Foundation Level (CPRE-FL_Syll_3.0) exam preparation material.

ISQI IREB Certified Professional for Requirements Engineering. Foundation

Level Sample Questions (Q31-Q36):

NEW QUESTION # 31
Which of the following sentences about template-based requirements is FALSE?

- A. They may lead requirements engineers to not focus on the requirements' contents.
- B. They look more uniform than requirements written in natural language.
- C. They aren't the most flexible.
- D. They put obstacles in capturing the most relevant information.

Answer: D

NEW QUESTION # 32
Which of the following are considered to be enablers of shared understanding?

- A. Large and diverse teams
- B. Informed mutual trust
- C. Domain-specific standards
- D. Geographic distance

Answer: B,C

NEW QUESTION # 33
Choose the correct sentence regarding phrase templates for requirements:

- A. Shall is used for requirements that are strongly desired but not mandatory.
- B. Should is used for mandatory requirements.
- C. Will is used for factual statements, not requirements.
- D. Even requirements using may are mandatory.

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The handbook prescribes specific modal verbs: shall indicates a mandatory requirement-non-compliance means the system is not acceptable. Should denotes a desirable, but not strictly mandatory, property. May expresses an option or permission, not an obligation. Will is reserved for statements of fact or project constraints (e.g., "the system will run on hardware X"), not for normative requirements. Therefore only statement C correctly captures the recommended usage of "will"; A, B and D contradict the defined semantics of the modal verbs.

NEW QUESTION # 34
In regard to stakeholder requirements, which of the following sentences is true?

- A. They set required domain properties.
- B. They set business goals and objectives of an organization.
- C. They set what the system shall do.
- D. They set what the users desire from their perspective.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The CPRE materials distinguish several abstraction levels: business, stakeholder (including user), system and domain requirements. Business requirements express organizational goals. Stakeholder requirements describe what stakeholders, including users, want from their point of view, often in their language and context. User requirements are a subset of stakeholder requirements. System requirements refine these into what the system must do or how it must behave, while domain requirements describe properties and rules of the domain itself.
Therefore the statement that stakeholder requirements set what users desire from their perspective is the best fit among the options.

NEW QUESTION # 35
Which of the following statements is true?

- A. All the other options are wrong.
- B. The benefits of Requirements Engineering are usually short term.
- C. The RE effort should be directly proportional to the risk that the enterprise is willing to take.
- D. The costs of Requirements Engineering are immediate.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The CPRE handbook explains that Requirements Engineering demands effort early in the life cycle:
stakeholder analysis, elicitation workshops, modeling, documentation and validation all consume time and resources. These costs are immediate and visible. However, the benefits-reduced rework, fewer defects, better alignment with needs and lower project risk-mainly materialize later during development, operation and maintenance. Thus, RE is an investment with delayed payoff. Option A is wrong because benefits are long-term. Option C is inverted: the more risk an organization is willing to accept, the less RE it may perform.
Therefore statement B is correct.

NEW QUESTION # 36
......

We sincerely suggest you to try these demos of our CPRE-FL_Syll_3.0 study guide and make a well-content choice. Different demos have different functions and each version has its advantages during the process of learning. Our CPRE-FL_Syll_3.0 Preparation exam is suitable for various consumer groups in the world we assure that after having a knowledge of those demos, you can purchase the most suitable CPRE-FL_Syll_3.0 exam materials.
