FCSS_NST_SE-7.6 Fortinet FCSS - Network Security 7.6 Support Engineer Exam Summary

Exam Name	Fortinet FCSS - Network Security 7.6 Support Engineer
Exam Number	FCSS_NST_SE-7.6 Network Security Support Engineer
Exam Price	\$200 USD
Duration	75 minutes
Number of Questions	40
Passing Score	Pass / Fail
Recommended Training	Network Security Support Engineer
Exam Registration	PEARSON VUE
Sample Questions	Fortinet FCSS_NST_SE-7.6 Sample Questions
Practice Exam	Fortinet Certified Solution Specialist - Network Security Practice Test

Topics covered in the Fortinet Network Security Support Engineer FCSS_NST_SE-7.6 Exam

Section	Objectives
System troubleshooting	<ul style="list-style-type: none"> • Troubleshoot Security Fabric issues between FortiGate devices • Troubleshoot automation stitches • Troubleshoot resource problems using built-in tools • Troubleshoot connectivity problems using built-in tools • Troubleshoot different operation modes for FGCP HA clusters
Authentication	<ul style="list-style-type: none"> • Troubleshoot local and remote authentication • Troubleshoot Fortinet Single Sign-On (FSSO) issues
Security profiles	<ul style="list-style-type: none"> • Troubleshoot FortiGuard issues • Troubleshoot web filtering issues • Troubleshoot the intrusion prevention system (IPS)
Routing	<ul style="list-style-type: none"> • Troubleshoot routing packets using static routes • Troubleshoot OSPF to route the enterprise traffic
VPN	<ul style="list-style-type: none"> • Troubleshoot IPsec IKE version 1 and 2 issues

What type of questions are on the Fortinet FCSS_NST_SE-7.6 exams?

- Single answer multiple choice

FCSS_NST_SE-7.6 Network Security Support Engineer Sample Questions 2

Our study materials are choosing the key from past materials to finish our FCSS_NST_SE-7.4 torrent prep. It only takes you 20 hours to 30 hours to do the practice. After your effective practice, you can master the examination point from the FCSS_NST_SE-7.4 Exam Torrent. Then, you will have enough confidence to pass it. So start with our FCSS_NST_SE-7.4 torrent prep from now on. We can succeed so long as we make efforts for one thing.

Fortinet FCSS - Network Security 7.4 Support Engineer Sample Questions (Q44-Q49):

NEW QUESTION # 44

Refer to the exhibit, which shows a FortiGate configuration. An administrator is troubleshooting a web filter issue on FortiGate. The administrator has configured a web filter profile and applied it to a policy; however, the web filter is not inspecting any traffic that is passing through the policy.
What must the administrator do to fix the issue?

FortiGate configuration

```
config system fortiguard
  set protocol udp
  set port 8888
  set load-balance-servers1
  set auto-join-forticloud enable
  set update-server-location any
  set sandbox-region ''
  set fortiguard-anycast disable
  set antispam-force-off disable
  set antispam-cache enable
  set antispam-cache-ttl 1800
  set antispam-cache-mpercent2
  set antispam-timeout 7
  set webfilter-force-off enable
  set webfilter-cache enable
  set webfilter-cache-ttl 3600
  set webfilter-timeout 15
  set sdns-server-ip "208.91.112.220"
  set sdns-server-port 53
  unset sdns-options
  set source-ip 0.0.0.0
  set source-id6 ::
  set proxy-server-ip 0.0.0.0
  set proxy-server-port 0
  set proxy-username
  set ddns-server-ip 0.0.0.0
  set dons-server-port 443
end
```

- A. Change protocol to TCP and port to 53.
- B. Set sdns-server-ip to service.fortiguard.net.
- C. Disable webfilter-force-off at the VDOM level.
- **D. Disable webfilter-force-off.**

Answer: D

Explanation:

The global "kill switch" for web filtering is turned on (set webfilter-force-off enable), which bypasses all web filters. You need to turn it off (for example with config system fortiguard set webfilter-force-off disable) so that your web filter profile will actually inspect traffic.

NEW QUESTION # 45

Which two statements about conserve mode are true? (Choose two.)

- A. FortiGate starts taking the configured action for new sessions requiring content inspection when the system memory reaches the configured red threshold.
- B. FortiGate exits conserve mode when the system memory goes below the configured green threshold.
- C. FortiGate starts dropping all new sessions when the system memory reaches the configured red threshold.
- D. FortiGate enters conserve mode when the system memory reaches the configured extreme threshold.

Answer: A,B

Explanation:

When memory usage falls back below the green (low water) threshold, FortiGate automatically exits conserve mode. Once memory hits the red (high water) threshold, FortiGate begins applying your "new session" conserve action to any flows requiring content inspection.

NEW QUESTION # 46

When investigating FortiGuard connectivity issues, which action is a valid troubleshooting step?

- A. Configure a virtual IP to forward port 443 to the FortiGate external IP.
- B. Verify management VDOM internet access.
- C. Verify that DNS requests are being proxied if auto-update tunneling is enabled.
- D. Use the FortiGuard real-time debug command to verify rating requests.

Answer: B

NEW QUESTION # 47

Refer to the exhibit, which shows the partial output of diagnose sys session stat.

```
# diagnose sys session stat
misc info: session_count=1523 setup_rate=0 exp_count=0 reflect_count=0 clash=113
memory_tension_drop=0 ephemeral=0/131072 removeable=0 extreme_low_mem=0
npu_session_count=0
delete=0, flush=1, dev_down=0/0
session walkers: active=0, vf-42, dev-0, saddr-0, npu-0
TCP sessions:
  562 in ESTABLISHED state
  15 in SYN_RECV state
  27 in CLOSE state
```

Which statement about the output shown in the exhibit is correct?

- A. 562 TCP sessions have their proto_state set to 01 if there is no inspection.
- B. 27 sessions have expired but are still in the session table in case any out-of-order packets arrive.
- C. 113 sessions have been dropped because of memory page exhaustion.
- D. 15 sessions have been categorized as ephemeral.

Answer: A

Explanation:

The 562 sessions shown as "in ESTABLISHED state" correspond to proto_state 01 when no deeper inspection is applied.

NEW QUESTION # 48

Exhibit.

```

config system fortiguard
  set protocol udp
  set port 8888
  set load-balance-servers1
  set auto-join-forticloud enable
  set update-server-location any
  set sandbox-region ''
  set fortiguard-anycast disable
  set antispam-force-off disable
  set antispam-cache enable
  set antispam-cache-ttl 1800
  set antispam-cache-mpercent2
  set antispam-timeout 7
  set webfilter-force-off enable
  set webfilter-cache enable
  set webfilter-cache-ttl 3600
  set webfilter-timeout 15
  set sdns-server-ip "208.91.112.220"
  set sdns-server-port 53
  unset sdns-options
  set source-ip 0.0.0.0
  set source-id6 ::
  set proxv-server-ip 0.0.0.0
  set proxy-server-port 0
  set proxy-username
  set ddns-server-ip 0.0.0.0
  set dns-server-port 443
end

```

Refer to the exhibit, which shows a FortiGate configuration.

An administrator is troubleshooting a web filter issue on FortiGate. The administrator has configured a web filter profile and applied it to a policy; however the web filter is not inspecting any traffic that is passing through the policy.

What must the administrator do to fix the issue?

- A. Enable fortiguard-anycast.
- B. Increase webfilter-timeout.
- C. Change protocol to TCP.
- D. Disable webfilter-force-off.

Answer: D

NEW QUESTION # 49

.....

You don't have to worry about your problems on our FCSS_NST_SE-7.4 exam questions are too much or too simple. Our staff will give you a smile and then answer them carefully. All we do is just want you to concentrate on learning on our FCSS_NST_SE-7.4 study guide! Let other things go to us. And as long as you focus on our FCSS_NST_SE-7.4 Training Materials, we believe you will pass for sure for our FCSS_NST_SE-7.4 practice braindumps are always the latest and valid for all of our customers.
