

# 1z0-1093-25 Reliable Test Cram & 1z0-1093-25 Reliable Exam Registration

P.S. Free 2026 Oracle 1z0-1093-25 dumps are available on Google Drive shared by VerifiedDumps:  
<https://drive.google.com/open?id=1z6jxUE7-kbgNvvWaFRL6jIAVmOC2RwGj>

As we all know, it is a must for all of the candidates to pass the 1z0-1093-25 exam if they want to get the related 1z0-1093-25 certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you. We will bring you integrated 1z0-1093-25 Exam Materials to the demanding of the ever-renewing exam, which will be of great significance for you to keep pace with the times. Before your purchase, you can free download the demo of our 1z0-1093-25 exam questions to check the outstanding quality.

Our company is a multinational company which is famous for the 1z0-1093-25 training materials in the international market. After nearly ten years' efforts, now our company have become the topnotch one in the field, therefore, if you want to pass the 1z0-1093-25 exam as well as getting the related certification at a great ease, I strongly believe that the 1z0-1093-25 Study Materials compiled by our company is your solid choice. To be the best global supplier of electronic 1z0-1093-25 study materials for our customers' satisfaction has always been our common pursuit.

## 2026 1z0-1093-25 Reliable Test Cram | Latest Oracle 1z0-1093-25: Oracle Cloud Database Services 2025 Professional 100% Pass

Our Oracle 1z0-1093-25 test questions are the latest, under the premise of ensuring quality, we also offer the best price. VerifiedDumps provide the candidates with the most reliable training materials and the most accurate examination dumps. In addition, free demo and pdf real questions and answers will enable you to understand VerifiedDumps Oracle 1z0-1093-25. What's more, we provide you with study guide and exam simulations, which will help you to get more about Oracle 1z0-1093-25.

### Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> <li>MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.</li> </ul>

## Oracle Cloud Database Services 2025 Professional Sample Questions (Q79-Q84):

### NEW QUESTION # 79

Which characteristic is MOST indicative of an Oracle Cloud Infrastructure (OCI) Base Database Service (BaseDB) virtual machine (VM) deployment compared to using Autonomous Database?

- A. Direct control over the operating system and database configuration.
- B. Automatic scaling of compute and storage resources based on workload demands.
- C. Automated patching and upgrades handled by Oracle.
- D. Shared Exadata infrastructure with other tenants for cost optimization.

### Answer: A

Explanation:

Direct Control in BaseDB VM:

In aBaseDB VM deployment, users have root-level access to the operating system and can directly manage the database configuration. This contrasts with Autonomous Database, where Oracle handles most administrative tasks, including patching and resource scaling.

\* BaseDB VM offers flexibility for custom configurations and control over OS-level operations.

\* This is particularly useful for environments requiring custom scripts, configurations, or database tuning.

Why the other options are incorrect:

\* A: Autonomous Database features automatic patching, not BaseDB VM.

\* B: Exadata infrastructure is typically associated with Autonomous Database rather than VM-based BaseDB.

\* D: Automatic scaling is a feature of Autonomous Database, not BaseDB.

## NEW QUESTION # 80

Which two actions can be performed using the Automatic Database Diagnostic Monitor (ADDM) within Database Management to diagnose cloud database performance?

- A. Automatically apply all ADDM recommendations to the database.
- B. Identify root causes of performance bottlenecks, such as excessive I/O or CPU contention.
- C. Generate recommendations for SQL plan baselines.
- D. Automatically create indexes to improve query performance.

**Answer: B,C**

Explanation:

A: Generate recommendations for SQL plan baselines:

\* ADDM analyzes historical data and SQL execution plans, suggesting baseline adjustments to optimize performance.

\* Recommendations may include using an existing baseline or creating a new one.

C: Identify performance bottlenecks:

\* ADDM pinpoints issues related to:

\* I/O contention

\* CPU utilization

\* Memory bottlenecks

\* Locking issues

\* Helps DBAs understand which database components are causing slowdowns.

Why the other options are incorrect:

\* B. Automatically applying recommendations: ADDM only suggests actions; DBAs must manually review and implement them.

\* D. Creating indexes: ADDM does not create indexes automatically; it may suggest them, but implementation requires DBA action.

## NEW QUESTION # 81

Which statement accurately describes the inherent trade-offs often associated with choosing a NoSQL database over a traditional relational database?

- A. NoSQL databases offer superior data integrity and reduced operational overhead compared to relational databases, making them ideal for transactional systems.
- B. NoSQL databases universally guarantee stronger data consistency than relational databases, but at the expense of increased operational complexity.
- C. NoSQL databases typically sacrifice strict data consistency (ACID) to gain horizontal scalability and higher availability.
- D. NoSQL databases provide simplified querying capabilities using standard SQL, enhancing developer productivity and reducing the learning curve.

**Answer: C**

Explanation:

Trade-offs with NoSQL Databases:

NoSQL databases are designed to scale horizontally by adding more nodes rather than scaling vertically by increasing hardware capacity. To achieve this scalability and high availability, NoSQL systems often adopt the BASE model (Basically Available, Soft state, Eventually consistent) rather than the strict ACID model (Atomicity, Consistency, Isolation, Durability) typical of relational databases.

\* This means that data consistency may be relaxed (eventual consistency) to allow faster reads and writes.

\* These characteristics make NoSQL suitable for large-scale, distributed systems but less ideal for applications requiring immediate consistency, such as banking systems.

Why the other options are incorrect:

\* A: NoSQL does not guarantee stronger consistency than relational databases.

\* C: NoSQL typically does not offer superior data integrity for transactional workloads.

\* D: SQL-based querying is usually not available in NoSQL, as they often have their own query mechanisms.

## NEW QUESTION # 82

What is the MOST effective method to minimize the recovery time objective (RTO) for a BaseDB database in the event of a complete DB system failure, assuming both cost and complexity are important considerations?

- A. Using Oracle Data Guard with synchronous replication to a remote region.

- B. Performing frequent incremental backups with block change tracking enabled.
- C. Implementing a custom script to regularly copy data files to a secondary block volume.
- D. Relying solely on regular full database backups.
- E. Using Oracle Data Guard with asynchronous replication to a different availability domain within the same region.

**Answer: E**

Explanation:

C: Using Oracle Data Guard with asynchronous replication to a different availability domain within the same region.

Asynchronous Replication:

- \* Minimizes performance impact while ensuring data protection.
- \* Placing standby in the same region reduces latency and cost.
- \* Fast switchover reduces RTO.

Why the other options are less effective:

- \* A. Full backups: Time-consuming for recovery.
- \* B. Synchronous to a remote region: Increases latency and cost.
- \* D. Incremental backups: Slower recovery process.
- \* E. Custom script: Complex and less reliable than Data Guard.

**NEW QUESTION # 83**

Which two options correctly describe methods for accessing and managing the Exadata Infrastructure?

- A. Exadata Infrastructure management is solely managed by Oracle and is not directly accessible to customers.
- B. The dbcli utility, used for database administration on VM DB Systems, can also be used to manage the Exadata Infrastructure.
- C. Management of the Exadata Infrastructure is primarily performed through the Oracle Cloud Infrastructure (OCI) console and APIs.
- D. Direct SSH access to the Exadata Infrastructure compute nodes is permitted for customers with root privileges.
- E. Customers have direct access to the Exadata storage cells, allowing them to modify storage configurations.

**Answer: A,C**

Explanation:

Managing Exadata Infrastructure:

\* OCI Console and APIs (B): The primary method for managing Exadata Infrastructure is through the Oracle Cloud Infrastructure Console and associated APIs. This includes provisioning, scaling, patching, and monitoring the Exadata environment.

\* Oracle-Managed Infrastructure (E): Exadata Infrastructure management is fully handled by Oracle, which means customers do not have direct access to the underlying hardware. This managed approach ensures high availability and security.

Why the other options are incorrect:

- \* A: Customers do not have root access to Exadata compute nodes to ensure security and system integrity.
- \* C: The dbcli utility is designed for VM DB Systems, not Exadata Infrastructure management.
- \* D: Exadata storage cells are managed by Oracle, and customers cannot directly modify storage configurations.

**NEW QUESTION # 84**

.....

We understand your itching desire of the exam. Do not be bemused about the exam. We will satisfy your aspiring goals. Our 1z0-1093-25 real questions are high efficient which can help you pass the exam during a week. We just contain all-important points of knowledge into our 1z0-1093-25 latest material. And we keep ameliorate our 1z0-1093-25 latest material according to requirements of 1z0-1093-25 exam. Besides, we arranged our 1z0-1093-25 Exam Prep with clear parts of knowledge. You may wonder whether our 1z0-1093-25 real questions are suitable for your current level of knowledge about computer, as a matter of fact, our 1z0-1093-25 exam prep applies to exam candidates of different degree. By practicing and remember the points in them, your review preparation will be highly effective and successful.
