完璧なISACA CISM問題トレーリング & 権威のあるCertJuken - 資格試験のリーダープロバイダー

CertJukenはISACAのCISM「Certified Information Security Manager」試験に関する完全な資料を唯一のサービスを提供するサイトでございます。CertJukenが提供した問題集を利用してISACAのCISM試験は全然問題にならなくて、高い点数で合格できます。ISACA CISM試験の合格のために、CertJukenを選択してください。

CISM認定試験は、情報セキュリティ統治、情報リスク管理とコンプライアンス、情報セキュリティプログラムの開発と管理、情報セキュリティインシデントの管理の4つの主要なドメインをカバーしています。試験は、4時間以内に完了する必要がある150の多肢選択問題で構成されています。英語、中国語（簡体字および繁体字）、フランス語、ドイツ語、ヘブライ語、イタリア語、日本語、韓国語、ポルトガル語（ブラジル）、スペイン語、トルコ語で試験が利用可能です。試験を受験するには、候補者は情報セキュリティにおける5年以上の経験を持ち、そのうち3年以上の情報セキュリティ管理の経験が必要です。

ISACA Certified Information Security Manager 認定 CISM 試験問題 (Q697-Q702):

質問 # 697
The BEST indication of a change in risk that may negatively impact an organization is an increase in the number of:

- A. alerts triggered by the security information and event management (SIEM) solution.
- B. malware infections detected by the organization's anti-virus software.
- C. security incidents reported by staff to the information security team.

- D. events logged by the intrusion detection system (IDS).

正解：C

質問 # 698

When evaluating vendors for sensitive data processing, which of the following should be the FIRST step to ensure the correct level of information security is provided?

- A. Review third-party reports of potential vendors.
- B. Include information security criteria as part of vendor selection.
- C. Include information security clauses in the vendor contract.
- D. Develop metrics for vendor performance.

正解：A

質問 # 699

Which of the following is an advantage of a centralized information security organizational structure?

- A. It is easier to manage and control.
- B. It provides a faster turnaround for security requests.
- C. It is more responsive to business unit needs.
- D. It is easier to promote security awareness.

正解：A

解説：
Section: INFORMATION SECURITY GOVERNANCE
Explanation:
It is easier to manage and control a centralized structure. Promoting security awareness is an advantage of decentralization. Decentralization allows you to use field security personnel as security missionaries or ambassadors to spread the security awareness message. Decentralized operations allow security administrators to be more responsive. Being close to the business allows decentralized security administrators to achieve a faster turnaround than that achieved in a centralized operation.

質問 # 700

The BEST way to ensure that frequently encountered incidents are reflected in the user security awareness training program is to include:

- A. results of exit interviews.
- B. previous training sessions.
- C. responses to security questionnaires.
- D. examples of help desk requests.

正解：D

解説：
The best way to ensure that frequently encountered incidents are reflected in the user security awareness training program is to include examples of help desk requests. Help desk requests are requests for assistance or support from users who encounter problems or issues related to information security, such as password resets, malware infections, phishing emails, unauthorized access, data loss, or system errors. Help desk requests can provide valuable insights into the types, frequencies, and impacts of the incidents that affect the users, as well as the users' knowledge, skills, and behaviors regarding information security. By including examples of help desk requests in the user security awareness training program, the information security manager can achieve the following benefits12:
Increase the relevance and effectiveness of the training content: By using real-life scenarios and cases that the users have experienced or witnessed, the information security manager can make the training content more relevant, engaging, and applicable to the users' needs and situations. The information security manager can also use the examples of help desk requests to illustrate the consequences and costs of the incidents, and to highlight the best practices and solutions to prevent or resolve them. This can help the users to understand the importance and value of information security, and to improve their knowledge, skills, and attitudes accordingly.

Identify and address the gaps and weaknesses in the training program: By analyzing the patterns and trends of the help desk requests, the information security manager can identify and address the gaps and weaknesses in the existing training program, such as outdated or inaccurate information, insufficient or ineffective coverage of topics, or lack of feedback or evaluation. The information security manager can also use the examples of help desk requests to measure and monitor the impact and outcomes of the training program, such as changes in the number, type, or severity of the incidents, or changes in the users' satisfaction, performance, or behavior.

Enhance the communication and collaboration with the users and the help desk staff: By including examples of help desk requests in the user security awareness training program, the information security manager can enhance the communication and collaboration with the users and the help desk staff, who are the key stakeholders and partners in information security. The information security manager can use the examples of help desk requests to solicit feedback, suggestions, or questions from the users and the help desk staff, and to provide them with timely and relevant information, guidance, or support. The information security manager can also use the examples of help desk requests to recognize and appreciate the efforts and contributions of the users and the help desk staff in reporting, responding, or resolving the incidents, and to encourage and motivate them to continue their involvement and participation in information security.

The other options are not the best way to ensure that frequently encountered incidents are reflected in the user security awareness training program, as they are less reliable, relevant, or effective sources of information. Results of exit interviews are feedback from employees who are leaving the organization, and they may not reflect the current or future incidents that the remaining or new employees may face. Previous training sessions are records of the past training activities, and they may not capture the changes or updates in the information security environment, threats, or requirements. Responses to security questionnaires are answers to predefined questions or surveys, and they may not cover all the possible or emerging incidents that the users may encounter or experience12. 質問 # 701

If an organization considers taking legal action on a security incident, the information security manager should focus PRIMARILY on:

- A. disconnecting all IT equipment involved.
- B. reconstructing the sequence of events.
- C. obtaining evidence as soon as possible.
- D. preserving the integrity of the evidence.

正解：D

解説：
Explanation
The integrity of evidence should be kept, following the appropriate forensic techniques to obtain the evidence and a chain of custody procedure to maintain the evidence (in order to be accepted in a court of law). All other options are pan of the investigative procedure, but they are not as important as preserving the integrity of the evidence.
