100% Pass Valid Appian - ACD201 - Exam Appian Senior Developer Training

Perhaps you are in a bad condition and need help to solve all the troubles. Don't worry, once you realize economic freedom, nothing

can disturb your life. Our ACD201 study materials can help you out. Learning is the best way to make money. So you need to learn our ACD201 study materials carefully after you have paid for them. As long as you are determined to change your current condition, nothing can stop you. Once you get the ACD201 certificate, all things around you will turn positive changes. Never give up yourself. You have the right to own a bright future.

Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.
Topic 2	<ul style="list-style-type: none"> Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.
Topic 3	<ul style="list-style-type: none"> Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.
Topic 4	<ul style="list-style-type: none"> Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.

Appian Senior Developer Sample Questions (Q30-Q35):

NEW QUESTION # 30

You're designing an integration object with JSON (application/json) as the content type. Which two data types can be automatically converted to JSON in Appian? (Choose two.)

- A. HTML file type
- B. Primitive data types
- C. Appian Custom data type
- D. Base64 documents inline with JSON

Answer: B,C

Explanation:

Appian Custom data types (CDTs) can be automatically converted to JSON for integration. Primitive data types such as text, number, and boolean are also automatically converted to JSON.

NEW QUESTION # 31

You have a requirement to implement an audit trail for any modifications to a record. You need to select the most efficient design option that has the least impact on your Appian application. What should you do?

- A. Create a trigger on the database table to capture the audit trail to a table
- B. Create an Appian process to capture the change history and write the audit trail to the database
- C. Create a custom plug in that can write an audit trail to a log file.

Answer: A

NEW QUESTION # 32

What should you use to create a predefined query in a database for ease of use?

- A. Stored Procedure
- B. Expression Rule
- C. View

Answer: C

Explanation:

A database view is used to create a predefined query, making it easy to access, reuse, and join data for applications like Appian.

NEW QUESTION # 33

You're designing a process used to notify multiple users of marketing campaigns. These campaigns occur infrequently, but are sent out to the hundreds of customers that are stored in your app.

How should you best design your process model to send the emails whilst using a common email process model (CMN_SendEmail), to be most performant?

The outputs of this node are not required for the main process.

- A. Set "CMN_SendEmail" as a "Start Process" process node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- B. Set "CMN_SendEmail" as an asynchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- C. Set "CMN-SendEmail" as a synchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.

Answer: A

Explanation:

Using "Start Process" as the node type and enabling "Automatically run multiple instances of this node" for all users on the mailing list launches each email as a separate, lightweight process, maximizing performance and scalability, especially since the main process does not require the outputs.

NEW QUESTION # 34

You're developing a functionality to manage transactions for an insurance company. Each transaction can have multiple items where respective item type and item amount can be entered. The amount entered can be either negative or positive, and is a decimal data type with a precision of 8 and a scale of 2.

A maximum of 10 items can be entered for a transaction. Once all the items are entered, you need to calculate and show the sum of all items' total amounts at the transaction level.

What is the best way to calculate and display the sum of all item amounts?

- A. `fixed(sum(ri!items.amount),2,false())`
- B. `round(sum(ri!items.amount),2)`
- C. `text(sum(ri!items.amount),"00.00")`

Answer: A

Explanation:

`fixed(sum(ri!items.amount),2,false())` is the best option because it returns the sum as a text value formatted to exactly two decimal places, which is ideal for currency or financial amounts. This ensures the total displays correctly as a string, maintaining precision and formatting for both positive and negative values.

NEW QUESTION # 35

.....

Our ACD201 study guide in order to allow the user to form a complete system of knowledge structure, the qualification examination of test interpretation and supporting course practice organic reasonable arrangement together, the ACD201 simulating materials let the user after learning the section, and each section between cohesion and is closely linked, for users who use the ACD201 training quiz to build a knowledge of logical framework to create a good condition.
