This way you can get knowledge about the Juniper JN0-452 exam environment beforehand. Windows computers support the Juniper JN0-452 desktop practice exam software. It works offline whereas the web-based JN0-452 Practice Test requires an active internet connection. Major browsers and operating systems support the online JN0-452 mock exam.

To learn more about our JN0-452 exam braindumps, feel free to check our Juniper Exam and Certifications pages. You can browse through our JN0-452 certification test preparation materials that introduce real exam scenarios to build your confidence further. Choose from an extensive collection of products that suits every JN0-452 Certification aspirant. You can also see for yourself how effective our methods are, by trying our free demo. So why choose other products that can't assure your success? With Itcertking, you are guaranteed to pass JN0-452 certification on your very first try.

Top JN0-452 Practice Test Fee 100% Pass | High Pass-Rate JN0-452 Test Questions: Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless)

The second format, by Itcertking, is a web-based JN0-452 practice exam that can be accessed online through browsers like

Firefox, Google Chrome, Safari, and Microsoft Edge. You don't need to download or install any excessive plugins or Software to use the web-based software. All operating systems also support this web-based JN0-452 Practice Test.

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q112-Q117):

NEW QUESTION # 112

Which access points (APs) will be considered for inclusion in the AP Offline Marvis Action?

- A. all APs in inventory
- B. all APs assigned to sites that have connected to the cloud previously
- **C. all APs assigned to sites**
- D. all purchased APs

Answer: C

Explanation:

Reference: <https://www.mist.com/documentation/whats-new-in-marvis-actions/>

NEW QUESTION # 113

Which two statements are true about 802.1X/EAP? (Choose two.)

- A. Credentials are exchanged with a RADIUS server prior to the 802.11 Association.
- **B. Credentials are exchanged with a RADIUS server prior to the 4-way Handshake.**
- C. Credentials are exchanged with a RADIUS server after the 4-way Handshake.
- **D. Credentials are exchanged with a RADIUS server after the 802.11 Association.**

Answer: B,D

Explanation:

According to Wikipedia¹, 802.1X is an IEEE Standard for port-based network access control (PNAC). It provides an authentication mechanism to devices wishing to attach to a LAN or WLAN using Extensible Authentication Protocol (EAP) over wired IEEE 802 networks and over 802.11 wireless networks, which is known as "EAP over LAN" or EAPOL.

The authentication process involves three parties: a supplicant (the client device), an authenticator (the network device such as an access point), and an authentication server (typically a RADIUS server). The supplicant must provide valid credentials to the authenticator before it can access the network resources.

The credentials are exchanged with a RADIUS server prior to the 4-way Handshake because the 4-way Handshake is used to establish encryption keys between the supplicant and authenticator after successful authentication². The credentials are exchanged with a RADIUS server after the 802.11 Association because the 802.11 Association is used to establish a logical link between the supplicant and authenticator before authentication can take place³.

NEW QUESTION # 114

RF templates are assigned to which Mist configuration object?

- A. sites
- B. WLANs
- **C. config templates**
- D. site groups

Answer: C

NEW QUESTION # 115

By default, which 6 GHz channels does Juniper Mist radio resource management (RRM) use?

- A. The channels you select as primary channels
- **B. The preferred scanning channels (PSCs)**
- C. Channels 13 through 221

- D. Channels 1, 9, and 13

Answer: B

Explanation:

In Juniper Networks Mist AI Wireless, Radio Resource Management (RRM) is designed to optimize RF performance automatically while minimizing client impact. With the introduction of Wi-Fi 6E and the 6 GHz band, Juniper Mist follows industry standards and client behavior to ensure efficient and reliable operation.

By default, Mist RRM uses the Preferred Scanning Channels (PSCs) in the 6 GHz spectrum.

The 6 GHz band introduces a very large number of available channels, which creates challenges for client discovery, scanning efficiency, and roaming speed. To address this, the IEEE defined Preferred Scanning Channels (PSCs)-a specific subset of 6 GHz channels that access points advertise and clients prioritize during active and passive scanning. These PSCs allow clients to discover networks faster without having to scan the entire 6 GHz channel set.

Juniper Mist RRM automatically selects and operates on these PSCs by default to:

- * Improve client discovery and association times
- * Reduce unnecessary scanning overhead
- * Enhance roaming performance
- * Maintain compatibility across a wide range of Wi-Fi 6E client devices Mist continuously evaluates RF conditions using telemetry and AI-driven analysis, but it intentionally limits default operation to PSCs to balance performance, efficiency, and client interoperability. Administrators can override defaults and customize channel plans if required, but PSCs remain the recommended baseline for most deployments.

The incorrect options are explained as follows:

- * Option B is incorrect because Mist RRM does not require manual primary channel selection by default.
- * Option C refers to 2.4 GHz non-overlapping channels, not 6 GHz.
- * Option D represents the full 6 GHz channel range, which is not practical for default scanning or operation due to client limitations. Therefore, the correct answer is the preferred scanning channels (PSCs), which Juniper Mist RRM uses by default in the 6 GHz band to ensure optimal Wi-Fi 6E performance.

NEW QUESTION # 116

What is the primary purpose of scaling a floorplan correctly in the Mist UI?

- A. To make the map look visually appealing.
- B. To enable the use of WxLAN policies.
- **C. To ensure accurate calculations for Wi-Fi and vBLE location services.**
- D. To allow the placement of more APs on the map.

Answer: C

NEW QUESTION # 117

.....

We own the profession experts on compiling the JN0-452 exam questions and customer service on giving guide on questions from our clients. Our JN0-452 preparation materials contain three versions: the PDF, the Software and the APP online. They give you different experience on trying out according to your interests and hobbies. And our JN0-452 Study Guide can assure your success by precise and important information.

JN0-452 Test Questions: https://www.itcertking.com/JN0-452_exam.html

Juniper JN0-452 Practice Test Fee In case that such term or provision cannot be modified accordingly, the provision will be deemed stricken here from, and shall not affect the validity or enforceability of the remainder of these Terms and Conditions, Our JN0-452 Test Questions - Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) valid vce is the best alternative to your time and money to get an excellent career in the IT field, More importantly, we have maintained a 5-star rating and we are providing highly reliable JN0-452 exam pdf dumps for the preparation of Juniper certification exams.

Its obvious raison d'être is to install and remove fonts without JN0-452 Test Questions your having to run around to all the Fonts folders, Master the specific skills you need to deploy and run SharePoint Online.

JN0-452 Practice Test Fee | High-quality Juniper JN0-452 Test Questions:

Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless)

In case that such term or provision cannot be modified accordingly, the provision Test JN0-452 Quiz will be deemed stricken here from, and shall not affect the validity or enforceability of the remainder of these Terms and Conditions.

Our Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) valid vce is the best alternative JN0-452 to your time and money to get an excellent career in the IT filed, More importantly, we have maintained a 5-star rating and we are providing highly reliable JN0-452 exam pdf dumps for the preparation of Juniper certification exams.

And your life will become better and better, Our JN0-452 study materials' developers to stand in the perspective of candidate, fully consider their material basis and actual levels of knowledge, formulated a series of **JN0-452 Practice Test Fee** scientific and reasonable learning mode, meet the conditions for each user to tailor their learning materials.
