Which two steps does the administrator need to take to enable users to authenticate using Azure AD to the Workspace Experience? (Choose two.)

- A. Add Azure AD Account under Identity Providers in Citrix Cloud.
- B. Add Cloud Connector information to the Azure AD console.
- C. Deploy Cloud Connectors to support Azure AD authentication.

- **D. Enable Azure AD authentication under Workspace Configuration in Citrix Cloud.**

Answer: A,D

This allows users to authenticate using their Azure AD credentials to access their applications and desktops through the Workspace Experience. The Cloud Connectors are not directly involved in the Azure AD authentication process for Workspace Experience¹².

NEW QUESTION # 168

Scenario: A Citrix Administrator needs to grant permissions to a contractor to manage an inventory application in Citrix Virtual Apps and Desktops Service managed in Citrix Cloud. The administrator needs to minimize the access granted to the contractor to only administer the inventory application.

Which two permissions will the administrator need to grant to the contractor? (Choose two.)

- A. Full Administrator in Citrix Cloud
- **B. Custom access in Citrix Cloud**
- **C. Delivery Group Administrator in the Citrix Virtual Apps and Desktops Service**
- D. Help Desk Administrator in Citrix Virtual Apps and Desktops Service
- E. Cloud Administrator in the Citrix Virtual Apps and Desktops Service

Answer: B,C

The administrator can also use the Delivery Group Administrator role in the Citrix Virtual Apps and Desktops Service to allow the contractor to deliver applications, desktops, and machines, and manage the associated sessions. This role has the minimum permissions required to administer the inventory application. The other roles are either too broad or too restrictive for the scenario.

NEW QUESTION # 169

Scenario: A Citrix Administrator is managing a Citrix ADC SDX running eight Citrix ADC instances. The administrator first needs to upgrade the firmware on the instances. However, the administrator is concerned that it needs to be done all at once.

What upgrading flexibility does SDX provide in this scenario?

- A. The Citrix ADC instance can be upgraded at the SDX management level, allowing all instances to be upgraded at once.
- B. The Citrix ADC instances have to be upgraded at the same time.
- **C. The Citrix ADC instance can be upgraded on an individual basis, allowing all instances to run different firmware versions.**
- D. It is NOT possible to upgrade the Citrix ADC instances to different firmware versions.

Answer: C
