Our experts have many years' experience in this particular line of business, together with meticulous and professional attitude towards jobs. Their abilities are unquestionable, besides, SPLK-3002 Exam Questions are priced reasonably with three kinds: the PDF, Software and APP online. Though the content is the same, but their displays are totally different and functionable.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q49-Q54):

### NEW QUESTION # 49

What is the main purpose of the service analyzer?

- **A. Monitor overall Service and KPI status.**
- B. Display a list of All Services and Entities.
- C. Trigger external alerts based on threshold violations.
- D. Allow Analysts to add comments to Alerts.

**Answer: A**

Explanation:

Reference: <https://docs.splunk.com/Documentation/MSExchange/4.0.3/Reference/ServiceAnalyzer> The service analyzer is a dashboard that allows you to monitor the overall service and KPI status in ITSI. The service analyzer displays a list of all services and their health scores, which indicate how well each service is performing based on its KPIs. You can also view the status and values of each KPI within a service, as well as drill down into deep dives or glass tables for further analysis. The service analyzer helps you identify issues affecting your services and prioritize them based on their impact and urgency. The main purpose of the service analyzer is:

D). Monitor overall service and KPI status. This is true because the service analyzer provides a comprehensive view of the health and performance of your services and KPIs in real time.

The other options are not the main purpose of the service analyzer because:

A). Display a list of all services and entities. This is not true because the service analyzer does not display entities, which are IT components that require management to deliver an IT service. Entities are displayed in other dashboards, such as entity management or entity health overview.

B). Trigger external alerts based on threshold violations. This is not true because the service analyzer does not trigger alerts, which are notifications sent to external systems or users when certain conditions are met. Alerts are triggered by correlation searches or alert actions configured in ITSI.

C). Allow analysts to add comments to alerts. This is not true because the service analyzer does not allow analysts to add comments to alerts, which are notifications sent to external systems or users

### NEW QUESTION # 50

Which glass table feature can be used to toggle displaying KPI values from more than one service on a single widget?

- A. Service dependencies.
- **B. Service swapping.**
- C. Ad-hoc search.
- D. Service templates.

**Answer: B**

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/Visualizations#collapseDesktop8> A glass table is a visualization tool that allows you to monitor the interrelationships and dependencies across your IT and business services. You can add metrics like KPIs, ad hoc searches, and service health scores that update in real time against a background that you design. One of the features of glass tables is service swapping, which enables you to toggle displaying KPI values from more than one service on a single widget.

You can use service swapping to compare metrics across different services without creating multiple glass tables or widgets.

References: Overview of the glass table editor in ITSI, [Configure service swapping on glass tables]

### NEW QUESTION # 51

Which of the following is a best practice for identifying the most effective services with which to start an iterative ITSI deployment?

- **A. Analyze the business to determine the most critical services.**

- B. Define a large number of key services early.
- C. Focus on low-level services.
- D. Only include KPIs if they will be used in multiple services.

**Answer: A**

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/SI/MKA>

A best practice for identifying the most effective services with which to start an iterative ITSI deployment is to analyze the business to determine the most critical services that have the most impact on revenue, customer satisfaction, or other key performance indicators. You can use the Service Analyzer to prioritize and monitor these services. References: Service Analyzer

## NEW QUESTION # 52

Within a correlation search, dynamic field values can be specified with what syntax?

- A. fieldname
- B. <fieldname /fieldname>
- C. eval(fieldname)
- D. %fieldname%

**Answer: B**

Explanation:

Reference:

B is the correct answer because dynamic field values can be specified with <fieldname /fieldname> syntax within a correlation search. This syntax allows you to insert values from fields returned by the correlation search into alert actions such as email subject or body. For example, <host /host> inserts the value of the host field into the email. Reference: [Use dynamic field values in correlation searches in ITSI]

## NEW QUESTION # 53

Which of the following describes a way to delete multiple duplicate entities in ITSI?

- A. Via the entity lister page.
- B. All of the above.
- C. Via a search using the | deleteentity command.
- D. Via a CSV upload.

**Answer: D**

Explanation:

Explanation

Import entities from CSV files that contain one or more entity definitions. Importing entities from CSV files is an efficient way to define multiple entities.

## NEW QUESTION # 54

.....

Our SPLK-3002 Online test engine is convenient and easy to learn, it supports all web browsers. If you want, you can have offline practice. One of the most outstanding features of SPLK-3002 Online test engine is it has testing history and performance review. You can have general review of what you have learnt.
