

# 搜索HPE7-A03考試指南，通過了Aruba Certified Campus Access Architect Exam的一半

順便提一下，可以從雲存儲中下載KaoGuTi HPE7-A03考試題庫的完整版：[https://drive.google.com/open?id=1c5SGAo1\\_o3tYmKBrytccnwrqujsirQj](https://drive.google.com/open?id=1c5SGAo1_o3tYmKBrytccnwrqujsirQj)

擁有了KaoGuTi HP的HPE7-A03考試認證培訓資料，等於擁有了一個美好的前程，你將邁向成功。KaoGuTi HP的HPE7-A03考試認證培訓資料不僅是是你通向成功的基石，而且可以幫助你在你的IT行業發揮更有效益的能力。這個培訓資料覆蓋面廣，不僅可以提高你的文化知識，更可以提高你的操作水準。讓你更大效益的發揮自己，如果你還在等待，還在猶豫，或者你很苦悶，糾結該怎樣努力通過 HP的HPE7-A03考試認證，不要著急，KaoGuTi HP的HPE7-A03考試認證培訓資料會幫助解決這些難題的。

## HP HPE7-A03 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.</li></ul>
主題 2	<ul style="list-style-type: none"><li>Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.</li></ul>
主題 3	<ul style="list-style-type: none"><li>Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.</li></ul>
主題 4	<ul style="list-style-type: none"><li>Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.</li></ul>

## 最新HPE7-A03考題 - HPE7-A03題庫下載

如果你要購買我們的HP的HPE7-A03考題資料，KaoGuTi將提供最好的服務和最優質得的品質，我們的認證考試軟體已經取得了廠商和第三方的授權，並且擁有大量的IT業的專業及技術專家，根據客戶的需求，根據大綱開發出的一系列產品，以保證客戶的最大需求，HP的HPE7-A03考試認證資料具有最高的專業技術含量，可以作為相關知

識的專家和學者學習和研究之用，我們提供所有的產品都有部分免費試用，在你購買之前以保證你考試的品質及適用性。

## 最新的 Aruba Certified Professional HPE7-A03 免費考試真題 (Q82-Q87):

### 問題 #82

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands.

Their US-based headquarters HQ1 was refreshed last year based on the HPE Aruba Networking ESP architecture. You have created the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x 8360-16Y2C in VSX (ISL 2x100GbE DAC)

Access Stack: 10 x Stack of 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links) (2 x 10GbE uplink per stack) Based on the scenario, which switch would be a good access layer switch to recommend?

- A. CX 6400
- B. 1950S
- C. CX 6100
- **D. CX 6300F**
- E. 0

答案: D

解題說明:

For a modern ESP-based two-tier design, the access layer should use an Aruba CX switch that supports VSF stacking, 10 GbE uplinks, and full Layer 3/PoE features. Among the options, the CX 6300F best matches these requirements and is the appropriate access switch to recommend.

### 問題 #83

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada. They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 st m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft

2320 sq m. The locations need to expand the abilities to vendors that need to add setup displays or Interactive kiosks in the stores. The current Infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDF's located on floors one and two. The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

The customer would like to host all the applications at the HO Data Center. Which design would meet the customer's requirements?

- A. HPE Comware switches
- B. Aruba 10K switch with Pensando
- C. Aruba UXI Sensors
- D. Aruba Instant OS access points
- **E. Aruba SO-Branch Architecture**

答案： E

解題說明：

For ACME Retail, which aims to host all applications at the HO Data Center and has multiple locations spread across different geographical areas, the Aruba SD-Branch Architecture would be the most suitable design to meet their requirements. This architecture provides a simplified, integrated branch networking solution combining SD-WAN, LAN, and security features. It enables centralized management and control, allowing ACME Retail to efficiently route traffic from branch locations to the HO Data Center, ensuring secure and reliable access to applications. The SD-Branch solution can accommodate the company's growth and adapt to changing network demands, making it an ideal choice for a scalable and flexible network infrastructure that supports ACME Retail's business objectives.

#### 問題 #84

A customer wants to have the ability to show network usage. Which product would allow them to have this visibility?

- A. Central
- B. Aruba OS 8.X
- C. UXI
- D. ClearPass

答案： A

解題說明：

Aruba Central provides a cloud-based management platform for managing and monitoring Aruba Instant APs, switches, and branch gateways. It offers a comprehensive dashboard that gives insights into network usage, health, and performance metrics. Central allows network administrators to have visibility over their entire network infrastructure from a single pane of glass, including detailed usage statistics, which can be broken down by device, application, and time.

This visibility into network usage is crucial for optimizing network performance, planning capacity, and understanding user behavior. Aruba Central's analytics and reporting capabilities enable customers to track and analyze network usage, making it the appropriate product choice for customers wanting to monitor their network usage closely.

#### 問題 #85

You are presenting your network design solution to your customer. What is important to include in your presentation?

- A. protocols that will be used to make your solution work
- B. tangible and intangible returns for the customer
- C. your experience with this kind of project
- D. your rollback plan

答案： B

解題說明：

When presenting a network design solution to a customer, it is crucial to focus on the benefits that the solution will bring to their business. This includes both tangible returns, such as cost savings, increased efficiency, and improved performance, and intangible returns, such as enhanced security, scalability, and user satisfaction. Highlighting how the solution addresses the customer's specific needs and challenges, and how it aligns with their business objectives, helps in demonstrating the value of the solution and facilitates decision-making. Including tangible and intangible returns in the presentation makes it more compelling and relevant to the customer's business goals, thereby increasing the likelihood of the proposal's acceptance.

#### 問題 #86

You hired a junior engineer to assist you with a large-scale network infrastructure project. The engineer has never worked on such a complex project before and wants to better understand the role that each stakeholder will play in the project. What is the role of Network Operations in this project?

- A. responsible for supporting, troubleshooting, and monitoring the wired/wireless infrastructure
- B. responsible for Investigating IDS/IPS Incidents and managing firewalls
- C. responsible for establishing security policy and selecting security controls for the infrastructure
- D. responsible for authoring the low-level design and creating the configuration to meet the technical requirements
