Since it is desktop-based CMT Association CMT-Level-I practice exam software, it is not necessary to connect to the internet to use it.

The CMT-Level-I (CMT Level I) Exam is a computer-based test that consists of 132 multiple-choice questions. CMT-Level-I exam is divided into three sections: General Knowledge, Technical Analysis, and Ethics. The General Knowledge section covers basic financial concepts and terminology, while the Technical Analysis section focuses on charting techniques, trend analysis, and other technical indicators.

CMT Association CMT Level 1 Exam Sample Questions (Q374-Q379):

NEW QUESTION # 374

The Elliott Wave pattern highlighted below (Chart showing A-B-C where B goes above A origin, C goes below A end) is:

- A. A regular flat
- B. A running flat
- **C. An expanded flat**
- D. A flat

Answer: C

Explanation:

Detailed Explanation:

In this pattern, Wave B travels beyond the start of Wave A (making a new high), and Wave C travels beyond the end of Wave A (making a new low). This "broadening" action defines an Expanded Flat (also called Irregular Flat).

NEW QUESTION # 375

A rising relative strength line for a stock in a falling market indicates that:

- A. The stock is performing worse than the market
- B. Price and volume are diverging
- C. It may be moving into an overbought state
- **D. The stock is performing better than the market**

Answer: D

Explanation:

Detailed Explanation:

Relative Strength (Comparative) is the ratio of the stock price to the market index. If the market is falling, but the stock is falling less (or rising), the ratio will rise. A rising relative strength line confirms that the stock is outperforming (acting stronger than) the general market.

NEW QUESTION # 376

The body of the candlestick line displays the relationship between:

- A. The current session's close and the prior session's close⁸¹
- **B. The current session's open and close**
- C. The current session's open and high⁸²
- D. The current session's high and low⁸⁰

Answer: B

Explanation:

Detailed Explanation:

The "Real Body" of a Japanese candlestick represents the range between the Opening price and the Closing price. If the Close is higher than the Open, the body is white/green (bullish). If the Close is lower, it is black/red (bearish).⁸⁴⁸⁵

NEW QUESTION # 377

To INCREASE the sensitivity of a 5 x 3 point and figure chart, one would:

- A. Increase the number of boxes needed for a reversal
- B. Both A and C
- **C. Decrease the box size**
- D. Increase the box size

Answer: C

Explanation:

Detailed Explanation:

* Increasing the box size or reversal amount filters out more noise, making it less sensitive.

- A. It is a continuation pattern
- B. The second candle is larger than the first
- C. It contains a spinning top
- D. The real body must be black

[illegible]
