Itcertkr는 한국어로 온라인상담과 메일상담을 받습니다. GitHub GitHub-Copilot덤프구매후 일년동안 무료업데이트 서비스를 제공해드리며GitHub GitHub-Copilot시험에서 떨어지는 경우GitHub GitHub-Copilot덤프비용 전액을 환불해 드려 고객님의 부담을 덜어드립니다. 더는 고민고민 하지마시고 덤프 받아가세요.

GitHub GitHub-Copilot 시험요강:

주제	소개
주제 1	Developer Use Cases for AI: This section of the exam measures skills of Full-Stack Developers and Cloud Engineers and covers how AI enhances developer productivity across various tasks such as learning new programming languages, debugging, writing documentation, and refactoring code. It discusses how GitHub Copilot integrates with the Software Development Lifecycle (SDLC) and its role in modernizing legacy applications. It also highlights the use of AI for personalized responses, sample data generation, and improving overall efficiency in software development.
주제 2	Privacy Fundamentals and Context Exclusions: This section of the exam measures skills of Cybersecurity Specialists and Compliance Officers and covers privacy safeguards and content exclusion settings in GitHub Copilot. It explains how Copilot can identify security vulnerabilities, suggest optimizations, and enforce secure coding practices. It also includes details on content ownership, data filtering mechanisms, and exclusion configurations. The section concludes with troubleshooting guidelines for managing context exclusions and ensuring compliance with organizational security policies.
주제 3	Responsible AI: This section of the exam measures the skills of AI Ethics Analysts and AI Developers and covers the principles of responsible AI usage, the risks associated with AI, and the limitations of generative AI tools. It includes the importance of validating AI-generated outputs and operating AI systems responsibly. It also explores potential harms such as bias, privacy concerns, and fairness issues, along with methods to mitigate these risks. The ethical considerations of AI development and deployment are also discussed.
주제 4	How GitHub Copilot Works and Handles Data: This section of the exam measures the skills of Data Security Specialists and DevOps Engineers and covers how GitHub Copilot processes data, handles code suggestions and manages privacy concerns. It explains the data pipeline for Copilot's suggestions, how it gathers context, and how prompts are processed through its AI model. The section also discusses the limitations of AI-generated code, the effects of historical data on suggestions, and the role of prompt crafting. Best practices for improving prompt effectiveness and optimizing AI-generated responses are included.

GitHub-Copilot시험대비 덤프 최신자료, GitHub-Copilot최신 시험덤프공부자료

Itcertkr 에서 출시한 GitHub인증GitHub-Copilot시험덤프는 100%시험통과율을 보장해드립니다. 엘리트한 IT전문가들이 갖은 노력으로 연구제작한GitHub인증GitHub-Copilot덤프는 PDF버전과 소프트웨어버전 두가지 버전으로 되어 있습니다. 구매전 PDF버전무료샘플로Itcertkr제품을 체험해보고 구매할수 있기에 신뢰하셔도 됩니다. 시험불합격시 불합격성적표로 덤프비용을 환불받을수 있기에 아무런 고민을 하지 않으셔도 괜찮습니다.

최신 GitHub Certification GitHub-Copilot 무료샘플문제 (Q45-Q50):

질문 # 45

How can GitHub Copilot facilitate a smoother learning experience when diving into a new programming language? (Each correct answer presents part of the solution. Choose two.)

- A. GitHub Copilot's /understand command will help GitHub Copilot to understand code written in a targeted programming language.
- B. GitHub Copilot can convert comments into code to grasp the syntax and nuances of a new programming language.
- C. GitHub Copilot can provide contextualized code suggestions and answer sources from an organization's documentation.
- D. GitHub Copilot Chat can provide guidance and support for common coding tasks and challenges in the targeted programming language.

정답: B,D

설명:

GitHub Copilot helps with learning new languages by providing guidance on common tasks and by converting comments into code, allowing developers to see syntax in action.

질문 # 46

What types of prompts or code snippets might be flagged by the GitHub Copilot toxicity filter? (Each correct answer presents part of the solution. Choose two.)

- A. Code comments containing strong opinions or criticisms
- B. Hate speech or discriminatory language (e.g., racial slurs, offensive stereotypes)
- C. Code that contains logical errors or produces unexpected results
- D. Sexually suggestive or explicit content

정답: B,D

설명:

GitHub Copilot includes a toxicity filter to prevent the generation of harmful or inappropriate content. This filter flags prompts or code snippets that contain hate speech, discriminatory language, or sexually suggestive or explicit content. This ensures a safe and respectful coding environment.

질문 # 47

What is zero-shot prompting?

- A. Telling GitHub Copilot it needs to show only the correct answer
- B. Only giving GitHub Copilot a question as a prompt and no examples
- C. Giving GitHub Copilot examples of the algorithm and outcome you want to use
- D. Giving as little context to GitHub Copilot as possible
- E. Giving GitHub Copilot examples of the problem you want to solve

정답: B

설명:

Zero-shot prompting involves asking GitHub Copilot a question or giving a task without providing any examples. This relies on the model's pre-existing knowledge to generate a response.

질문 # 48

Identify the right use cases where GitHub Copilot Chat is most effective. (Each correct answer presents part of the solution. Choose two.)

- A. Create a technical requirement specification from the business requirement documentation
- B. Creation of end-to-end performance testing scenarios for a web application
- C. Creation of a unit test scenario for newly developed Python code
- D. Explain a legacy COBOL code and translate the code to another language like Python.

정답: C,D

설명:

GitHub Copilot Chat is effective for explaining and translating legacy code and generating unit test scenarios for new code.

질문 # 49

How does GitHub Copilot suggest code optimizations for improved performance?

- A. By automatically rewriting the codebase to use more efficient code.
- B. By enforcing strict coding standards that ensure optimal performance.
- C. By providing detailed reports on the performance of the codebase.
- D. By analyzing the codebase and suggesting more efficient algorithms or data structures.

정답: D

설명:

GitHub Copilot suggests code optimizations by analyzing the codebase and recommending more efficient algorithms or data structures.

질문 # 50

.....

지금 21세기 IT업계가 주목 받고 있는 시대에 그 경쟁 또한 상상할만하죠, 당연히 IT업계 중 GitHub Copilot 인증 시험도 아주 인기가 많은 시험입니다. 응시자는 매일매일 많아지고 있으며, 패스하는 분들은 관련 IT업계에서 많은 지식과 내공을 지닌 분들뿐입니다.
