# Best Way to Pass VMware 2V0-16.25 Certification Exam

Through years of marketing, our 2V0-16.25 latest certification guide has won the support of many customers. The most obvious data is that our products are gradually increasing each year, and it is a great effort to achieve such a huge success thanks to our product development. First of all, we have done a very good job in studying the updating of materials. In addition, the quality of our 2V0-16.25 real study braindumps is strictly controlled by teachers. So, believe that we are the right choice, if you have any questions about our study materials, you can consult us.

You will receive a registration code and download instructions via email. We will be happy to assist you with any questions regarding our products. Our VMware 2V0-16.25 practice exam software helps to prepare applicants to practice time management, problem-solving, and all other tasks on the standardized exam and lets them check their scores. The VMware 2V0-16.25 Practice Test results help students to evaluate their performance and determine their readiness without difficulty.

Free PDF Quiz 2026 2V0-16.25: Newest VMware vSphere Foundation 9.0 Administrator Cheap Dumps

Our company has occupied large market shares because of our consistent renovating on the 2V0-16.25 exam questions. We have built a powerful research center and owned a strong team to do a better job on the 2V0-16.25 training guide. Up to now, we have got a lot of patents about our 2V0-16.25 Study Materials. On the one hand, our company has benefited a lot from renovation. Customers are more likely to choose our products. On the other hand, the money we have invested is meaningful, which helps to renovate new learning style of the 2V0-16.25 exam.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q11-Q16):

NEW QUESTION # 11
An administrator is tasked to create a new VMware vSAN cluster. The following information was provided to the administrator:
* Should host high performance application.
* Workload is latency dependent.
* Workload, compute and storage must be in the vSAN cluster.
Which configuration should the administrator choose for this vSAN cluster?

- A. vSAN Storage Cluster
- B. vSAN Express Storage Architecture (ESA)
- C. vSAN Original Storage Architecture (OSA)
- D. vSAN Original Storage Architecture (OSA) Stretched Cluster

Answer: B

Explanation:
The workload requirements specify:
* High-performance application
* Latency-dependent workloads
* Compute and storage must reside in the vSAN cluster
The correct option isvSAN Express Storage Architecture (ESA)because:
* ESA is designed forhigh-performance, low-latency applications.
* It leveragesNVMe-based storage devicesand25GbE networking, delivering better IOPS and reduced latency compared to OSA.
* OSA(Original Storage Architecture) is older and less efficient.
* OSA Stretched Cluster(A) is for resilience across sites, not specifically performance.
* vSAN Storage Cluster (B)is a generic term and not specific.

NEW QUESTION # 12
Which VMware Cloud Foundation (VCF) Operations for Logs capability facilitates root cause analysis and troubleshooting?

- A. Log Forwarding
- B. Dashboarding
- C. Alerting
- D. Log Querying

Answer: D

Explanation:
TheVCF Operations for Logs capabilitymost useful forroot cause analysis and troubleshootingisLog Querying.
* Allows searching, filtering, and correlating log events to diagnose issues.
* Log Forwarding (A)# Sends logs elsewhere, not analysis.
* Alerting (B)# Notifies about issues but does not provide investigation details.
* Dashboarding (C)# Provides visualization, but root cause analysis requiresqueries.
References:
VMware Cloud Foundation 9.0 -VCF Operations for Logs Capabilities
VMware Docs: Using Log Insight for Root Cause Analysis

NEW QUESTION # 13
How does an administrator configure VMware Cloud Foundation (VCF) Operations for logs to send Notifications and Metrics to VCF Operations?

- A. Configure the Integrations through VCF Operations.
- B. Launch the wizard from VCF Operations.
- C. Launch the wizard from VCF Operations for Logs.
- D. Configure the Integration through VCF Operations for Logs.

Answer: A

Explanation:
To configureVMware Cloud Foundation (VCF) Operations for logsso that it can send notifications and metrics, administrators must use theIntegrations workflow inside VCF Operations.
* You configure integrations centrally from theAdministration > Integrationspage in VCF Operations.
* Here you add theVCF Operations for Logs data source, configure credentials, and set up Webhooks for alerts.
* Once integration is completed, VCF Operations for Logs data can be consumed in VCF Operations dashboards and used for notifications and metrics.
This process is not launched directly from "VCF Operations for Logs," but rather fromVCF Operations itself, where all integrations (vCenter, vSAN, NSX, and Logs) are centrally managed.

NEW QUESTION # 14

An administrator is tasked with importing a vSphere Lifecycle Manager image and applying it to a cluster containing six hosts, with two of the hosts in maintenance mode. The administrator uses the vSphere Client, navigates to the cluster, and edits the remediation settings to enable Parallel Remediation and clicks the Remediate All button to execute the remediation process.

What is the expected result of this remediation process?

- A. The image is remediated on the four hosts not in maintenance mode, in sequence. The hosts in maintenance mode are not remediated.
- B. The image is remediated on the four hosts not in maintenance mode, in parallel. The hosts in maintenance mode are not remediated.
- C. The image is remediated on the hosts in maintenance mode in parallel. The hosts not in maintenance mode are not remediated.
- D. The image is remediated on the hosts in maintenance mode in parallel, and when completed the hosts not in maintenance mode are remediated in parallel.

Answer: C

Explanation:

When using vSphere Lifecycle Manager (vLCM) with Parallel Remediation enabled, the following rules apply:

* Parallel remediation only applies to ESXi hosts that are already in Maintenance Mode.
* vLCM does not put hosts into Maintenance Mode automatically in this mode.
* Similarly, it does not exit Maintenance Mode automatically after remediation.
* Hosts not in Maintenance Mode are skipped.
* If Parallel Remediation is activated, vLCM remediates only those hosts that are already in Maintenance Mode.
* Any hosts that are not in Maintenance Mode remain untouched.
* Remediation happens in parallel for all eligible hosts.
* In this case, two of the six hosts are in Maintenance Mode. Those two hosts will be remediated in parallel.
* The remaining four hosts (not in Maintenance Mode) will not be remediated at all.

Why the other options are incorrect:

* A. Four hosts not in maintenance mode are remediated in parallel##Incorrect. Hosts must already be in Maintenance Mode to be remediated.
* B. Hosts in maintenance mode first, then non-maintenance hosts##Incorrect. Non-maintenance mode hosts are skipped, not remediated after.
* C. Four hosts remediated sequentially, others skipped##Incorrect. Parallel Remediation does not touch non-maintenance mode hosts.
* D. Hosts in maintenance mode remediated in parallel; others skipped##Correct and matches VMware documentation.

NEW QUESTION # 15

What are two roles of VMware Tools within a virtual machine (VM)? (Choose two.)

- A. Stores the virtual machine configuration files.
- B. Provides device drivers for the VM.
- C. Provides journaling of file system metadata changes for fast recovery.
- D. Provides Guest OS heartbeat service.
- E. Manages the virtual machine hardware configuration.

Answer: B,D

Explanation:

VMware Tools is a suite of services and drivers installed in a VM. It provides:

* Guest OS heartbeat service (B): Used by vCenter to monitor VM health.
* Device drivers (C): Optimized drivers for network, storage, graphics, and mouse/keyboard integration.

Other options:

* A. Journaling of file system metadata# Provided by the guest OS filesystem, not VMware Tools.
* D. Stores VM configuration files# Handled by vCenter/ESXi, not VMware Tools.
* E. Manages VM hardware configuration# Done via vSphere Client, not VMware Tools.
