

2026 AZ-120: Planning and Administering Microsoft Azure for SAP Workloads High Hit-Rate Examcollection Dumps Torrent

AZ-120: Azure For SAP Workloads Certification

Practice Questions

P.S. Free 2026 Microsoft AZ-120 dumps are available on Google Drive shared by Free4Torrent: <https://drive.google.com/open?id=1R5EDW2fDT9xdtE5G6QfzO7QtOtxJuFMn>

Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) dumps PDF version is printable and embedded with valid Microsoft AZ-120 questions to help you get ready for the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) exam quickly. Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) exam dumps pdf are also usable on several smart devices. You can use it anywhere at any time on your smartphones and tablets. We update our Microsoft AZ-120 Exam Questions bank regularly to match the changes and improve the quality of AZ-120 Questions so you can get a better experience.

The Microsoft AZ-120 exam covers a wide range of topics, including Azure infrastructure, SAP HANA deployment, Azure services for SAP, and Azure monitoring and management. AZ-120 Exam is designed to test your knowledge and skills in these areas and ensure that you have the necessary skills to manage SAP workloads on Azure.

AZ-120 Examcollection Free Dumps | AZ-120 Updated Test Cram

Immediately after you have made a purchase for our AZ-120 practice test, you can download our exam study materials to make preparations for the exams. It is universally acknowledged that time is a key factor in terms of the success of exams. There is why our AZ-120 Test Prep exam is well received by the general public. I believe if you are full aware of the benefits the immediate download of our PDF study exam brings to you, you will choose our AZ-120 actual study guide.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q116-Q121):

NEW QUESTION # 116

What should you use to perform load testing as part of the migration plan?

- A. Azure Application Insights
- B. Azure Monitor
- C. JMeter
- D. SAP LoadRunner by Micro Focus

Answer: D

Explanation:
Explanation

Explanation:

Scenario: Upgrade and migrate SAP ECC to SAP Business Suite on HANA Enhancement Pack 8.

With the SAP LoadRunner application by Micro Focus, you can accelerate testing and development, reduce slowdowns and expenses, and gain a better understanding of performance issues. Validate software performance, virtualize your network, simulate workloads, benchmark production system performance, and optimize your deployment of SAP HANA software References:

<https://www.sap.com/products/loadrunner.html>

Validate Azure Infrastructure for SAP Workloads

Question Set 2

NEW QUESTION # 117

You have an on-premises deployment of SAP Business Suite on HANA that includes a CPU-intensive application tier and a 20-TB database tier.

You plan to migrate to SAP HANA on Azure.

You need to recommend a compute option to host the application and database tiers. The solution must minimize cost.

What should you recommend for each tier? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Application:	<div style="border: 1px solid black; padding: 5px;"><div style="border: 1px solid black; height: 20px; margin-bottom: 5px;"></div><div style="border: 1px solid black; padding: 2px;">Ev3-series of Azure virtual machines</div><div style="border: 1px solid black; padding: 2px;">HANA on Azure (Large Instances)</div><div style="border: 1px solid black; padding: 2px;">M-series of Azure virtual machines</div></div>
Database:	<div style="border: 1px solid black; padding: 5px;"><div style="border: 1px solid black; height: 20px; margin-bottom: 5px;"></div><div style="border: 1px solid black; padding: 2px;">Ev3-series of Azure virtual machines</div><div style="border: 1px solid black; padding: 2px;">HANA on Azure (Large Instances)</div><div style="border: 1px solid black; padding: 2px;">M-series of Azure virtual machines</div></div>

Answer:

Explanation:

Application:	<div style="border: 1px solid black; padding: 5px;"><div style="border: 1px solid black; height: 20px; margin-bottom: 5px;"></div><div style="border: 1px solid black; padding: 2px; border: 2px solid red;">Ev3-series of Azure virtual machines</div><div style="border: 1px solid black; padding: 2px;">HANA on Azure (Large Instances)</div><div style="border: 1px solid black; padding: 2px;">M-series of Azure virtual machines</div></div>
Database:	<div style="border: 1px solid black; padding: 5px;"><div style="border: 1px solid black; height: 20px; margin-bottom: 5px;"></div><div style="border: 1px solid black; padding: 2px; border: 2px solid red;">Ev3-series of Azure virtual machines</div><div style="border: 1px solid black; padding: 2px; border: 2px solid red;">HANA on Azure (Large Instances)</div><div style="border: 1px solid black; padding: 2px;">M-series of Azure virtual machines</div></div>

NEW QUESTION # 118

You have an SAP landscape on Azure.

You plan to deploy a new SAP application server by using an Azure Resource Manager template.

You need to ensure that all new servers are deployed with Azure Disk Encryption enabled.

How should you complete the relevant component of the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
"resources": [
  {
    "type": "Microsoft.Compute/virtualMachines/
    "name": "[concat(parameters
    ('vmName'), '/DiskEncryption')]",
    "location": [parameters('location')]",
    "apiVersion": "2017-03-30",
    "properties": {
      "publisher": "Microsoft.Azure.Security",
      "type":
    }
  }
]

```

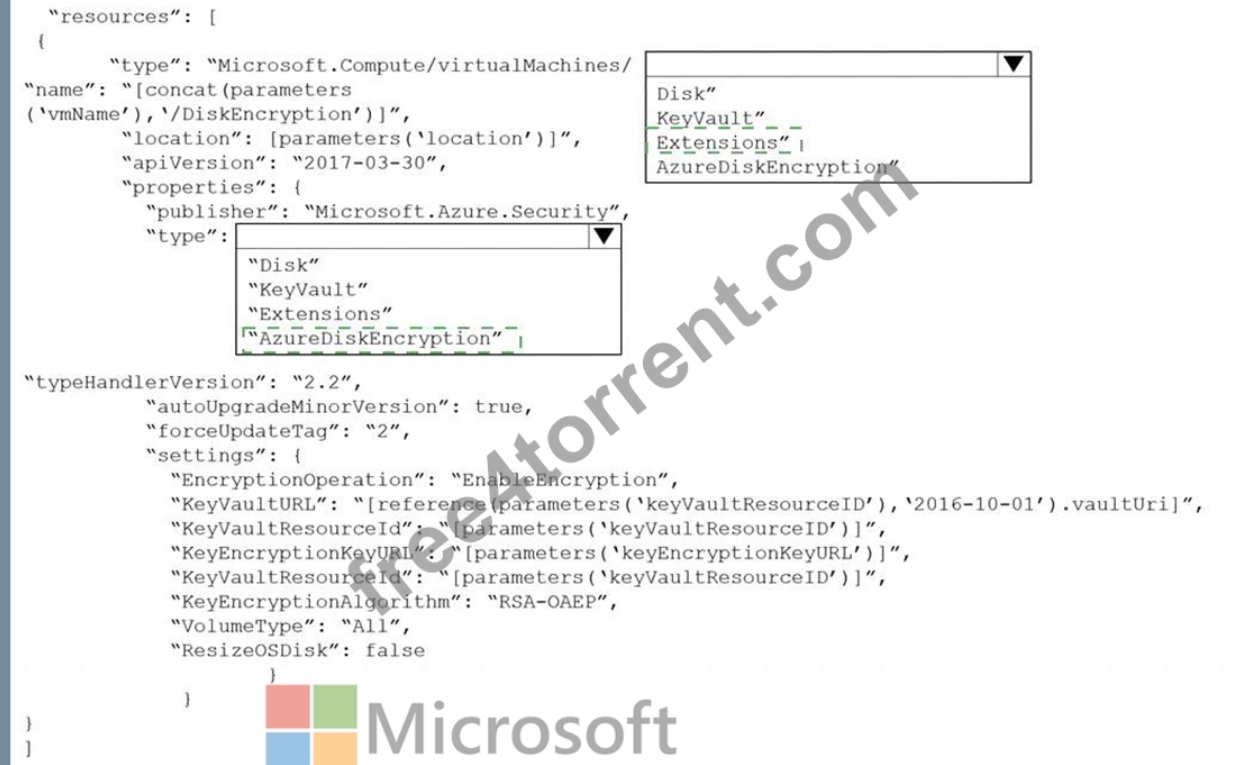

The screenshot shows a JSON template editor with two dropdown menus. The first dropdown, labeled "type", is open and shows the following options: "Disk", "KeyVault", "Extensions", and "AzureDiskEncryption". The second dropdown, labeled "typeHandlerVersion", is also open and shows the same four options. The JSON code is partially visible, showing the structure of a resource definition for a virtual machine with disk encryption.

Answer:

Explanation:

```
"resources": [
  {
    "type": "Microsoft.Compute/virtualMachines/
    "name": "[concat(parameters
    ('vmName'), '/DiskEncryption')]",
    "location": [parameters('location')]",
    "apiVersion": "2017-03-30",
    "properties": {
      "publisher": "Microsoft.Azure.Security",
      "type":
    }
  }
]

```

The screenshot shows a JSON template editor with two dropdown menus. The first dropdown, labeled "type", is open and shows the following options: "Disk", "KeyVault", "Extensions", and "AzureDiskEncryption". The second dropdown, labeled "typeHandlerVersion", is also open and shows the same four options. The JSON code is partially visible, showing the structure of a resource definition for a virtual machine with disk encryption.

Explanation

Graphical user interface, text, application, email Description automatically generated

```

"resources": [
  {
    "type": "Microsoft.Compute/VirtualMachines/
    'name': "[concat(parameters
    ('vmName'), '/DiskEncryption')]",
    "location": [parameters('location')]",
    "apiVersion": "2017-03-30",
    "properties": {
      "publisher": "Microsoft.Azure.Security",
      "type":
        "Disk"
        "KeyVault"
        "Extensions"
        "AzureDiskEncryption"
    }
  }
]
"typeHandlerVersion": "2.2",
"autoUpgradeMinorVersion": true,
"forceUpdateTag": "2",
"settings": {
  "EncryptionOperation": "EnableEncryption",
  "KeyVaultURL": "[reference(parameters('keyVaultResourceID'), '2016-10-01').vaultUri]",
  "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
  "KeyEncryptionKeyURL": "[parameters('keyEncryptionKeyURL')]",
  "KeyVaultResourceId": "[parameters('keyVaultResourceID')]",
  "KeyEncryptionAlgorithm": "RSA-OAEP",
  "VolumeType": "All",

```

Box 1: extensions

Azure Disk Encryption can be enabled via Azure PowerShell or Azure CLI. That is normally seen in remediation. In a real-world scenario you would like to see a virtual machine during its creation include disk encryption process. This is technically possible thanks to Disk Encryption VM extension.

Box 2: AzureDiskEncryption

Example:

```

"type": "Microsoft.Compute/virtualMachines/extensions",
"name": "[concat(parameters('vmName'), '/diskEncryption')]",
"apiVersion": "2019-03-01",
"location": "[parameters('location')]",
"dependsOn": [
  "[resourceId('Microsoft.Compute/virtualMachines/', parameters('vmName'))]"
],
"properties": {
  "publisher": "Microsoft.Azure.Security",
  "type": "AzureDiskEncryption",

```

NEW QUESTION # 119

You are planning the Azure network infrastructure for an SAP environment.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

You can segregate the SAP application layer and the DBMS layer into different virtual networks that are peered by using Global Vnet peering.

Yes

No

You can segregate the SAP application layer and the DBMS layer into different subnets in the same virtual network.

If you segregate the SAP application layer and the DBMS layer into different peered virtual networks, you will incur costs for the data transferred between the virtual networks.

Answer:

Explanation:

Statements	Yes	No
You can segregate the SAP application layer and the DBMS layer into different virtual networks that are peered by using Global Vnet peering.	<input type="radio"/>	<input checked="" type="radio"/>
You can segregate the SAP application layer and the DBMS layer into different subnets in the same virtual network.	<input checked="" type="radio"/>	<input type="radio"/>
If you segregate the SAP application layer and the DBMS layer into different peered virtual networks, you will incur costs for the data transferred between the virtual networks.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 120

You have an on-premises SAP environment.

Backups are performed by using tape backups. There are 50 TB of backups.

A Windows file server has BMP images of checks used by SAP Finance. There are 9 TB of images.

You need to recommend a method to migrate the images and the tape backups to Azure. The solution must maintain continuous replication of the images.

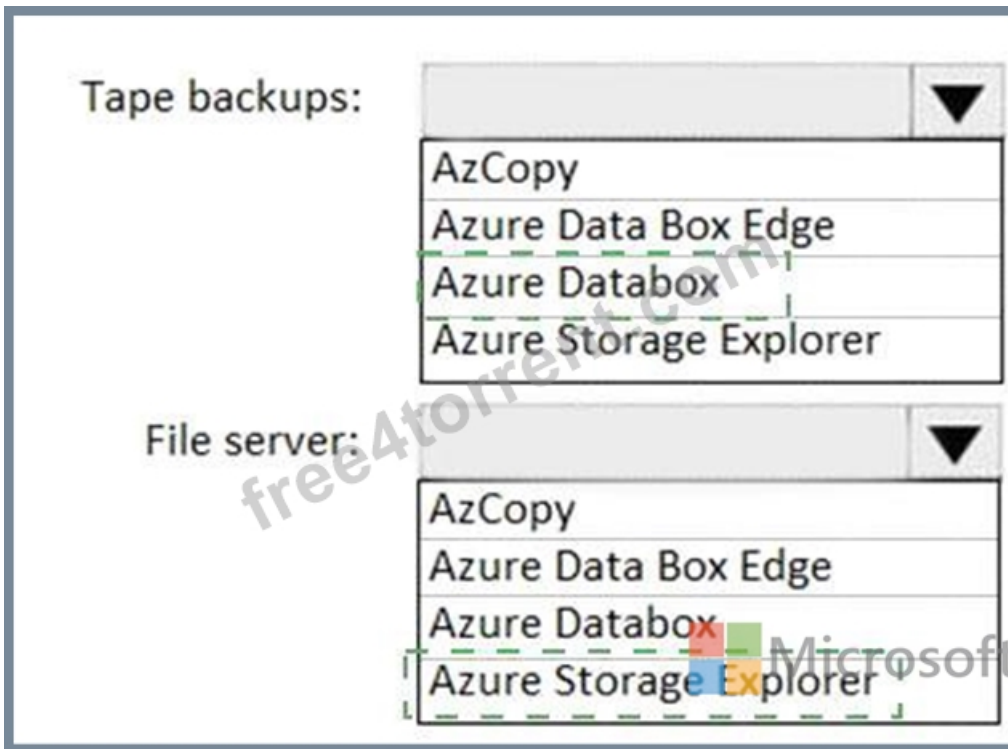

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

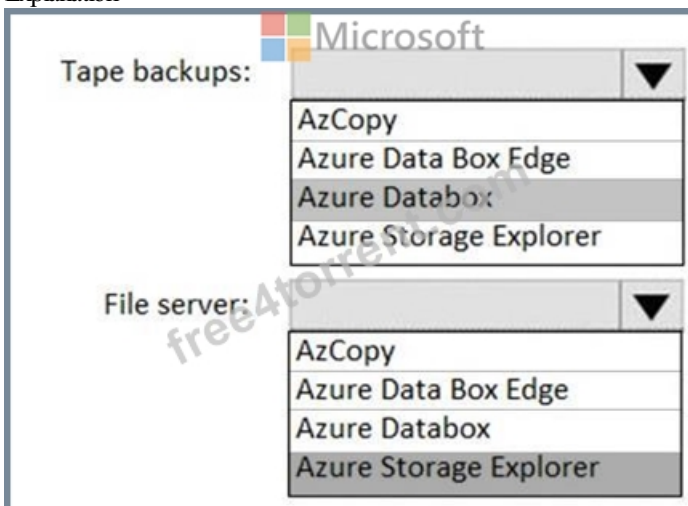

The screenshot shows a configuration window with two dropdown menus. The first dropdown is labeled 'Tape backups:' and the second is labeled 'File server:'. Both dropdowns have a list of options: AzCopy, Azure Data Box Edge, Azure Databox, and Azure Storage Explorer. The 'File server' dropdown has a small Microsoft logo watermark over it.

Answer:

Explanation:

Explanation

Tape backups: Azure DataBox

The Microsoft Azure Data Box cloud solution lets you send terabytes of data into Azure in a quick, inexpensive, and reliable way. The secure data transfer is accelerated by shipping you a proprietary Data Box storage device. Each storage device has a maximum usable storage capacity of 80 TB and is transported to your datacenter through a regional carrier. The device has a rugged casing to protect and secure data during the transit.

File server: Azure Storage Explorer

Azure Storage Explorer is an application which helps you to easily access the Azure storage account through any device on any platform, be it Windows, MacOS, or Linux. You can easily connect to your subscription and manipulate your tables, blobs, queues, and files.

NEW QUESTION # 121

.....

Three different formats of AZ-120 exam study material are available at Free4Torrent. These formats include AZ-120 dumps PDF files, desktop Microsoft AZ-120 practice exam software, and a web-based AZ-120 practice test. Professionals have designed the product according to the most recent syllabus of the AZ-120 test in mind. Let's find out the prominent features of these latest Microsoft AZ-120 exam questions format.
