.13.24
[pid 9000]: remove eip 34.68.13.24 from instance fgt-vpm(nic0).
gcpd checking route: internal-route-vpm
failover route: internal-route-vpm, move next hop from 172.16.1.2 to 172.16.1.3
[pid 9004]: failover route: internal-route-vpm
[pid 9004]: remove route internal-route-vpm on next hop 172.16.1.2
gcpd checking forwardrule: fgt-forwarding-rule
failover forwardrule: fgt-forwarding-rule, move target from fgt-target-vpm to fgt-target2-vpm
[pid 9006]: failover forwardrule: fgt-forwarding-rule
[pid 9006]: set target forwardrule fgt-forwarding-rule point to target instance fgt-target2-vpm
[pid 9004]: route internal-route-vpm is updated to next hop 172.16.1.3 successfully.
[pid 9000]: attach eip 34.68.13.24 to instance fgt-2-vpm(nic0).
[pid 9000]: eip cluster-ip-vpm(34.68.13.24) is attached to local successfully.
[pid 9006]: forwardrule fgt-forwarding-rule is updated to next hop fgt-target2-vpm successfully.
==== gcpd ha failover exit ====

```

An administrator is troubleshooting an issue when a high-availability (HA) failover occurs.

Which conclusion can you draw from the debug output?

- A. Both cluster members are located in the same zone.
- **B. The health check has successfully updated the internal custom route to forward all internal traffic to 172.16.1.3.**
- C. The HA cluster is accessible using HTTPS on 34.68.13.24 and 34.66.4.139.
- D. The HA cluster is deployed using the software-defined network (SDN) connector.

Answer: B

Explanation:

The debug output shows the internal route being updated and moved to the new next hop (172.16.1.3), indicating the health check and failover process successfully redirected internal traffic to the active HA node.

NEW QUESTION # 15

A cloud administrator has been receiving reports of slow response times from users accessing their organization's web application, which is protected by FortiWeb Cloud.

Which two steps can be taken to potentially alleviate the problem? (Choose two.)

- A. Changing the DNS records to point to the web application.
- B. Adding additional passthrough load balancers.
- **C. Enabling the content delivery network (CDN).**
- **D. Deploying FortiWeb Cloud in the same region where the web application is hosted.**

Answer: C,D

Explanation:

Deploying FortiWeb Cloud closer to the web application reduces latency and improves response times.

Enabling CDN caches content closer to users, reducing load times and speeding up content delivery.

NEW QUESTION # 16

Refer to the exhibit.

The screenshot shows the Fortinet Route Management interface. It displays a table of routes with the following columns: Name, Description, IP version, Destination IP range, Priority, Scope limits, Next hop, and Network. A single route is listed with the name 'internal-to-internet', a priority of 1000, and a destination IP range of 0.0.0.0/0. The next hop is described as 'Forwarding rule of internal passthrough Network Load Balancer backend-lb-forwarding-rule' and the network is 'privatevpc'.

Name	Description	IP version	Destination IP range	Priority	Scope limits	Next hop	Network
internal-to-internet			0.0.0.0/0	1000	-	Forwarding rule of internal passthrough Network Load Balancer backend-lb-forwarding-rule	privatevpc

Which three conclusions can you draw from the Google Cloud custom route? (Choose three.)

- **A. The next hop must be updated manually in the custom route if the current next hop goes down.**
- B. A target pool-based passthrough network load balancer was created.
- C. A group-based passthrough network load balancer was created.
- **D. At least one instance group was created.**
- **E. A health check was created.**

Answer: A,D,E

Explanation:

The route's next hop is a forwarding rule for a backend service, which indicates a group-based passthrough load balancer.

Group-based load balancers require health checks to monitor instance health.

Backend services attach to instance groups to distribute traffic, so at least one instance group exists.

NEW QUESTION # 17

.....

One of the great features of our FCP_GCS_AD-7.6 training material is our FCP_GCS_AD-7.6 pdf questions. FCP - Google Cloud Security 7.6 Administrator exam questions allow you to prepare for the real FCP_GCS_AD-7.6 exam and will help you with the self-assessment. You can easily pass the FCP_GCS_AD-7.6 exam by using FCP_GCS_AD-7.6 dumps pdf. Moreover, you will get all the updated FCP_GCS_AD-7.6 Questions with verified answers. If you want to prepare yourself for the real FCP - Google Cloud Security 7.6 Administrator exam, then it is one of the most important ways to improve your FCP_GCS_AD-7.6 preparation level. We provide 100% money back guarantee on all FCP_GCS_AD-7.6 braindumps products.

FCP_GCS_AD-7.6 Latest Test Format: https://www.dumpstests.com/FCP_GCS_AD-7.6-latest-test-dumps.html

The FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) mock exam setup can be configured to a particular style or arrive at unique questions, Fortinet Reliable FCP_GCS_AD-7.6 Exam Sims There is no end to learning for standout IT professionals so that you can keep your careers thriving, Our FCP_GCS_AD-7.6 exam questions can give you some help, Fortinet Reliable FCP_GCS_AD-7.6 Exam Sims By developing and nurturing superior customers value, our company has been getting and growing more and more customers.

Pending Method Instances of the Same Method, Every day there are so many examinees choosing our Fortinet FCP_GCS_AD-7.6 certification dumps, and then they will clear exams and acquire the certificates as soon as possible.

Fortinet Reliable FCP_GCS_AD-7.6 Exam Sims: FCP - Google Cloud Security 7.6 Administrator - DumpsTests 10 Years of Excellence

The FCP - Google Cloud Security 7.6 Administrator (FCP_GCS_AD-7.6) mock exam setup can be configured to a particular style or arrive at unique questions, There is no end to learning for standout IT professionals so that you can keep your careers thriving.

Our FCP_GCS_AD-7.6 exam questions can give you some help, By developing and nurturing superior customers value, our company has been getting and growing more and more customers.

FCP_GCS_AD-7.6 test answers have a first-rate team of experts, advanced learning concepts and a complete learning model.
