Fantastic APMG-International - Test ISO-IEC-27001-Foundation Quiz

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our

ISO-IEC-27001-Foundation Test Torrent keep a look out for new ways to help you approach challenges and succeed in passing the ISO/IEC 27001 (2022) Foundation Exam exam. An ancient Chinese proverb states that "The journey of a thousand miles starts with a single step". To be recognized as the leading international exam bank in the world through our excellent performance, our ISO/IEC 27001 (2022) Foundation Exam qualification test are being concentrated on for a long time and have accumulated mass resources and experience in designing study materials.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	• Compliance: Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 3	• Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 4	• Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.
Topic 5	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 6	• Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 7	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 8	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q44-Q49):

NEW QUESTION # 44
Which factor is required to be determined when understanding the organization and its context?

- A. Internal issues affecting the purpose of the ISMS
- B. The processes that will be required to operate the ISMS
- C. The information security objectives relevant to the ISMS
- D. The ISO/IEC 27001 clauses which apply to the management system

Answer: A

Explanation:
Clause 4.1 specifies exactly what must be determined when establishing context: "The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system." This requirement is about understanding internal and external issues (e.g., culture, capabilities, regulatory environment) that influence the ISMS's effectiveness. Objectives (option B) are addressed later in Clause 6.2; processes (option C) are addressed in Clause 4.4 and operational planning; and "which clauses apply" (option D) is not a determination step-ISO/IEC 27001's requirements in Clauses 4-10 are not optional. Therefore, the direct, required factor per 4.1 is determining internal (and external) issues relevant to the organization's purpose and ISMS outcomes.

NEW QUESTION # 45
Which activity is an operational planning and control requirement?

- A. Document information security objectives
- B. Scheduling of second party audits
- C. Perform information security risk assessments at planned intervals
- D. Review the consequences of unintended changes

Answer: D

Explanation:
Clause 8.1 (Operational planning and control) requires organizations to:
"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).
Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 46
What activity is done first when preparing for an initial certification audit?

- A. Provide documents to the Certification Body auditor for the Stage 1 audit
- B. Provide evidence that nonconformities from an internal audit have been actioned
- C. Agree the scope of the ISMS with the Certification Body auditor
- D. Provide records to the Certification Body auditor for the Stage 2 audit

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:
Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.
ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage
2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.
Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 47
Which trend in information security performance is required to be considered during a management review of the ISMS?

- A. Achievement of information security objectives
- B. Decisions related to continual improvement opportunities
- C. Validity of information continuity controls
- D. Relevant external and internal requirements changes

Answer: A

Explanation:
Clause 9.3.2 (Management Review Inputs) states that management reviews shall include:
"c) information on the information security performance, including trends in: (1) nonconformities and corrective actions; (2) monitoring and measurement results; (3) audit results; and (4) fulfilment of information security objectives." This makes achievement of information security objectives (option A) a required trend to be considered.
While external/internal requirements (C) and continual improvement opportunities (D) are also part of management review inputs, they are not specifically listed under "trends in performance." Option B is outside the direct requirement.
Thus, the verified answer is A.

NEW QUESTION # 48
Which statement describes Annex A of ISO/IEC 27001?

- A. Provides measures to determine risk treatment effectiveness
- B. Defines a mandatory list of controls that shall be implemented
- C. Provides a reference list of information security controls and their requirements
- D. Defines the criteria for accepting risks

Answer: C

Explanation:
Annex A of ISO/IEC 27001:2022 is titled:
"Reference control objectives and controls." It provides a reference list of information security controls, structured into 4 themes: organizational, people, physical, and technological.
The standard explicitly states in Clause 6.1.3: "Organizations can design controls as required or identify them from any source. Annex A contains a list of possible information security controls." This means controls in Annex A are not mandatory (eliminating option C). Risk acceptance criteria (A) are defined in Clause 6.1.2, not Annex A. Annex A also does not provide measures for treatment effectiveness (D).
Thus, Annex A is best described as a reference list of information security controls. Correct answer:B.

NEW QUESTION # 49
......

We have authoritative production team made up by thousands of experts helping you get hang of our ISO-IEC-27001-Foundation study question and enjoy the high quality study experience. We will update the content of ISO-IEC-27001-Foundation test guide from time to time according to recent changes of examination outline and current policies. Besides, our ISO-IEC-27001-Foundation Exam Questions can help you optimize your learning method by simplifying obscure concepts so that you can master better. One more to mention, with our ISO-IEC-27001-Foundation test guide, there is no doubt that you can cut down your preparing time in 20-30 hours of practice before you take the exam.
