C_BCBDC_2505 Test Preparation: SAP Certified Associate - SAP Business Data Cloud & C_BCBDC_2505 Exam Lab Questions

Our C_BCBDC_2505 learning materials are carefully compiled by industry experts based on the examination questions and industry trends in the past few years. The knowledge points are comprehensive and focused. You don't have to worry about our learning from C_BCBDC_2505 exam question. We assure you that our C_BCBDC_2505 learning materials are easy to understand and use the fewest questions to convey the most important information. As long as you follow the steps of our C_BCBDC_2505 quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly. The C_BCBDC_2505 learning materials are of high quality, mainly reflected in the adoption rate. As for our C_BCBDC_2505 Exam Question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our C_BCBDC_2505 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our C_BCBDC_2505 quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our C_BCBDC_2505 exam question is 99%. So our product is a good choice for you.

Choose our C_BCBDC_2505 learning materials, you will gain a lot and lay a solid foundation for success.

SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q68-Q73):

NEW QUESTION # 68

What are the some purposes of SAP Business Data Cloud?

There are 2 correct answers to this question.

Response:

- A. To provide foundational services for data and analytics scenarios
- B. To provide a homogeneous system landscape for data, functions, and use cases
- C. To act solely as a data storage solution without analytics capabilities
- D. To provide mainly manual data integration scenarios

Answer: A,B

NEW QUESTION # 69

Which security features are inherent in SAP Business Data Cloud?

There are 2 correct answers to this question.

Response:

- A. Data encryption at rest
- B. Social media integration
- C. Built-in antivirus software
- D. Role-based access control

Answer: A,D

NEW QUESTION # 70

What is required to use version management in an SAP Analytics Cloud story?

- A. Planning model
- B. Analytic model
- C. Optimized mode
- D. Classic mode

Answer: A

Explanation:

To leverage version management capabilities within an SAP Analytics Cloud (SAC) story, it is a fundamental requirement that the story is built on a planning model. Version management is a core feature specifically designed for planning functionalities. It enables users to create, manage, and compare different scenarios or iterations of data, such as "Actual," "Budget," "Forecast," or various planning versions. This is critical for budgeting, forecasting, and what-if analysis, allowing planners to work on different data sets concurrently and track changes over time. While analytic models are used for general reporting and analysis, they do not inherently support the robust version management features that are integral to planning processes. Therefore, if you intend to utilize version management to compare different data scenarios or manage planning cycles, your SAC story must be connected to a planning model.

NEW QUESTION # 71

How can you create a local table with a custom name in SAP Datasphere? Note: There are 2 correct answers to this question.

- A. By creating an intelligent lookup
- B. By importing a CSV file
- C. By creating a persistent snapshot of a view
- D. By adding an output of a data flow

Answer: B,D

Explanation:

In SAP Datasphere, there are several ways to create a local table with a custom name, providing flexibility for data management. Two common methods are by importing a CSV file and by adding an output of a data flow. When you import a CSV file, Datasphere allows you to specify a custom name for the new local table that will store the imported data. This is a quick and straightforward way to bring external, flat-file data into Datasphere. Secondly, a data flow in Datasphere allows you to define a sequence of operations (e.g., transformations, aggregations) and write the processed data to a target. When configuring the output of a data flow, you can specify a new local table and provide it with a custom name. This method is ideal for creating structured tables as a result of complex data integration or transformation processes. These options ensure that users can create and name tables according to their specific data modeling and organizational requirements.

NEW QUESTION # 72

Which component of SAP Business Data Cloud allows for the creation of data models?

Please choose the correct answer.

Response:

- A. Data Monitor
- **B. Data Builder**
- C. Data Marketplace
- D. Data Catalog

Answer: B**NEW QUESTION # 73**

.....

Our C_BCBDC_2505 prepare questions are suitable for people of any culture level, whether you are the most basic position, or candidates who have taken many exams, is a great opportunity for everyone to fight back. According to different audience groups, our products for the examination of the teaching content of a careful division, so that every user can find a suitable degree of learning materials.
