NEW QUESTION # 50

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- A. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- B. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- C. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- **D. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**

Answer: D

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.
