## Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.</li></ul>
Topic 6	<ul style="list-style-type: none"><li>User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.</li></ul>

Topic 7	<ul style="list-style-type: none"> <li>• <b>Application and Data Security</b> This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&amp;CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.</li> </ul>

## Pass Guaranteed 2026 Cisco 300-740: Latest Unlimited Designing and Implementing Secure Cloud Access for Users and Endpoints Exam Practice

Considering that different customers have various needs, we provide three versions of 300-740 test torrent available: PDF version, PC Test Engine and Online Test Engine versions. One of the most favorable demo of our 300-740 exam questions on the web is also written in PDF version, in the form of Q&A, can be downloaded for free. This kind of 300-740 Exam Prep is printable and has instant access to download, which means you can study at any place at any time for it is portable. And after you have a try on our free demo of 300-740 training guide, then you will know our wonderful quality.

### Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q99-Q104):

#### NEW QUESTION # 99

Refer to the exhibit. An engineer must configure a remote access IPsec/IKEv1 VPN that will use AES256 and SHA256 on a Cisco ASA firewall. The indicated configuration was applied to the firewall; however, the tunnel fails to establish. Which two IKEv1 policy commands must be run to meet the requirement? (Choose two.)

- A. integrity aes-256
- B. encryption aes-256
- C. hash sha-256
- D. ipsec-proposal sha-256-aes-256
- E. ipsec-proposal AES256-SHA256

**Answer: B,C**

Explanation:

In IKEv1 policy configuration for Cisco ASA, two key commands are required to define the encryption and hashing algorithms:

A: encryption aes-256 defines the encryption method for the IKE SA.

E: hash sha-256 ensures SHA-256 is used as the integrity mechanism during IKE phase 1.

According to Cisco documentation and SCAZT (Section 1: Cloud Security Architecture, Pages 19-22), these two components are essential to negotiating a secure VPN tunnel. The provided config uses group 1 (modp768), which is weak by today's standards and could also lead to negotiation failure. However, from the available options, encryption and hash are the two required for tunnel success.

#### NEW QUESTION # 100

Converged multicloud policy ensures:

- A. Decreased reliance on cloud security
- B. Separate policies for each cloud environment
- C. Consistent security policies across all cloud environments
- D. Increased complexity in security management

**Answer: C**

#### NEW QUESTION # 101

The primary purpose of Cisco Secure Analytics and Logging is to:

- A. Focus solely on external threat actors while ignoring insider threats
- B. Simplify attacks on network infrastructure
- C. Decrease the storage of logs and analytics data
- **D. Enhance visibility into security and network events for better incident analysis**

**Answer: D**

#### NEW QUESTION # 102

What does the MITRE ATT&CK framework catalog?

- A. Patterns of system vulnerabilities
- B. Models of threat intelligence sharing
- C. Standards for information security management
- **D. Techniques utilized in cyber attacks**

**Answer: D**

Explanation:

MITRE ATT&CK is a globally accessible knowledge base that catalogs adversarial tactics and techniques based on real-world observations. According to SCAZT Section 6: Threat Response (Page 113), this framework enables security professionals to map and anticipate adversarial behavior throughout the attack lifecycle. It supports threat modeling, detection engineering, and incident response.

#### NEW QUESTION # 103

To secure user and device access, identity certificates are used for:

- A. Encrypting email messages
- **B. Authenticating users and devices**
- C. Speeding up the device connectivity
- D. Increasing storage capacity

**Answer: B**

#### NEW QUESTION # 104
