Infoblox NIOS-DDI-Expert Exam Preview & Test NIOS-DDI-Expert Quiz

We try our best to present you the most useful and efficient NIOS-DDI-Expert training materials about the test and provide multiple functions and intuitive methods to help the clients learn efficiently. Learning our NIOS-DDI-Expert useful test guide costs you little time and energy. The passing rate and hit rate are both high thus you will encounter few obstacles to pass the test. You can further understand our NIOS-DDI-Expert study practice guide after you read the introduction on our web.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which CSV export format is recommended for tasks that involve data manipulation and reimporting to the NIOS Grid?

- A. Both formats are equally suitable
- B. Standard CSV (Visible) Format
- C. Neither format is suitable for data manipulation
- D. Infoblox CSV Import Format

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation: NIOS supports two CSV export formats in Grid Manager (Data Management > Export):

* Infoblox CSV Import Format: Structured specifically for NIOS, with headers matching import fields (e.g.,

"fqdn,ip_address,mac_address"). Includes all necessary metadata for reimporting, making it ideal for editing (e.g., in Excel) and reuploading via the Data Import Wizard (DIW).

* Standard CSV (Visible) Format: A human-readable format showing only visible Grid Manager data, lacking the full structure for reimport. It's better for reporting or external analysis, not manipulation /reimport.

* Why A: The Infoblox format ensures compatibility with NIOS's import process, preserving object relationships and mandatory fields (e.g., marked with *). Editing and reimporting in this format maintains data integrity.

* Option Analysis:

* B: Standard format isn't designed for reimport-missing fields cause import failures. Incorrect.

* C: They serve different purposes; only Infoblox format suits reimporting. Incorrect.

* D: Infoblox format is suitable, so this is false. Incorrect.

* Practical Example: In an INE lab, you'd export DNS records in Infoblox CSV format, update IPs, and reimport to test bulk management, a Grid deployment skill. References: Infoblox NIOS Administrator Guide - CSV Export/Import; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 66

Which of the following transport protocols are supported by scheduled NIOS Grid Backup? (Select all that apply.)

- A. SFTP
- B. FTP
- C. HTTPS
- D. SCP

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation: NIOS Grid Backup allows scheduled exports of the configuration database (DNS, DHCP, Grid settings) to an external server. Supported protocols ensure flexibility and security:

* A (SFTP): Secure File Transfer Protocol (SSH-based) is supported for encrypted backups to remote servers (port 22). Widely used for secure transfers. Correct.

* B (SCP): Secure Copy Protocol (also SSH-based) is supported, offering a simple, secure file transfer option (port 22). Correct.

* C (FTP): File Transfer Protocol (unencrypted, port 21) is supported for legacy systems, though less secure. Correct.

* D (HTTPS): Web-based secure transfer (port 443) is supported, allowing backups to HTTP servers with SSL/TLS encryption. Correct.

* Setup: In Grid Manager (Grid > Grid Manager > Backup), you configure the protocol, server IP, and credentials.

* Practical Example: In an INE lab, you'd schedule a backup using SFTP to a remote server, test restoration, and troubleshoot connectivity issues, reinforcing Grid deployment skills.

* Note: All four are explicitly supported per NIOS documentation, making this a comprehensive list.

References: Infoblox NIOS Administrator Guide - Grid Backup; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 67

A Member in a DHCP Failover pair can assign addresses to new clients, when it is in which state(s)? (Select all that apply.)

- A. PARTNER-DOWN
- B. NORMAL
- C. RECOVER DONE
- D. COMMUNICATIONS-INTERRUPTED

Answer: A,B,D

Explanation:

Comprehensive and Detailed In-Depth Explanation: DHCP Failover states determine lease assignment:

* B (NORMAL): Both peers assign from their pools- full capacity for new clients. Correct.

* C (COMMUNICATIONS-INTERRUPTED): Surviving peer assigns new leases within MCLT limits. Correct.

* D (PARTNER-DOWN): Single peer takes full pool, assigns new leases freely. Correct.

* A (RECOVER DONE): Post-recovery state before NORMAL-typically doesn't assign until synced, but documentation varies. Likely incorrect here unless transitional.

* Practical Example: In an INE lab, test each state, monitor new client IPs, and troubleshoot capacity limits. References: Infoblox

NEW QUESTION # 68

An administrator redirects audit log output to syslog on an Infoblox appliance. This audit log output will be logged on any defined remote syslog servers.

- A. False
- **B. True**

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: Audit log redirection in NIOS:

* Setup: In Grid Manager (Administration > Logs > Syslog), enable "Redirect audit log to syslog." Audit events (e.g., config changes) merge into syslog.

* Behavior: If remote syslog servers are defined (Grid > Grid Properties > Syslog Servers), all syslog data-including audit logs-is sent there.

* Why True: Redirection ensures audit logs reach all configured remote servers alongside local syslog.

* Practical Example: In an INE lab, redirect audit logs, change a DNS record, verify syslog on a remote server, and troubleshoot logging. References: Infoblox NIOS Administrator Guide - Logging Configuration; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 69

What sends the email messages for Workflow Approval notifications in NIOS?

- A. NIOS SuperAdmin
- B. NIOS Grid Master (GM) and the NIOS Grid Master Candidate (GMC)
- C. NIOS Grid Master Candidate (GMC)
- **D. NIOS Grid Master (GM)**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation: Workflow Approval notifications:

* A: The Grid Master (GM) sends emails via its configured SMTP settings (Grid > Grid Properties > Email), as it manages Grid-wide tasks. Correct.

* B: GMC is a standby, not active unless promoted-doesn't send emails. Incorrect.

* C: Only GM sends, not both-GMC is passive. Incorrect.

* D: SuperAdmin is a role, not a process-no sending capability. Incorrect.

* Practical Example: In an INE lab, configure SMTP on the GM, test approval emails, and troubleshoot delivery from GM logs. References: Infoblox NIOS Administrator Guide - Workflow Notifications; INE Course Objective: NIOS DDI Grid Deployment.

NEW QUESTION # 70

.....

Are you planning to appear in the Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) certification test and need to know where to get updated practice questions? Then you are at the right place because Infoblox Qualified NIOS DDI Expert - INE (NIOS-DDI-Expert) has made the learning material for the applicants to prepare successfully for the certification exam in a short time.
