Our AZ-120 exam questions almost guarantee that you pass the exam. Even if you don't pass, you don't have to pay any price for our AZ-120 simulating exam for we have money back guarantee to all of our exam materials. I hope we have enough sincerity to impress you. And our pass rate of the AZ-120 training engine is high as 98% to 100%, it is the data that proved and tested by our loyal customers. As long as you study with our AZ-120 learning guide, you will pass the exam easily.

The Microsoft AZ-120 exam consists of various topics, including the planning and deployment of Azure infrastructure for SAP workloads, the management of SAP workloads on Azure, and the monitoring and optimization of Azure solutions for SAP workloads. AZ-120 exam also covers topics related to Azure networking, storage, security, and compliance. Candidates need to have a good understanding of Azure services and how they can be integrated with SAP applications.

Candidates for the Microsoft AZ-120 exam should have a solid understanding of SAP applications, as well as experience with Azure services such as Azure Active Directory, Azure Backup, Azure Site Recovery, and Azure Security Center. They should also be familiar with Azure infrastructure and deployment models, including virtual machines, containers, and serverless computing.

To pass the Microsoft AZ-120 Exam, candidates must demonstrate their ability to manage SAP workloads on Azure effectively. They must have a deep understanding of the Azure infrastructure and how it supports SAP applications, as well as the ability to deploy and configure Azure virtual machines and storage solutions. Candidates must also be familiar with Azure networking and security features, including virtual networks, firewalls, and access controls. Additionally, they must be able to monitor and troubleshoot SAP workloads on Azure, using tools like Azure Monitor and Azure Log Analytics. Overall, the Microsoft AZ-120 exam is an excellent opportunity for professionals who want to expand their knowledge and skills in managing SAP workloads on the Azure platform.

If you fail to pass the exam, money back guarantee and it will returning to your account, and if you have any questions about the AZ-120 Exam Dumps, our online service staff will help to solve any problem you have, just contact us without any hesitation.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads

Sample Questions (Q240-Q245):

NEW QUESTION # 240

You have an SAP environment that contains the following components:

- * Enhancement Package 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)
- * Servers that runs SUSE Linux Enterprise Server 12 (SLES 12)
- * Databases on IBM Db2 10.5
- * SAP Solution Manager 7.1

You plan to migrate the SAP environment to Azure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐ Explanation:

☐ Box 1: Yes

☐ Box 2: NO

☐ Box 3: No

With Microsoft Azure, you can migrate your existing SAP application running on IBM Db2 for Linux, UNIX, and Windows (LUW) to Azure virtual machines. With SAP on IBM Db2 for LUW, administrators and developers can still use the same development and administration tools, which are available on-premises.

NEW QUESTION # 241

You have an Azure subscription that contains two SAP HANA instances.

You plan to back up the instances by using Azure Backup.

You need to configure private endpoints and a name resolution solution to support the backups. The solution must meet the following requirements:

- * Minimize the number of private endpoints required.
- * Minimize administrative effort.

Which name resolution solution should you use, and what is the minimum number of private endpoints required? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐ Explanation:

☐

NEW QUESTION # 242

You have the following Azure Resource Manager template.

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐ Explanation:

☐ Box 1: Yes

☐ Count is 6.

☐ Box 2: No

☐ Mode is serial.

☐ Box 3: NO

NEW QUESTION # 244

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You plan to migrate an SAP HANA instance to Azure.

You need to gather CPU metrics from the last 24 hours from the instance.

Solution: You use Monitoring from the SAP HANA Cockpit.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

The SAP HANA cockpit provides a single point of access to a range of SAP HANA administration and monitoring tasks. It is used to monitor and ensure the overall health of the system.

The HANA Monitoring dashboard also visualizes key HANA Metrics of SAP HANA system.
