Exam E-S4CPE-2405 Cram Review - E-S4CPE-2405 Exam Topic

2026 Latest Dumps4PDF E-S4CPE-2405 PDF Dumps and E-S4CPE-2405 Exam Engine Free Share: https://drive.google.com/open?id=19gOEVIEJ48RUJdm844kZovKzeN2fDMEt

Experts at Dumps4PDF strive to provide applicants with valid and updated SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition E-S4CPE-2405 exam questions to prepare from, as well as increased learning experiences. We are confident in the quality of the SAP E-S4CPE-2405 preparational material we provide and back it up with a money-back guarantee. Dumps4PDF provides SAP E-S4CPE-2405 Exam Questions in multiple formats to make preparation easy and you can prepare yourself according to your convenience way.

SAP E-S4CPE-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.
Topic 2	• Introduction to Cloud Computing and SAP Cloud ERP Deployment Options: This section of the exam measures skills of cloud solution architects and focuses on the fundamentals of cloud computing, along with the different deployment models available for SAP Cloud ERP. It addresses the benefits, challenges, and selection criteria for choosing the most suitable deployment option in alignment with business goals.
Topic 3	• Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.

Topic 4	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.

SAP E-S4CPE-2405 Exam Topic | E-S4CPE-2405 Exam Pattern

Many people are keen on taking part in the E-S4CPE-2405 exam, The competition between candidates is fierce. If you want to win out, you must master the knowledge excellently. Our E-S4CPE-2405 training quiz is your best choice. With the assistance of our E-S4CPE-2405 study materials, you will advance quickly. Also, all E-S4CPE-2405 Guide materials are compiled and developed by our professional experts. So you can totally rely on our E-S4CPE-2405 exam simulating to aid you pass the exam. Furthermore, you will learn all knowledge systematically, which can help you memorize better.

SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q55-Q60):

NEW QUESTION # 55
You are working on a Selective Data Transition project where most of the solution is being redesigned. Which approach do you use?

- A. Shell Conversion
- B. Mix & Match
- C. Dual-stack Split
- D. Lift & Shift

Answer: A

NEW QUESTION # 56
Which type of testing should be done after a release upgrade has been implemented?

- A. User acceptance tests
- B. String tests
- C. Regression tests
- D. Integration tests

Answer: C

NEW QUESTION # 57
Where do you identify new and changed features in the latest release of SAP S/4HANA? Note: There are 2 correct answers to this question.

- A. SAP Road Map Explorer
- B. Customer Influence portal
- C. What's New Viewer
- D. Feature scope description

Answer: A,C

Explanation:
Identifying new and changed features in the latest SAP S/4HANA release (e.g., 2024 for Private Edition) requires specific SAP tools or resources. Let's analyze:
* A. Feature scope description: This is incorrect. The feature scope description outlines the overall capabilities of a solution (e.g., Private Edition), but it's not a dynamic tool for highlighting new or changed features in a specific release-it's more static

documentation.
* B. What's New Viewer: This is correct. The What's New Viewer (available via SAP Help Portal or SAP for Me) provides detailed release notes for each SAP S/4HANA version, listing new features, enhancements, and changes (e.g., new Fiori apps, process improvements) specific to the latest release.
* C. SAP Road Map Explorer: This is also correct. SAP Road Map Explorer (roadmaps.sap.com) offers a strategic view of SAP S/4HANA's evolution, including new and planned features across releases. It highlights innovations and updates, making it a key resource for tracking changes.
* D. Customer Influence portal: This is incorrect. The Customer Influence portal allows customers to submit and vote on improvement requests, but it's not a primary source for identifying new or changed features in a release-it's for feedback, not documentation.
In summary, new and changed features are identified inB(What's New Viewer) andC(SAP RoadMap Explorer).
References:
* SAP Learning: "SAP S/4HANA Cloud Private Edition - Release Information" (learning.sap.com)
* SAP Help Portal: "What's New Viewer for SAP S/4HANA" (help.sap.com)
* SAP Official Site: "SAP Road Map Explorer" (roadmaps.sap.com)

NEW QUESTION # 58
Which of the following tasks are included in the SAP S/4HANA Cloud Private Edition standard services delivered by SAP for a new implementation? Note: There are 3 correct answers to this question.

- A. Provisioning a client with the desired client setup alternative
- B. Activating SAP Best Practices content in the system
- C. Activating required business functions in client 000
- D. Configuring the SAP Best Practices business processes
- E. Implementing customizations to the SAP Best Practices business processes

Answer: A,B,C

Explanation:
For a new implementation of SAP S/4HANA Cloud Private Edition, SAP provides standard services that include the following tasks:
Option A: Configuring the SAP Best Practices business processes
This option is incorrect. While SAP provides Best Practices content, the specific configuration of these processes to meet unique business requirements is typically the responsibility of the implementation team or partner.
Option B: Provisioning a client with the desired client setup alternative This option is correct. SAP handles the provisioning of the system, including setting up the client according to the agreed-upon setup alternative.
Option C: Implementing customizations to the SAP Best Practices business processes This option is incorrect. Customizations beyond the standard Best Practices are generally managed by the customer's implementation team or partner, not by SAP's standard services.
Option D: Activating required business functions in client 000
This option is correct. SAP is responsible for activating necessary business functions in the initial client (client 000) as part of the system setup.
Option E: Activating SAP Best Practices content in the system
This option is correct. SAP activates the Best Practices content, ensuring that the system includes predefined processes and configurations to accelerate implementation.
In summary, SAP's standard services for a new implementation of SAP S/4HANA Cloud Private Edition includeprovisioning the client with the desired setup,activating required business functions in client 000, andactivating SAP Best Practices content in the system.

NEW QUESTION # 59
Which activity in situation handling is exclusively available for the extended framework?

- A. Develop custom situation handling templates
- B. Collect situation data to prepare the automated r
- C. Navigate from notification to the app where the situation occurred to get more info and resolve
- D. SAP Fion application extensions
- E. Adapt predelivered situation handling templates to business requirements

Answer: A

Explanation:
Situation handling in SAP S/4HANA Cloud Private Edition provides a framework to proactively inform users about specific business situations requiring attention. Within this framework, certain activities are exclusive to the extended framework:
Option A: Adapt predelivered situation handling templates to business requirements This option is incorrect. Adapting predelivered templates is available in both the standard and extended frameworks.
Option B: Navigate from notification to the app where the situation occurred to get more info and resolve This option is incorrect. This navigation capability is a standard feature in situation handling.
Option C: Develop custom situation handling templates
This option is correct. The extended framework allows for the development of custom situation templates tailored to specific business needs, a feature not available in the standard framework.
Option D: Collect situation data to prepare the automated response
This option is incorrect. Data collection for automated responses is part of the standard framework.
In summary, the ability todevelop custom situation handling templatesis an activity exclusively available in the extended framework of situation handling in SAP S/4HANA Cloud Private Edition.
Situation handling in SAP S/4HANA Cloud Private Edition notifies users of issues or opportunities (e.g., delays, stock shortages). The extended framework enhances this with advanced capabilities. Let's analyze:
* A. Adapt predelivered situation handling templates to business requirements: This is incorrect.
Adapting pre-delivered templates is available in both the standard and extended frameworks, not exclusive to the extended one.
* B. Navigate from notification to the app where the situation occurred to get more info and resolve
This is incorrect. Navigation from notifications to apps is a standard feature across both frameworks, not exclusive to the extended framework.
* C. Develop custom situation handling templates: This is correct. The extended framework allows developers to create fully custom situation handling templates (e.g., using ABAP or BTP tools), offering greater flexibility beyond adapting pre-delivered templates. This is exclusive to the extended framework in Private Edition.
* D. Collect situation data to prepare the automated r: This is incorrect and incomplete (likely a typo for "report"). Collecting situation data is a standard feature, not exclusive to the extended framework.
* E. SAP Fiori application extensions: This is incorrect. While Fiori extensions can enhance situation handling, this option is unrelated to the situation handling framework's exclusivity and is a general extensibility feature.
In summary,C(Develop custom situation handling templates) is exclusively available in the extended framework.
