

# Key Features of Salesforce Plat-Dev-210 PDF Questions By TestkingPass

P.S. Free & New Plat-Dev-210 dumps are available on Google Drive shared by TestkingPass: <https://drive.google.com/open?id=1GF4F1hBma1l8m9UTzNbaWMF1cD7tSK1T>

After the user has purchased our Plat-Dev-210 learning materials, we will discover in the course of use that our product design is extremely scientific and reasonable. Details determine success or failure, so our every detail is strictly controlled. For example, our learning material's Windows Software page is clearly, our Plat-Dev-210 Learning material interface is simple and beautiful. There are no additional ads to disturb the user to use the Salesforce Certified Omnistudio Developer qualification question. Once you have submitted your practice time, Plat-Dev-210 study tool system will automatically complete your operation.

## Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Flexcards: This section of the exam measures the skills of a Solution Architect and covers the ability to design and configure FlexCards based on specific business requirements. It evaluates the candidate's knowledge in selecting appropriate card styles, defining data sources and fields, and implementing user actions across different card states. Additionally, this domain tests the understanding of constructing the underlying JSON data structure that powers the FlexCards framework, ensuring that the configured cards meet both functional and technical specifications.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Expression Sets &amp; Decision Matrices:</b> This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Integrated Troubleshooting and Deployment:</b> This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.</li> </ul>

## Reliable Plat-Dev-210 Exam Topics - Plat-Dev-210 Reliable Test Online

It is easy for you to pass the Plat-Dev-210 exam because you only need 20-30 hours to learn and prepare for the exam. You may worry there is little time for you to learn the Plat-Dev-210 study tool and prepare the exam because you have spent your main time and energy on your most important thing such as the job and the learning and can't spare too much time to learn. But if you buy our Plat-Dev-210 Test Torrent you only need 1-2 hours to learn and prepare the Plat-Dev-210 exam and focus your main attention on your most important thing.

## Salesforce Certified Omnistudio Developer Sample Questions (Q36-Q41):

### NEW QUESTION # 36

A developer needs to build a DataRaptor Transform to send current weather to both an OmniScript Card Layout. Which of these samples would be valid for the Expected Output JSON?

- A.
- **B.**
- C.
- D.

**Answer: B**

Explanation:

According to the Transform External Data Unit, the Expected Output JSON should match the Output Path of the DataRaptor Transform. In option D, the Output Path is Current:CityState, which matches the Expected Output JSON. The other options have different Output Paths that do not match the Expected Output JSON. Therefore, the correct answer is D.

### NEW QUESTION # 37

A developer needs to use the COUNTIF function to process data entered by the user in an OmniScript. The output of the function needs to be displayed to the user immediately in the current step. Based on best practice, which element should the developer use this function in?

- **A. Formula element**
- B. Range element
- C. Set Values element

**Answer: A**

Explanation:

In OmniScripts, if you need to apply a function (like COUNTIF) to dynamic data and show the result immediately, the Formula element is the correct choice.

\* B. Formula element - The Formula element supports real-time calculation using OmniStudio expression functions (like COUNTIF, SUM, etc.) and updates values instantly on the screen without the need for server calls.

Incorrect Options:

- \* A. Set Values element is used to set static or conditional values but doesn't support formula evaluation.
- \* C. Range element is used for value comparisons and conditions, not for calculations.

:

Salesforce OmniStudio Developer Guide # OmniScript Formula Element

### NEW QUESTION # 38

A developer needs to configure a calculation procedure to calculate a subtotal using two different depending on whether the input Boolean variable is Customer is set to true or false.

How should a developer configure the calculation procedure to conditionally execute the correct formula?

- A. Use two separate Calculation Steps with the Conditional Step property selected: reference just the is Customer variable in the Conditional syntax (no comparison necessary)
- B. Use two separate Calculation Steps with the Conditional Step property selected: compare the isCustomer variable directly to the literal true and false values in the Condition syntax.
- C. Use a single Calculation Steps with IF statement directly in the formula definition to reference the isCustomer variable and conditionally perform the appropriate calculation.
- **D. Use two separate Calculation Steps with the Conditional Step property selected: use the ISTRUE (is Customer) and NOT (ISTRUE) (is Customer) functions in the Condition syntax.**

**Answer: D**

Explanation:

Using two separate Calculation Steps with the Conditional Step property selected allows the developer to specify different formulas based on different conditions. The ISTRUE(isCustomer) and NOT(ISTRUE (isCustomer)) functions are used to evaluate the Boolean variable in the Condition syntax. The other options are either missing the Conditional Step property, using incorrect comparison operators, or using an IF statement instead of separate Calculation Steps.

### NEW QUESTION # 39

Refer to the exhibit below. What is the merge code needed for this Integration Procedure structure to pass a CaseData node from the HTTP Action's output to the DataRaptor Transform Action?

□

- A. {{CaseData}}
- B. %HTTPGetDetails:CaseData%
- **C. {{ HTTPGetCaseDetails:CaseData }}**
- D. %DRXformCaseData: CaseData%

**Answer: C**

Explanation:

The merge code syntax for accessing a node from an Integration Procedure output is {{ProcedureName: NodeName}}. In this case, the ProcedureName is HTTPGetCaseDetails and the NodeName is CaseData. The % sign is used for single-value merge codes, not node merge codes. The \$ sign is used for variables, not merge codes.

### NEW QUESTION # 40

Which JSON from the DRGetAccountDetails action would display all six values correctly in the Omniscrypt structure shown? BlkContacts is a Repeat Block.

□

- A. Option D
- **B. Option A**
- C. Option B
- D. Option C

**Answer: B**

Explanation:

From the OmniStudio OmniScript Documentation:

- \* A Repeat Block (like BlkContacts) expects an array of objects.
- \* Each item in the array must contain fields that exactly match the UI elements inside the block.
- \* The parent JSON must include any top-level values used by individual input fields (like AccountName, AccountPhone).

Why the Other Options Are Incorrect:

- \* B. Uses Contacts instead of BlkContacts, and is incomplete/malformed.
- \* C. Repeats keys at the same level instead of using an array structure. This causes the data to overwrite and fail to display properly.
- \* D. Uses incorrect keys like "Name" and "Phone" instead of expected "ContactName" and "ContactPhone", breaking field binding.

## NEW QUESTION # 41

.....

Up to now, we have successfully issued three packages for you to choose. They are PDF version, online test engines and windows software of the Plat-Dev-210 study materials. The three packages can guarantee you to pass the exam for the first time. Also, they have respect advantages. Modern people are busy with their work and life. You cannot always stay in one place. So the three versions of the Plat-Dev-210 study materials are suitable for different situations. For instance, you can begin your practice of the Plat-Dev-210 Study Materials when you are waiting for a bus or you are in subway with the PDF version. When you are at home, you can use the windows software and the online test engine of the Plat-Dev-210 study materials. When you find it hard for you to learn on computers, you can learn the printed materials of the Plat-Dev-210 study materials. What is more, you absolutely can afford for the three packages. The price is set reasonably.
