AZ-500 Exam Actual Tests - Free AZ-500 Study Material

It is necessary to strictly plan the reasonable allocation of AZ-500 test time in advance. Many students did not pay attention to the strict control of time during normal practice, which led to panic during the process of examination, and even some of them are not able to finish all the questions. If you purchased AZ-500 learning dumps, each of your mock exams is timed automatically by the system. AZ-500 learning dumps provide you with an exam environment that is exactly the same as the actual exam. It forces you to learn how to allocate exam time so that the best level can be achieved in the examination room.

Microsoft Azure Security Technologies Sample Questions (Q432-Q437):

NEW QUESTION # 432

Your company plans to create separate subscriptions for each department. Each subscription will be associated to the same Azure Active Directory (Azure AD) tenant.

You need to configure each subscription to have the same role assignments.

What should you use?

- A. Azure Policy
- B. Azure Blueprints
- C. Azure Security Center
- D. **Azure AD Privileged Identity Management (PIM)**

Answer: D

Explanation:

Explanation/Reference:

Explanation:

The Azure AD Privileged Identity Management (PIM) service also allows Privileged Role Administrators to make permanent admin role assignments.

NEW QUESTION # 433

You have the Azure virtual networks shown in the following table.

Name	Location	Subnet	Peered network
VNET1	East US	Subnet1	VNET2
VNET2	West US	Subnet2, Subnet3	VNET1
VNET4	East US	Subnet4	None

You have the Azure virtual machines shown in the following table.

Name	Application security group	Network security group (NSG)	Connected to	Public IP address
VM1	ASG1	NSG1	Subnet1	No
VM2	ASG2	NSG1	Subnet2	No
VM3	ASG2	NSG1	Subnet3	Yes
VM4	ASG4	NSG1	Subnet4	Yes

The firewalls on all the virtual machines allow ping traffic.

NSG1 is configured as shown in the following exhibit.

Inbound security rules

Priority	Name	Port	Protocol	Source	Destination	Action
110	Allow_RDP	3389	Any	Any	Any	Allow
130	Rule1	Any	Any	ASG1	Any	Allow
140	Rule2	Any	Any	ASG2	Any	Allow
150	Rule3	Any	Any	ASG4	Any	Allow
160	Rule4	Any	Any	Any	Any	Deny
65000	AllowVnetInBound	Any	Any	VirtualNetwork	VirtualNetwork	Allow
65001	AllowAzureLoadBalanc...	Any	Any	AzureLoadBalancer	Any	Allow
65500	DenyAllInBound	Any	Any	Any	Any	Deny

Outbound security rules

Priority	Name	Port	Protocol	Source	Destination	Action
65000	AllowVnetOutBound	Any	Any	VirtualNetwork	VirtualNetwork	Allow
65001	AllowInternetOutBou...	Any	Any	Any	Internet	Allow
65500	DenyAllOutBound	Any	Any	Any	Any	Deny

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
VM1 can ping VM3 successfully.	<input type="radio"/>	<input type="radio"/>
VM2 can ping VM4 successfully.	<input type="radio"/>	<input type="radio"/>
VM3 can be accessed by using Remote Desktop from the internet.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
VM1 can ping VM3 successfully.	<input checked="" type="radio"/>	<input type="radio"/>
VM2 can ping VM4 successfully.	<input type="radio"/>	<input checked="" type="radio"/>
VM3 can be accessed by using Remote Desktop from the internet.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
VM1 can ping VM3 successfully.	<input type="radio"/>	<input type="radio"/>
VM2 can ping VM4 successfully.	<input type="radio"/>	<input type="radio"/>
VM3 can be accessed by using Remote Desktop from the internet.	<input type="radio"/>	<input type="radio"/>

Box 1: Yes

VM1 and VM3 are on peered VNets. The firewall rules with a source of ASG1 and ASG2 allow 'any' traffic on 'any' protocol so pings are allowed between VM1 and VM3.

Box 2: No

VM2 and VM4 are on separate VNets and the VNets are not peered. Therefore, the pings would have to go over the Internet. VM4 does have a public IP and the firewall allows pings. However, for VM2 to be able to ping VM4, VM2 would also need a public IP address. In Azure, pings don't go out through the default gateway as they would in a physical network. For an Azure VM to ping external IPs, the VM must have a public IP address assigned to it.

Box 3: Yes

VM3 has a public IP address and the firewall allows traffic on port 3389.

NEW QUESTION # 434

You have an Azure subscription that contains the virtual machines shown in the following table.

Name	Operating system
VM1	Windows Server 2019
VM2	Windows Server 2022
VM3	Server Core installation of Windows Server 2022
VM4	Windows Server 2022 configured with an AppLocker policy

You are configuring Microsoft Defender for Servers.

You plan to enable adaptive application controls to create an allowlist of known-safe apps on the virtual machines. Which virtual machines support the use of adaptive application controls?

- A. VM2 and VM4 only
- B. VM1 and VM2 only
- C. VM2 and VM3 only
- D. VM1, VM2, VM3, and VM4

Answer: D

NEW QUESTION # 435

You have been tasked with applying conditional access policies for your company's current Azure Active Directory (Azure AD). The process involves assessing the risk events and risk levels.

Which of the following is the risk level that should be configured for users that have leaked credentials?

- A. Low
- B. Medium
- C. None
- D. High

Answer: D

Explanation:

These six types of events are categorized into 3 levels of risks - High, Medium & Low:

Table Description automatically generated

Sign-in Activity	Risk Level
Users with leaked credentials	High
Sign-ins from anonymous IP addresses	Medium
Impossible travel to atypical locations	Medium
Sign-ins from infected devices	Medium
Sign-ins from IP addresses with suspicious activity	Low
Sign-ins from unfamiliar locations	Medium

Reference:

NEW QUESTION # 436

You have an Azure subscription that contains an Azure web app named App1.

You plan to configure a Conditional Access policy for App1. The solution must meet the following requirements:

- * Only allow access to App1 from Windows devices.
- * Only allow devices that are marked as compliant to access App1.

Which Conditional Access policy settings should you configure? To answer, drag the appropriate settings to the correct requirements. Each setting may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Policy settings	Answer Area
Cloud apps or actions	Only allow access to App1 from Windows devices: <input type="text"/>
Conditions	Only allow devices that are marked as compliant to access App1: <input type="text"/>
Grant	
Session	

Answer:

Explanation:

The screenshot shows a 'Policy settings' interface with a 'Cloud apps or actions' section and a 'Conditions' section. The 'Conditions' section is expanded, showing 'Grant' and 'Session' options. The 'Answer Area' on the right contains two statements: 'Only allow access to App1 from Windows devices: [Conditions]' and 'Only allow devices that are marked as compliant to access App1: [Conditions]'. The Microsoft logo is visible in the background.

Explanation:

The screenshot shows a 'Policy settings' interface with a 'Cloud apps or actions' section and a 'Conditions' section. The 'Conditions' section is expanded, showing 'Grant' and 'Session' options. The 'Answer Area' on the right contains two statements: 'Only allow access to App1 from Windows devices: [Conditions]' and 'Only allow devices that are marked as compliant to access App1: [Conditions]'. The Microsoft logo is visible in the background.

NEW QUESTION # 437

.....

PrepAwayTest is a reputable and highly regarded platform that provides comprehensive preparation resources for the Microsoft Azure Security Technologies (AZ-500). For years, PrepAwayTest has been offering real, valid, and updated AZ-500 Exam Questions, resulting in numerous successful candidates who now work for renowned global brands.

AZ-500 Exam Actual Tests: <https://www.prepawaytest.com/Microsoft/AZ-500-practice-exam-dumps.html>

Our AZ-500 study materials allow you to learn at any time. Besides, our colleagues check the updating of AZ-500 exam pdf everyday to ensure candidates pass the AZ-500 (Microsoft Azure Security Technologies) valid test smoothly. As we all know, it is a must for Microsoft AZ-500 Exam Actual Tests workers to pass the exam in the shortest time if they want to get the certification, Microsoft Test AZ-500 Book. If you have any doubts, you can consult us.

After the transform is applied, the frame updates to the minimum Free AZ-500 Study Material bounding box that encloses the view, Xubuntu is particularly useful for those of you who want to run Ubuntu on older hardware.

Pass Guaranteed Microsoft - Updated AZ-500 - Test Microsoft Azure Security Technologies Book

Our AZ-500 Study Materials allow you to learn at any time. Besides, our colleagues check the updating of AZ-500 exam pdf everyday to ensure candidates pass the AZ-500 (Microsoft Azure Security Technologies) valid test smoothly.

As we all know, it is a must for Microsoft workers to pass AZ-500 the exam in the shortest time if they want to get the certification. If you have any doubts, you can consult us.

We supply both goods which are our AZ-500 practice materials as well as high quality services.
