## Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q10-Q15):

### NEW QUESTION # 10

What are the guiding principles of OGL deployment?

- A. Focus on business outcomes, leverage best practices, and iterate and continuously improve
- B. Await further direction from leadership, plot your course based on personal intuition, and work independently.
- C. Start work immediately with any available resources, adjust reactively to obstacles, and focus on finishing quickly.

**Answer: A**

Explanation:

The guiding principles of OGL deployment are to focus on business outcomes, leverage best practices, and iterate and continuously improve (option B). These principles align with Oracle's Agile-inspired methodology, emphasizing results, proven approaches, and adaptability. Option A reflects a haphazard, reactive approach, while option C suggests indecision and isolation-both contrary to OGL's structured, outcome-driven framework. Option B ensures deployments meet organizational goals efficiently and sustainably, reflecting Oracle's strategic deployment ethos.

### NEW QUESTION # 11

Which definition describes the OGL deployment approach value of "Agile"?

- A. Ensure your digital transformation initiatives can grow with your business.
- B. Support you and your organization in meeting your business objectives.
- C. Enable your users to see the path forward with more confidence.

**Answer: C**

Explanation:

The "Agile" value in OGL's deployment approach emphasizes iterative progress and user confidence in navigating the system, aligning with option A. Options B and C are broader goals but less specific to Agile's focus on adaptability and visibility.

### NEW QUESTION # 12

Which phase includes the following key activities?

Testing content directly impacted by the quarterly update

Testing all active content

- A. Test
- B. Publish
- C. Prepare
- D. Update

**Answer: A**

Explanation:

The Test phase includes testing content impacted by quarterly updates and all active content (option D) to ensure functionality post-changes. Publish (option A) deploys content, Update (option B) modifies it, and Prepare (option C) plans for changes, but only Test focuses on validation. This phase ensures content remains effective after Fusion updates, addressing both specific and comprehensive testing needs for quality assurance.

### NEW QUESTION # 13

Which activity will help your project team prepare for go live?

- A. Include the item for workarounds, known issues, and documentation in the Help Panel.
- B. Send a survey via email to end users to ask if they are ready for go live.
- C. Alert users of any learning courses through a company email with links.

**Answer: A**

Explanation:

Preparing for go live involves equipping users with resources to navigate the system effectively from day one. Including workarounds, known issues, and documentation in the Help Panel (option B) ensures end users have immediate access to critical support within the application, reducing disruption and enhancing readiness. Alerting users about courses (option A) is preparatory but less directly tied to go-live execution, while sending a survey (option C) gauges readiness without actively aiding it. The Help Panel approach proactively addresses potential challenges, aligning with OGL's user-enablement focus and making it a practical, impactful step for go-live success.

### NEW QUESTION # 14

Which listed resource has the broadest access to permissions within the OGL console?

- A. OGL Content Editor
- B. Functional Expert
- C. OGL Administrator
- D. OGL Content Developer

**Answer: C**

### Explanation:

The OGL Administrator has the broadest access to permissions within the OGL console, including managing users, configuring settings, and overseeing all content and analytics (option C). OGL Content Editors (option A) and Developers (option B) focus on content creation and editing with more limited scopes, while Functional Experts (option D) provide process knowledge but lack console-wide authority. Administrators can assign roles, publish content, and adjust system parameters, making their permissions comprehensive and critical for console management. This broad access ensures they can support all project facets, from setup to deployment.
