## I27001F Exam Objectives Pdf | Valid I27001F Test Guide

Our EduDump offers you the high-quality I27001F exam dumps and answers, and make you be closer to success. If you are still worried, you can download I27001F exam dumps' free demo and answers on probation on EduDump.COM. We promise, when you purchase I27001F Exam Dumps and answers, we will also provide one year free renewal service for you.

### CertiProf I27001F Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Principles, concepts and the requirements of ISO</li><li>• IEC 27001:2022: This domain covers the core principles, key concepts, and mandatory requirements of the ISO</li><li>• IEC 27001:2022 standard. It explains how information security is structured, managed, and aligned with organizational objectives.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• ISO 27001:2022 Annex A: This domain outlines the set of security controls listed in Annex A of the standard. It explains how these controls are selected and applied to mitigate identified risks within an ISMS.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• How to Develop an ISMS: This section focuses on the process of establishing and implementing an Information Security Management System (ISMS). It includes planning, risk assessment, and applying appropriate controls to protect information assets.</li> </ul>

## CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q11-Q16):

### NEW QUESTION # 11

What does ISO/IEC 27001:2022 require for information security risk treatment?

- A. A person designated by top management with expertise to perform information security risk treatment
- **B. Performing an information security risk treatment process to select appropriate risk treatment options, taking into account the results of the risk assessment**
- C. A consultancy to accurately perform information security risk treatment
- D. Acquiring a set of information security tools to automate risk treatment

**Answer: B**

### NEW QUESTION # 12

Within the ISMS, establishing, approving, and supporting compliance with the information security policy is a responsibility of:

- **A. Top management**
- B. The implementation leader
- C. The quality management representative
- D. The IT Security Manager

**Answer: A**

Explanation:

ISO/IEC 27001:2022 assigns accountability for the information security policy to top management. Top management must ensure that the policy and objectives are established and are compatible with the strategic direction of the organization. Top management is also responsible for promoting and supporting compliance with the ISMS requirements throughout the organization. Therefore, option B is correct.

### NEW QUESTION # 13

What does ISO/IEC 27001:2022 require for internal audits?

- **A. Conducting internal audits at planned intervals to provide information on whether the Information Security Management System conforms to the organization's own requirements and to the requirements of ISO/IEC 27001:2022**
- B. A consultancy to perform second-party internal audits accurately
- C. Acquisition of a set of information security tools to document internal audits
- D. A person designated by top management who can perform internal audits in all areas within the system scope

**Answer: A**

Explanation:

ISO/IEC 27001:2022 requires the organization to conduct internal audits at planned intervals. These audits must determine whether the ISMS conforms to the organization's own requirements for its ISMS and to the requirements of the standard, and whether the ISMS is effectively implemented and maintained. The standard does not require a specific tool, consultant, or one designated person to audit every area. Therefore, option C is correct.

### NEW QUESTION # 14

What relevant factor must be considered in internal audit programmes?

- A. Ensuring that audits are carried out at least twice during the first year of ISMS implementation
- **B. The importance of the processes concerned and the results of previous audits**
- C. The number of third-party suppliers involved in the area to be audited
- D. Availability of the certification body auditors

**Answer: B**

Explanation:

ISO/IEC 27001:2022 requires the organization to plan, establish, implement, and maintain an audit programme that takes into consideration the importance of the processes concerned and the results of previous audits. This ensures that audit effort is focused appropriately and that past issues are followed up effectively.

The standard does not prescribe a minimum of two audits in the first year, nor does it make certification body availability or supplier count the defining factors. Therefore, option C is correct.

---

### NEW QUESTION # 15

In the context of clause 6.1 actions to address risks and opportunities, the weakness of an asset or control that can be exploited by a threat is known as:

- A. Threat
- B. Impact
- C. Risk
- **D. Vulnerability**

**Answer: D**

Explanation:

A vulnerability is a weakness of an asset, control, or other element that can be exploited by one or more threats. In information security risk assessment, vulnerabilities are considered together with threats, likelihood, and impact in order to understand and evaluate risk. A threat is a potential cause of an unwanted incident, while impact refers to the consequence. Therefore, option C is correct.

---

### NEW QUESTION # 16

.....

EduDump Certified ISO/IEC 27001:2022 Foundation (I27001F) practice test material covers all the key topics and areas of knowledge necessary to master the CertiProf Certification Exam.
