iPassleader also offers Google ADP desktop practice exam software which is accessible without any internet connection after the verification of the required license. This software is very beneficial for all those applicants who want to prepare in a scenario which is similar to the Associate Data Practitioner real examination.

Google ADP Exam Syllabus Topics:

Section	Weight	Objectives
Data-Driven Decision Making	10-20%	- Identify stakeholders and requirements
		- Define success metrics
		- Translate business requirements into data solutions
		- Assess data quality and completeness
		- Build and maintain data pipelines
Data Processing and Analytics	20-30%	- Apply statistical methods for analysis
		- Use BigQuery and SQL for analytics
		- Aggregate and summarize data
		- Query and analyze datasets

		- Present data insights to stakeholders
		- Create dashboards and reports
Data Visualization and Insights	20-30%	- Interpret and communicate findings
		- Choose appropriate visualization types
		- Build visualizations using Looker Studio
		- Identify data quality issues
		- Explore data through visualization and queries
Data Preparation and Exploration	20-30%	- Perform exploratory data analysis (EDA)
		- Ingest and acquire data
		- Transform and prepare data for analysis

Try Desktop Google ADP Practice Test Software For Self-Assessment

We will be happy to assist you with any questions regarding our products. Our Google ADP practice exam software helps to prepare applicants to practice time management, problem-solving, and all other tasks on the standardized exam and lets them check their scores. The Google ADP Practice Test results help students to evaluate their performance and determine their readiness without difficulty.

Google Associate Data Practitioner Sample Questions (Q12-Q17):

NEW QUESTION # 12

Your company is migrating their batch transformation pipelines to Google Cloud. You need to choose a solution that supports programmatic transformations using only SQL. You also want the technology to support Git integration for version control of your pipelines. What should you do?

- A. Use Cloud Composer operators.
- B. Use Cloud Data Fusion pipelines.
- C. Use Dataflow pipelines.
- **D. Use Dataform workflows.**

Answer: D

NEW QUESTION # 13

Your organization is building a new application on Google Cloud. Several data files will need to be stored in Cloud Storage. Your organization has approved only two specific cloud regions where these data files can reside. You need to determine a Cloud Storage bucket strategy that includes automated high availability. What should you do?

- **A. Create a dual-region bucket, and upload the files to this bucket.**
- B. Create a single-region bucket in each of the two regions, and use Storage Transfer Service to replicate the data across the buckets in both regions.
- C. Create a single-region bucket in each of the two regions, and use the gcloud storage command to replicate the data across the buckets in both regions.
- D. Create a multi-region bucket, and upload the files to this bucket.

Answer: A

NEW QUESTION # 14

You need to transfer approximately 300 TB of data from your company's on-premises data center to Cloud Storage. You have 100 Mbps internet bandwidth, and the transfer needs to be completed as quickly as possible. What should you do?

- A. Compress the data, upload it to multiple cloud storage providers, and then transfer the data to CloudStorage.
- **B. Request a Transfer Appliance, copy the data to the appliance, and ship it back to Google.**
- C. Use Cloud Client Libraries to transfer the data over the internet.
- D. Use the gcloud storage command to transfer the data over the internet.

Answer: B

NEW QUESTION # 15

You are designing a pipeline to process data files that arrive in Cloud Storage by 3:00 am each day. Data processing is performed in stages, where the output of one stage becomes the input of the next. Each stage takes a long time to run. Occasionally a stage fails, and you have to address the problem. You need to ensure that the final output is generated as quickly as possible. What should you do?

- A. Design the workflow as a Cloud Workflow instance. Code the workflow to jump to a given stage based on an input parameter. Rerun the workflow after correcting any stage output data errors.
- B. Design the pipeline as a set of PTransforms in Dataflow. Restart the pipeline after correcting any stage output data errors.
- **C. Design the processing as a directed acyclic graph (DAG) in Cloud Composer. Clear the state of the failed task after correcting any stage output data errors.**
- D. Design a Spark program that runs under Dataproc. Code the program to wait for user input when an error is detected. Rerun the last action after correcting any stage output data errors.

Answer: C

NEW QUESTION # 16

You work for a healthcare company. You have a daily ETL pipeline that extracts patient data from a legacy system, transforms it, and loads it into BigQuery for analysis. The pipeline currently runs manually using a shell script. You want to automate this process and add monitoring to ensure pipeline observability and troubleshooting insights. You want one centralized solution, using open-source tooling, without rewriting the ETL code. What should you do?

- A. Configure Cloud Dataflow to implement the ETL pipeline, and use Cloud Scheduler to trigger the Dataflow pipeline daily. Monitor the pipeline's execution using the Dataflow job monitoring interface and Cloud Monitoring.
- B. Use Cloud Scheduler to trigger a Dataproc job to execute the pipeline daily. Monitor the job's progress using the Dataproc job web interface and Cloud Monitoring.
- C. Create a Cloud Run function that runs the pipeline daily. Monitor the function's execution using Cloud Monitoring.
- **D. Create a directed acyclic graph (DAG) in Cloud Composer to orchestrate a pipeline trigger daily. Monitor the pipeline's execution using the Apache Airflow web interface and Cloud Monitoring.**

Answer: D

NEW QUESTION # 17

.....

Our ADP study materials can provide you with multiple modes of experience, there are three main modes to choose from: PDF, Software and Online. Firstly, the PDF version is printable. Secondly, the Software version of ADP exam questions can simulate the real exam environment to give you exam experience more vividly. Thirdly, the online version supports all web browsers so that it can be worked on all the operating systems. And our ADP Study Materials will help you in a more relaxed learning atmosphere to pass the ADP exam.
