you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest C-ACDET-2506 Exam practices. And you can enjoy free updates of our C-ACDET-2506 learning prep for one year.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q40-Q45):

NEW QUESTION # 40

How can you set the order of your custom Contract Workspace fields? (Select 2 correct answers)

- A. Navigate to the UI where the class is presented, select Customize in the banner, edit, and drag and drop fields, then publish.
- B. Fields are presented in alphabetical order of the field label.
- C. Select Field Configuration, find the class, and select the Layout tab. Drag and drop the order of the fields, then publish.
- D. Select Field Configuration and under the Advanced tab set the Sequence property, then publish.

Answer: C,D

Explanation:

Custom Contract Workspace field order can be controlled through two methods:

* Using the Layout tab in Field Configuration, where fields can be dragged and dropped to reorder them visually, followed by publishing the changes.

* Using the Sequence property under the Advanced tab, assigning numeric values that define the sort order, with lower numbers appearing first. Option B is incorrect because UI banner customization does not manage field order in Contract Workspace screens. Option C is incorrect; field order is controlled by explicit settings, not alphabetical label order.

NEW QUESTION # 41

You need to revise a published form template. What steps do you follow?

- A. Edit directly in production
- B. Create a new version, edit, test, and publish
- C. Delete and recreate
- D. Clone and change ID

Answer: B

Explanation:

SAP Ariba requires that revisions to published form templates be handled through creating a new version of the template, then editing and testing the draft version before publishing it. The system maintains the prior published version active while you work on the new draft, ensuring no disruption. Cloning and changing IDs is unnecessary and not best practice. Direct edits on published templates are not permitted, and deleting and recreating loses version history and control. This versioning mechanism supports safe, auditable template changes.

NEW QUESTION # 42

A Migration is performed for a Greenfield deployment to production, and the status of the Template configuration type indicates that it Failed. What actions do you take to make the failed template(s) available in production?

- A. Import the template in production
- B. The template must always be rebuilt in production
- **C. Import the missing data in production and then import the template in production**
- D. Request SAP intervention

Answer: C

NEW QUESTION # 43

Which of the following can be used to define relation types and establish a custom relationship? Note: There are 2 correct answers to this question.

- **A. A custom Flex Master Data Template such as vrealm 1936fmd_58984.Hospital**
- **B. A custom Form Template such as vrealm 1936.formDoc_18697.Lessons Learned**
- C. A custom Enumeration such as Contracts_Contract Type
- D. A standard class such as ariba.basic.core.CommodityCode

Answer: A,B

NEW QUESTION # 44

What system is provided by SAP Free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP for Me
- **B. SAP Ariba Enablement Workbook**
- C. SAP Cloud Project Studio
- D. SAP Cloud Application Lifecycle Management

Answer: B

NEW QUESTION # 45
