## MB-335 Pass-Sure Materials - MB-335 Quiz Bootcamp & MB-335 Test Quiz

As you know, opportunities are reserved for those who are prepared. Everyone wants to stand out in such a competitive environment, but they don't know how to act. Maybe our Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert exam questions can help you. Having a certificate may be something you have always dreamed of, because it can prove that you have a certain capacity. Our learning materials can provide you with meticulous help and help you get your certificate. Our MB-335 training prep is credible and their quality can stand the test. Therefore, our practice materials can help you get a great financial return in the future and you will have a good quality of life.

Microsoft MB-335 certification exam covers various topics related to supply chain management, including inventory management, purchasing, sales order management, production control, and warehouse management. MB-335 exam also covers the integration of supply chain management processes with other modules of Microsoft Dynamics 365, such as finance and operations. MB-335 Exam consists of multiple-choice questions and scenarios that test your ability to apply your knowledge to real-world situations.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant

## Expert Sample Questions (Q188-Q193):

### NEW QUESTION # 188

You need to resolve the issue for UserC.

Which two options should you configure? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Best advice period in days
- **B. Shelf life period in days**
- C. Forward tracing
- **D. Best before period in days**
- E. Backward tracing

**Answer: B,D**

Explanation:

Topic 7, Adventure Works Cycles background

Adventure Works Cycles is a high-end bicycle manufacturer in North America. Their standard model bicycles are available year-round. Limited-edition bicycle models are released several times a year to boutique retailers domestically.

Adventure Works has had the most success with their limited-edition bicycles. These bicycles have high margins, are in high demand, and have a strong following with the younger generation biking community.

Bicycle manufacturing

\* Bicycle models are measured and reported against how well a single model performs as a sum of all the variations of that model. For example, the Street Kid YOLO model sold 25,000 units in 2019 across all variations of the product, but the Purple Female frame made up 30 percent of that model's sales.

\* The Street Kid YOLO models sell in different volumes depending on the market.

\* The creation of production orders for bicycles occurs monthly and is based on historical sales.

\* Each part of a bicycle's assembly occurs at a different station in the Adventure Works production facility.

\* A piece of paper that has eight sections accompanies a bicycle throughout the manufacturing process. As each step is completed, the respective section is completed and signed off by a production worker.

\* The completed paper is used in the put-away process by the warehouse workers.

Financials

\* The standard model and limited-edition bicycle teams are separate operating units within the manufacturing division. Financials are tracked and reported separately even though they are produced and sold in the same sales channels.

\* Updates to the standard model bicycle models are created when a part for a bicycle becomes unavailable.

This can change the cost of the product.

\* An updated model of a bicycle with new parts will be maintained as a new item and have a new price.

However, it will look like the exact same product to retailers and distributors.

Manufacturing process

□ Limited-edition bicycle process

The limited-edition bicycles are made up of an Adventure Works custom frame with all other parts created by local artists and manufacturers.

\* Each bicycle has a unique set of new items that make up the bill of materials (BOM) because all parts are created to specification.

\* A single pilot limited-edition bicycle is created as a proof of concept.

\* Adventure Works occasionally reuses components from existing bicycles, but most limited-edition bicycles are made of handcrafted components designed to specifications.

\* Each limited-edition bicycle is built, and hand signed by a single Adventure Works artisan.

\* Sales price must be auto calculated after the cost price is derived.

\* Before creating the proof of concept limited-edition bicycle, the approximate sales price needs to be determined through a cost-plus 20 percent calculation.

\* All items except for the frame in the prototype process are considered finished items and can be sold individually.

\* The frame items require modifications in accordance with the manufacturing process as well as painting.

\* Each Adventure Works limited-edition bicycle artisan is scheduled to create a specific number of bicycles in a production run that must be completed by a certain date.

\* Limited-edition bicycle artisans work exclusively on a given run of limited-edition bicycles and are not able to work on other tasks.

Limited-edition bicycle BOM assembly process

The prototype process for the limited-edition bicycles is shown in the following graphic:

□ New limited-edition k bicycle process

Adventure Works is creating a new, limited-edition bicycle to commemorate the company's tenth anniversary.

The limited-edition bicycle will be designed for charity events and be produced for the summer season.

\* The bicycle must be available in men's, women's, and unisex frame styles. It will be painted in one of 50 hand-painted designs

representing the charity of the customer's choosing.

- \* A limited run of 100 bicycles must be created.
- \* The limited-edition bicycles must use the same production process as the standard model bicycles.
- \* The limited-edition bicycles must use the same parts used for previous limited-edition bicycles, except for the unique paint colors.
- \* Frames must be painted in-house.
- \* Five painting options are available only in the unisex frame style.

New limited-edition bicycle orders

- \* Customers must be able to place sales orders for the item in the chosen frame configuration, including style and color.
- \* When an order for the new limited-edition bicycle is created, payment must be provided.
- \* An approval for an order must exist for the order to be processed.
- \* Upon approval of an order, production must start immediately and not require re-entry of data.

### NEW QUESTION # 189

A bicycle manufacturing company is implementing Dynamics 365 Supply Chain Management.

The warehouse must pick and stage parts other than paint for bicycle assembly. Paint is at the production station.

You need to configure the reservations for production.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

To configure the reservations for production, you should do the following:

- \* Define configuration for paint reservation: You should configure the Item model group for paint. The Item model group determines the inventory policies for an item, such as reservation, tracking, and costing<sup>1</sup>. You can set the reservation policy for paint to FIFO date-controlled, which means that the inventory reservation is controlled by a sorting date according to the FIFO principle<sup>2</sup>. You can also set the Backward from ship date option, which means that the inventory reservation is controlled by the last update physical date according to the FIFO rule<sup>2</sup>.
- \* Define the reservation principle for paint: You should set the reservation principle to Start. This means that inventory is reserved when production starts<sup>3</sup>. This way, you can ensure that paint is available at the production station when needed

### NEW QUESTION # 190

A discrete manufacturer uses the time and attendance registration for production operations.

All employees register daily clock in and clock out times during a 40-hour, Monday through Friday workweek.

Pay periods are every two weeks. Workers are paid hourly.

The production manager will create work schedules with the following windows:

- \* Mandatory work hours
- \* Work hours during which employees can leave early without accruing absences
- \* Work hours during which employees can work extra time

If a junior production worker works over 90 hours in a pay period, the worker will receive time and a half over 80 hours. If a senior production worker works over 90 hours in a pay period, the worker will receive double time over 80 hours.

You need to configure the system for these requirements.

Where should you configure this functionality? To answer, drag the appropriate forms to the correct requirements. Each form may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

To configure the system for these requirements, you should use the following forms:

- \* Configure the overtime calculations: You should use the Workers form. This form allows you to set up and maintain information about workers, such as their personal details, employment status, and compensation<sup>1</sup>. You can also specify the overtime rate for each worker on the Time and attendance tab<sup>2</sup>. For example, you can set the overtime rate to 1.5 for junior production workers and 2 for senior production workers.
- \* Configure the periods of time that a worker can choose whether to work: You should use the Flex groups form. This form allows you to set up and maintain flex groups, which are groups of workers who have flexible work hours<sup>3</sup>. You can also define flex

profiles for each flex group, which specify the mandatory work hours, the flex time hours, and the extra time hours for each day of the week. For example, you can create a flex profile that has mandatory work hours from 8:00 AM to 4:00 PM, flex time hours from 4:00 PM to 6:00 PM, and extra time hours from 6:00 PM to 8:00 PM.

1: Workers 2: Set up overtime rates 3: Flex groups : [Flex profiles]

### NEW QUESTION # 191

A company uses Dynamics 365 Supply Chain Management.

Several production orders are in the started status.

An issue with equipment causes a rollback in the production status for some of the orders.

Some orders must be reset once the equipment is repaired, based on which products were being manufactured.

You need to reset the production orders based on the requirements

Which status should you use for each requirement? To answer, drag the appropriate statuses to the correct requirements. Each status may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 192

You need to resolve the issue for UserB.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Set up configuration and weight for partial visibility.
- **B. Create a catch weight item.**
- **C. Set up configuration and weight for full visibility.**
- D. Create a product master with predefined variants for ounces and boxes.

**Answer: B,C**
