Mit der AACN CCRN-Adult Zertifizierungsprüfung werden Sie sicher bessere Berufsaussichten haben. Die AACN CCRN-Adult Zertifizierungsprüfung kann nicht nur Ihre Fertigkeiten, sondern auch Ihre Zertifikate und Fachkenntnisse beweisen. Die den Schulungsunterlagen zur AACN CCRN-Adult Zertifizierungsprüfung von ZertFragen sind eine von der Praxis bewährte Software. Mit ihr können Sie eine bessere Theorie bekommen. Vorm Kauf können Sie eine kostenlose Probeversion bekommen. So kennen Sie die Qualität unserer Prüfungsmaterialien. ZertFragen ist Ihnen die beste Wahl.

AACN CCRN-Adult Prüfungsplan:

Thema	Einzelheiten
Thema 2	<ul style="list-style-type: none"> • In musculoskeletal, neurological, and psychosocial areas, the syllabus includes managing trauma, neurological disorders, and behavioral health issues. This emphasizes the holistic approach required in critical care settings. Lastly, multisystem complications such as sepsis and shock states are included to assess the ability to manage life-threatening conditions that affect multiple organ systems.
Thema 4	<ul style="list-style-type: none"> • CLINICAL JUDGMENT: This section measures the skills of Critical Care Nurses and covers a wide range of medical conditions across various systems. It includes cardiovascular issues such as acute coronary syndrome, heart failure, and cardiomyopathies, demonstrating the need for in-depth knowledge in managing these critical conditions. The section also addresses respiratory emergencies like pulmonary embolism and ARDS, emphasizing the importance of understanding respiratory failure and chronic conditions.

CCRN-Adult Übungsfragen: CCRN (Adult) - Direct Care Eligibility Pathway & CCRN-Adult Dateien Prüfungsunterlagen

Nach der Schulzeit haben wir mehr Verantwortungen und die Zeit fürs Lernen vermindert sich. Wenn Sie sich im IT-Bereich besser entwickeln möchten, dann ist die internationale Zertifizierungsprüfung wie AACN CCRN-Adult Prüfung zu bestehen sehr notwendig. Wir ZertFragen bieten Sie mit alle Kräfte vieler IT-Profis die effektivste Hilfe bei der AACN CCRN-Adult Prüfung. 3 Versionen (PDF, online sowie Software) von AACN CCRN-Adult Prüfungsunterlagen haben Ihre besondere Überlegenheit. Dadurch, dass Sie die kostenlose Demos probieren, können Sie nach Ihre Gewohnheiten die geeignete Version wählen.

AACN CCRN (Adult) - Direct Care Eligibility Pathway CCRN-Adult Prüfungsfragen mit Lösungen (Q139-Q144):

139. Frage

In the management of a patient with Acute Respiratory Distress Syndrome (ARDS), the MOST appropriate ventilator settings include using tidal volumes of:

- A. 6-8 mL/kg
- B. 2-4 mL/kg
- C. 8-10 mL/kg
- **D. 4-6 mL/kg**

Antwort: D

Begründung:

The goal in Acute Respiratory Distress Syndrome (ARDS) management is to achieve and maintain adequate oxygenation while avoiding barotrauma. Numerous studies have determined the most appropriate ventilator settings to ensure lung protection consists of using small tidal volumes of 4-6 mL/kg to prevent volutrauma, and higher PEEP (Positive End-Expiratory Pressure) levels to recruit alveoli. In addition, the FiO₂ should be set to achieve a goal of PaO₂ of 60 mm Hg or greater.

140. Frage

An African American patient with a history of sickle cell disease expresses frequent complaints of pain despite appropriate pain management interventions. The nurse notes that other healthcare team members appear skeptical about the patient's reports of pain. What is the MOST appropriate action for the nurse?

- A. Because the patient is complaining excessively, the nurse should ask the patient to minimize their complaints regarding their pain
- **B. The nurse should advocate for the patient's needs and address possible implicit bias within the team**
- C. Because the patient's pain is being managed appropriately, the nurse should ignore the behavior of the other healthcare team members
- D. The nurse should confront the healthcare team members about their skepticism

Antwort: B

Begründung:

The nurse should advocate for the patient's needs as advocacy is one of the key roles of a nurse. As part of advocacy, the nurse should address any implicit biases within the healthcare team that may hinder proper care, in this case, potential underestimation of the patient's pain due to their ethnicity and disease. While confronting healthcare team members about their skepticism may seem like a form of advocacy, it is less likely to result in productive conversation than discussing potential biases. Ignoring the behavior of the other healthcare team members or asking the patient to minimize their complaints regarding their pain does not fulfill the nurse's duty to advocate for the patient.

141. Frage

When providing end-of-life care, which of the following is TRUE regarding inadequate symptom management?

- A. It should be avoided if possible, but may occur despite the nurse's efforts
- B. It often occurs as care provision becomes more difficult during the end-of-life
- **C. It is unethical**
- D. It is often caused by unreasonable patient surrogates

Antwort: C

Begründung:

Inadequate symptom management in the end-of-life patient is unethical, as symptoms can almost always be managed using a variety of tools during end-of-life care. Inadequate symptom management should not occur and correctly managing symptoms is the responsibility of the patient's healthcare team.

142. Frage

Which of the following is LEAST LIKELY to be an expected benefit of developing an interprofessional plan of care?

- A. Improved patient outcomes
- B. Reduced duplication of interventions
- C. Improved patient compliance
- D. Better prioritization of activities

Antwort: C

Begründung:

Developing an interprofessional plan of care leads to several expected benefits for the patient, including improved outcomes. An interprofessional plan of care also results in more efficient care, benefiting the patient medically and financially. These benefits include reduced duplication of interventions and better prioritization of activities. Improved patient compliance is not a major expected benefit of developing an interprofessional plan, although there may be an effect in this area due to improved teaching and reinforcement.

143. Frage

Which of the following statements is TRUE regarding dementia?

- A. Dementia is primarily a disease of memory loss
- B. Frontotemporal dementia affects personality and behavior more than memory
- C. Dementia comes and goes, fluctuating in severity
- D. Alzheimer's disease, the most common type of dementia, typically presents with sudden onset of symptoms

Antwort: B

Begründung:

Frontotemporal dementia often impacts personality and behavior more than memory, in contrast to many other forms of dementia. Dementia is progressive and does not typically result in periods of reversed symptoms. While memory loss is a component of dementia, it involves other cognitive impairments as well, such as reasoning and abstract thinking. Alzheimer's disease usually presents gradually, not with a sudden onset of symptoms.

144. Frage

.....

Die Zertifikat der AACN CCRN-Adult ist international anerkannt. Sie zu erwerben bedeutet, dass Sie den Schlüssel zur höheren Stelle besitzen. Die AACN CCRN-Adult Prüfungsunterlagen von ZertFragen werden von erfahrenen IT-Profis hergestellt und immer wieder aktualisiert. Jetzt können Sie mit günstigem Preis die verlässliche AACN CCRN-Adult Prüfungsunterlagen genießen. Nachdem Sie die Zertifizierung erworbt haben, können Sie leicht eine höhere Arbeitsposition oder Gehalten bekommen.
