## Discount AgilePM-Foundation Code, AgilePM-Foundation Sample Questions Pdf

Our Agile Project Management (AgilePM) Foundation Exam (AgilePM-Foundation) practice exam simulator mirrors the AgilePM-Foundation exam experience, so you know what to anticipate on AgilePM-Foundation certification exam day. Our Agile Project Management (AgilePM) Foundation Exam (AgilePM-Foundation) practice test software features various question styles and levels, so you can customize your APMG-International AgilePM-Foundation exam questions preparation to meet your needs.

APMG-International AgilePM-Foundation (Agile Project Management (AgilePM) Foundation) Certification Exam is a valuable certification for anyone looking to enhance their project management skills and knowledge. With its focus on delivering value to the customer and its flexible, collaborative approach, the AgilePM framework is becoming increasingly popular in project management circles, making this certification an attractive option for professionals looking to advance their careers in this field.

APMG-International AgilePM-Foundation (Agile Project Management (AgilePM) Foundation) Certification Exam is an entry-level certification designed for individuals who want to gain a basic understanding of Agile project management. Agile Project Management (AgilePM) Foundation Exam certification is ideal for project managers, team leaders, and anyone who is involved in Agile project management. The AgilePM-Foundation Certification covers the fundamentals of Agile project management, including the principles, processes, and techniques used in Agile project management. Agile Project Management (AgilePM) Foundation Exam certification is recognized globally and is highly valued by employers as it demonstrates that the individual has a solid understanding of Agile project management.

## APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Identify the missing word in the following sentence.

The Business Sponsor is known as the project [?] because they are committed to the solution and the delivery approach.

- A. Governor
- B. Champion
- C. director
- D. Visionary

**Answer: D**

### NEW QUESTION # 42

Which of the following statements about an agile approach to projects is true?

Deploying the Solution incrementally throughout the project to validate the solution.

Early release of Solution Increments helps test assumptions about value.

- A. Only 2 is true
- B. Neither 1 or 2 is true
- C. Both 1 and 2 are true
- D. Only 1 is true

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation (verified, paraphrased from AgilePM principles):

AgilePM promotes incremental and iterative delivery, aiming to deploy usable increments early and often. Regular deployment and demonstration validate fitness for purpose, expose risks sooner, and provide empirical feedback for planning. Early release of increments also tests assumptions about value with real users and stakeholders, informing prioritization (e.g., MoSCoW) and shaping subsequent increments. This approach supports continuous learning, sharper benefits focus, and stronger financial governance, because funding and scope decisions can be based on evidence from working solution slices rather than predictions. Hence, both statements accurately reflect agile project delivery.

### NEW QUESTION # 43

Which of the following statements about Product Development are true?

It considers time-based drivers for key events, deliveries, and stakeholder involvement.

The focus is mainly on what the product is, or needs to become, and how to achieve that.

- A. Neither 1 or 2 is true.
- B. Only 2 is true.
- C. Only 1 is true.
- D. Both 1 and 2 are true.

**Answer: B**

Explanation:

In Agile Project Management, product development is primarily concerned with the evolving solution/product-its outcomes, user value, and the means to achieve those outcomes through iterative delivery. Guidance emphasizes shaping features, quality attributes, and acceptance criteria so each increment is fit for purpose. While product work certainly happens in timeboxes, the explicit stewardship of time-based drivers (milestones, budgets, governance checkpoints, wider stakeholder scheduling) sits mainly in project management. AgilePM distinguishes the project context (business case, governance, roadmap, release planning) from the product-focused work (defining and building valuable increments). Hence statement 2 accurately reflects the heart of product development: "focus on what the product is... and how to achieve that." Statement 1 maps more closely to project-level planning and coordination responsibilities that ensure the environment, cadence, and constraints enable delivery. Agile practice uses timeboxing and MoSCoW prioritization to protect time/cost/quality, but these mechanisms belong to project/delivery management rather than defining the essence of product development. Therefore, only statement 2 is true.

#### NEW QUESTION # 44

Which phase in the DSDM process aims to understand the scope of work and, in broad terms, how it will be carried out, by whom, when and where?

- A. Feasibility
- B. Evolutionary Development
- C. Pre-Project
- **D. Foundations**

**Answer: D**

Explanation:

The phase in the DSDM process that aims to understand the scope of work and, in broad terms, how it will be carried out, by whom, when, and where is.

#### NEW QUESTION # 45

Which of the phases in the AgilePM project lifecycle is optional?

- A. Foundations
- **B. Feasibility**
- C. Realization
- D. None

**Answer: B**

Explanation:

The AgilePM lifecycle typically includes Pre-Project, Feasibility, Foundations, Evolutionary Development/Realization, Deployment, and Post-Project (benefits). Feasibility is designed as a lightweight, optional phase to confirm there is a sensible case to proceed before deeper investment. In some contexts-when viability is already established, or scope and constraints are straightforward-Feasibility may be skipped or greatly abbreviated, moving directly to Foundations, where the approach, governance, and baselines are established. By contrast, Foundations is expected for alignment and control, and Realization (timeboxed delivery) is where the solution is built; these are not optional if you are proceeding with delivery. Thus, Feasibility is the optional phase.
