ANVE Reliable Test Bootcamp | ANVE Real Exam

In order to make sure your whole experience of buying our ANVE prep guide more comfortable, our company will provide all people with 24 hours online service. The experts and professors from our company designed the online service system for all customers. If you decide to buy the ANVE study braindumps from our company, we can make sure that you will have the opportunity to enjoy the best online service provided by our excellent online workers. If you purchasing the ANVE Test Practice files designed by many experts and professors from our company, we can promise that our online workers are going to serve you day and night during your learning period. If you have any questions about our study materials, you can send an email to us, and then the online workers from our company will help you solve your problem in the shortest time. So do not hesitate to buy our ANVE prep guide.

Axis Network Video Exam Sample Questions (Q207-Q212):

NEW QUESTION # 207

What is the red tip used for?

- A. Adapting cable for RJ48 connectors
- B. Meeting fire code requirements
- C. Keeping connectors dust-free prior to installation
- D. Puncturing the cable gasket cleanly

Answer: C

Explanation:

The red tip on the cable is used to keep the connectors dust-free prior to installation. It protects the RJ45 connector from dust and debris, ensuring a clean and reliable connection once installed. Maintaining clean connectors is essential for preventing connectivity issues and ensuring optimal network performance. Axis installation guides specify the importance of keeping connectors covered until installation to protect against contamination and ensure a proper connection.

NEW QUESTION # 208

An installer needs a camera to monitor a hallway in an office complex. The hallway is 2.5 m (8 ft 2 in) wide. The customer wants to be able to identify people (80 pixels per face). What is the minimum resolution needed to meet this requirement?

- A. 1920x1024
- B. 1024x768
- C. 1280x720
- D. 800 x 600

Answer: C

NEW QUESTION # 209

Which security features are provided through a managed switch?

- A. IEEE 802.1 X port-based authentication and VLANs
- B. HTTPS encryption and IP subnets
- C. IEEE 802.1 X port-based authentication and HTTPS encryption
- D. IP subnets and VLANs

Answer: C

Explanation:

Managed switches offer a variety of security features essential for maintaining the integrity and confidentiality of network data. IEEE 802.1X port-based authentication ensures that only authorized devices can connect to the network by requiring each device to authenticate itself before gaining access. HTTPS encryption provides secure communication over the network by encrypting the data being transmitted, protecting it from interception and tampering. These two features are critical for securing network traffic and preventing unauthorized access. Axis Network Video documentation highlights the importance of these features in maintaining a secure video surveillance network.

NEW QUESTION # 210

Which of the following actions can be taken using the AXIS T8414 Installation Display? (Choose two)

- A. Reset a camera to factory default values
- B. Access a camera's home page
