

# Free PDF Quiz Pass-Sure ISA - ISA-IEC-62443 - ISA/IEC 62443 Cybersecurity Fundamentals Specialist Certificate Exam

**ISA/IEC 62443 Cybersecurity Fundamentals Specialist (Module 1) 2025/2026 Exam Questions and Verified Answers | Already Graded A+**

The primary focus of this course -  ANSWER ✓✓structure and content of the ISA/IEC 62443 standards

ISA/IEC 62443 provides -  ANSWER ✓✓Industrial security framework

RaaS -  ANSWER ✓✓Ransomware as a Service

what is stuxnet -  ANSWER ✓✓Stuxnet is a malware that was discovered in 2010 and is believed to have been part of a covert espionage or sabotage campaign aimed at Iran's nuclear program

what is Shamoon? -  ANSWER ✓✓destructive malware designed to wipe infected systems by overwriting information

If your preparation time for ISA-IEC-62443 learning materials are quite tight, then you can choose us. For ISA-IEC-62443 exam materials are high-quality, and you just need to spend about 48 to 72 hours on study, you can pass your exam in your first attempt. In order to increase your confidence for ISA-IEC-62443 training materials, we are pass guarantee and money back guarantee. And if you don't pass the exam by using ISA-IEC-62443 Exam Materials of us, we will give you full refund, and the money will be returned to your payment account. We have online and offline service, and if you have any questions, you can consult us.

ISA ISA-IEC-62443 practice braindumps will be worthy of purchase, and you will get manifest improvement. So you have a comfortable experience with our ISA-IEC-62443 study guide this time. By using our ISA-IEC-62443 Preparation materials, we are sure you will pass your exam smoothly and get your dreamed certification.

**100% Pass 2026 ISA ISA-IEC-62443: High Hit-Rate ISA/IEC 62443 Cybersecurity Fundamentals Specialist Certificate Exam**

Instant answer feedback allows you to identify your vulnerabilities in a timely manner, so as to make up for your weaknesses. With our ISA-IEC-62443 practice quiz, you will find that the preparation process is not only relaxed and joyful, but also greatly improves the probability of passing the ISA-IEC-62443 Exam. And our pass rate of the ISA-IEC-62443 training materials is high as 98% to 100%. You are bound to pass the exam if you buy our ISA-IEC-62443 learning guide.

## ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q26-Q31):

### NEW QUESTION # 26

What is the FIRST step required in implementing ISO 27001?

Available Choices (select all choices that are correct)

- **A. Perform a security risk assessment.**
- B. Create a security management organization.
- C. Implement strict security controls.
- D. Define an information security policy.

**Answer: A**

Explanation:

The first step in implementing ISO 27001, an international standard for information security management systems (ISMS), is to perform a security risk assessment. This initial step is critical as it helps identify the organization's information assets that could be at risk, assess the vulnerabilities and threats to these assets, and evaluate their potential impacts. This risk assessment forms the foundation for defining appropriate security controls and measures tailored to the organization's specific needs. Starting with a risk assessment ensures that the security controls implemented are aligned with the actual risks the organization faces, making the ISMS more effective and targeted.

ISA/IEC 62443 Cybersecurity Fundamentals References:  
\* Although ISO 27001 is not part of ISA/IEC 62443, it shares common principles in cybersecurity management by starting with a comprehensive understanding and assessment of security risks, which is a fundamental aspect in both standards for setting up effective security practices.

### NEW QUESTION # 27

During the operation of an IACS, who is responsible for executing the Security Protection Scheme (SPS) process measures and responding to emerging risks?

- A. The external auditor
- **B. The asset owner**
- C. The system integrator
- D. The product vendor

**Answer: B**

Explanation:

ISA/IEC 62443 clearly assigns operational cybersecurity responsibility to the asset owner. During the Operate and Maintain phase of the IACS lifecycle, the asset owner is accountable for ensuring that cybersecurity controls are executed, monitored, and adapted as risks evolve.

Step 1: Definition of the SPS

IEC 62443-2-2 defines the Security Protection Scheme (SPS) as a documented set of technical, procedural, and physical measures selected to manage cybersecurity risk. While other parties may contribute to its design or implementation, execution during operation is the asset owner's responsibility.

Step 2: Operational accountability

ISA/IEC 62443-2-1 establishes that the asset owner must operate and maintain the IACS security program, including incident handling, vulnerability management, patching, monitoring, and response to emerging threats.

Step 3: Why other roles are incorrect

\* Product vendors are responsible for product security, not operational risk response.

\* System integrators support design and implementation, not ongoing ownership.

\* External auditors assess compliance but do not execute controls.

Step 4: Risk ownership principle

Because the asset owner bears the consequences of downtime, safety incidents, and regulatory impact, the standard assigns them responsibility for executing SPS measures and responding to new risks.

Therefore, Option A is correct.

### NEW QUESTION # 28

If a U.S. federal agency must comply with mandatory cybersecurity requirements under law, which document would they be required to follow?

- A. NIST Special Publication 800-171
- B. EU Cyber Resilience Act
- C. NIST FIPS
- D. ISA/IEC 62443

**Answer: C**

Explanation:

For U.S. federal agencies, compliance with cybersecurity requirements is mandated under the Federal Information Security Modernization Act (FISMA). Under this act, agencies are required by law to adhere to NIST Federal Information Processing Standards (FIPS).

From NIST documentation and FISMA:

"Federal agencies must comply with the standards and guidelines developed by NIST, including FIPS 199 and FIPS 200, to ensure appropriate levels of information security." NIST FIPS documents are mandatory for federal agencies, while NIST Special Publications (e.g., SP 800-171) are recommended or apply to non-federal entities (like contractors).

Incorrect Options:

B). ISA/IEC 62443 - While globally recognized, ISA/IEC 62443 is not mandated by U.S. federal law.

C). EU Cyber Resilience Act - Applies only to European Union entities.

D). NIST SP 800-171 - Applies to defense contractors, not directly to federal agencies.

### NEW QUESTION # 29

Which of the following is an activity that should trigger a review of the CSMS?

Available Choices (select all choices that are correct)

- A. Organizational restructuring
- B. New technical controls
- C. Security incident exposing previously unknown risk.
- D. Budgeting

**Answer: A,B,C**

Explanation:

According to the ISA/IEC 62443-2-1 standard, a review of the CSMS should be triggered by any changes that affect the cybersecurity risk of the industrial automation and control system (IACS), such as new technical controls, organizational restructuring, or security incidents<sup>1</sup>. Budgeting is not a trigger for CSMS review, unless it impacts the cybersecurity risk level or the CSMS itself<sup>2</sup>. ### NEW QUESTION # 30

Which part of the ISA/IEC 62443 series describes a methodology to develop quantitative metrics?

- A. Part 3-2
- B. Part 1-2
- C. Part 1-3
- D. Part 2-1

**Answer: C**

Explanation:

ISA/IEC 62443-1-3 is specifically titled "System Security Conformance Metrics" and introduces a methodology to develop quantitative metrics for assessing how well a system conforms to the ISA/IEC 62443 requirements.

"Part 1-3 defines a set of metrics to quantitatively measure the conformance of systems and components to the ISA/IEC 62443 series. It supports repeatable assessment and benchmarking."

- ISA/IEC 62443-1-3:2013, Scope and Clause 5

This allows organizations to establish measurable KPIs and drive continuous improvement in IACS cybersecurity programs.

## NEW QUESTION # 31

.....

The ISA/IEC 62443 Cybersecurity Fundamentals Specialist (ISA-IEC-62443) certification is a requirement if you want to succeed in the ISA industry quickly. But after deciding to take the ISA-IEC-62443 exam, the next challenge you face is the inability to find genuine ISA-IEC-62443 Questions for quick preparation. People who don't study with ISA-IEC-62443 real dumps fail the test and lose their precious resources.

**Reliable ISA-IEC-62443 Exam Papers:** <https://www.dumptorrent.com/ISA-IEC-62443-braindumps-torrent.html>

ISA ISA-IEC-62443 Certificate Exam Although the hours are incredibly long and I found this really pleasant as well as satisfying experience, ISA ISA-IEC-62443 Certificate Exam And we insist of No Help Full Refund, Also, we have special team in responsible for the advertising of our products and the problem-solving of our management as well as the service towards our customers, so if you have any question or doubt, feel free to contact us any time, ISA-IEC-62443 training materials: ISA/IEC 62443 Cybersecurity Fundamentals Specialist and we are always here for you, We are set up for furnish a variety of services for our clients, aims to help you pass the Reliable ISA-IEC-62443 Exam Papers - ISA/IEC 62443 Cybersecurity Fundamentals Specialist exam smoothly.

Using Single Sign-on Delegator and Assertion Builder Together, business author ISA-IEC-62443 Seth Godin proclaims that one of the ways to establish yourself as an indispensable resource in an organization is to deliver unique creativity.

## How to Prepare For ISA-IEC-62443 ISA/IEC 62443 Cybersecurity Fundamentals Specialist?

Although the hours are incredibly long and I found this really pleasant as well ISA-IEC-62443 Valid Guide Files as satisfying experience, And we insist of No Help Full Refund, Also, we have special team in responsible for the advertising of our products and the problem-solving of our management as well as the service towards our customers, so if you have any question or doubt, feel free to contact us any time, ISA-IEC-62443 Training Materials: ISA/IEC 62443 Cybersecurity Fundamentals Specialist and we are always here for you.

We are set up for furnish a variety of services for our clients, aims to help you pass the ISA/IEC 62443 Cybersecurity Fundamentals Specialist exam smoothly, And to do that you are going to need help from a ISA-IEC-62443 practice questions or braindumps.
